TARIFF FORMAT

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

3.1 General

Service is offered to residential or business customers and is available from equal access originating end offices only.

3.2 Timing of Calls

3.2.1 Long distance usage charges are based on the actual usage of X2Comm, Inc.'s network. Chargeable time begins when a connection is established between the calling station and the called station. Chargeable time ends when either party "hangs up" thereby releasing the network connection.

3.2.2 Minimum call duration and rounding of calls for measurement and billing purposes is specified for each product in this tariff.

3.2.3 Except for charges that use a special access line, when a call is established in one rate period and ends in another rate period, the rate in effect at the calling station applies to the portion of the call occurring within that rate period. When a unit of time is split between two rate periods, the rate applicable to that unit of time is based on the rate period in which it began.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, (CONT'D.)

3.3 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between the Rate Centers associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the Rate Centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1 - Obtain the "V" and "H" coordinates for the Rate Center of the originating and the destination points.
- Step 2 - Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the difference between the "H" coordinates.
- Step 3 - Square the differences obtained in Step 2.
- Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating points of the call.

Formula:

The square
root of:

$$\frac{(V1-V2)^2 + (H1-H2)^2}{10}$$
