The minimum bond amount of \$10,000 should be increased if at any time it would be insufficient to cover prepayments or deposits collected from the Applicant's customers. Staff further recommends that proof of the above mentioned performance bond be docketed within 90 days of the effective date of an order in this matter or 30 days prior to the provision of service, whichever ever comes first. 14. Please indicate if your Company is currently selling facilities-based local exchange telecommunications services in Arizona. This applies to Applicant requesting a geographic expansion of their CC&N.

Identify whether operator services are provided or sold.

Identify whether operator services are provided or sold to traffic aggregators (as defined in A.A.C. Rule R14-2-1001 (3)).

(Note: Commission rule requires that a separate CC&N, issued under Article 10, be obtained in order to provide operator services to traffic aggregators.)

Identify the total number of facilities-based local exchange intrastate minutes sold in the latest 12-month period for which data is available.

18. Please list the states in which you currently offer facilities-based local exchange telecommunications services similar to those you intend to sell in Arizona.
19. Please provide a list of the states in which you have sought authority to sell facilities-based long distance telecommunications services and either granted the authority with major changes and conditions, or had grant your application for those services denied.

For each state listed, provide a copy of the Commission's decision modifying or denying your application for authority to provide facilities-based local exchange telecommunications services.

20. Please indicate if the Company has been granted authority to provide or sell facilities-based local exchange telecommunications services in any state where subsequently the authority was revoked.

If "yes", provide copies of the State Regulatory Commission's decision revoking its authority.

21. Please list and give a detailed explanation of complaints you have received (if any) regarding facilities-based local exchange telecommunications services offered in other states.

State what actions were taken to remedy these complaints and to prevent them from occurring again.

22. Please indicate if your Company is a switchless seller of facilities-based local exchange telecommunications services

If "yes", provide the name of the company or companies whose facilities-based local exchange telecommunications services you sell.

If "no" include Attachment "H".

*(Note: Attachment "H" needs to provide the following information:
A diagram of the Applicant's basic call network used to complete Arizona intrastate facilities-based local exchange telecommunications traffic. This diagram should show how a typical call is routed in both its originating and terminating ends (i.e. show the access network and call completion network). Also, include on the diagram the carrier(s) used for each major network component and indicate if the carrier is facilities-based or not. If the carrier*

STAFF'S FIRST SET OF DATA REQUESTS TO
TRI-M COMMUNICATIONS, INC DBA TMC COMMUNICATIONS

is not facilities-based indicate who owns the facilities (within the State of Arizona) that are used to originate and terminate the Applicant's intrastate telecommunications traffic (i.e. provide a list of the Arizona facilities-based long distance carriers whose facilities are used to complete the Applicant's intrastate traffic).

23. Please provide a detailed description of the interconnection agreement(s) your Company has with other facilities-based local exchange carriers to ensure your network is properly connected to other facilities-based local exchange company networks. Unless the Company provides services solely through the use of its own facilities, the Company needs to procure an interconnection agreement that is consistent with established guidelines before being allowed to offer facilities-based local exchange service.

(Note: The Commission approved the parameters under which interconnection between the Applicant and other providers will take place (Decision No. 59761, dated July 22, 1996, in Docket No. RT-00000F-96-0001.) The 1996 Telecommunications Act set forth general guidelines for interconnection).

24. Please indicate how your Company plans to have its customers' telephone numbers included in the incumbent's Directories and Directory Assistance databases before it begins to provide local exchange service. Since callers should be able to determine the telephone numbers belonging to customers of alternative local exchange companies, such as the Applicant; please make sure your plan answers the following questions:

Indicate the need for one or more Directory Assistance database administrators.

If there is one Directory Assistance database administrator, what should the rates be to include customers' telephone numbers in the directories?

Indicate the specific items that should be included in the Directory Assistance database.

25. Please provide a detailed description of how your Company will administer the portability of telephone numbers.

(Note: Local exchange competition may not be vigorous if customers, especially business customers, must change their telephone numbers to obtain the service offerings of a competitive local exchange carrier.)

If your service area will include rate centers in one of the top 100 Metropolitan Statistical Areas, please confirm that your switches will be equipped with Local Number Portability ("LNP").

STAFF'S FIRST SET OF DATA REQUESTS TO
TRI-M COMMUNICATIONS, INC DBA TMC COMMUNICATIONS
DOCKET NO. T-03714A-01-0805

Indicate in your description the permanent LNP arrangements made with other local exchange carriers ("LECs"), the Number Portability Administrative Center ("NPAC") or other industry agency that are consistent with federal laws, federal rules and state orders or rules.

26. Please indicate that your Company intends to abide by the quality of service standards that were approved by the Commission for USWC in Docket No. T-01051B-93-0183 (Decision No. 59421).

(Note: Penalties that were developed in this docket were initiated because USWC's level of service was not satisfactory. Staff does not recommend that those penalties apply to the Applicant. In the competitive market that the Applicant wishes to enter, the Applicant generally will have no market power and will be forced to provide a satisfactory level of service or risk losing customers. Therefore, Staff believes that it is unnecessary to apply those penalties to the applicant at this time.)

27. Please indicate that your Company will provide all customers with 911 and E911 service, where available and will coordinate with incumbent local exchange carriers ("ILECs") and emergency service providers to provide the service.

(Note: Staff believes that the Applicant should be required to work cooperatively with local governments, public safety agencies, telephone companies, the National Emergency Number Association, and all other concerned parties to establish a systematic process in the development of a universal emergency service telephone number system. Staff recommends that the Applicant be required to certify, through the 911 service provider in the area in which it intends to provide local exchange service, that all issues associated with the provision of 911 service have been resolved with the emergency service providers before it begins to provide facilities-based local exchange service.)

28. Please indicate that your Company intends to abide by all the Commission decisions and policies regarding Caller ID and other Custom Local Area Signaling Services ("CLASS").

(Note: In its decision related to U S West Corporation's ("USWC's") proposal to offer Caller ID and other CLASS features in the State, the Commission addressed a number of issues regarding the appropriateness of offering these services and under what circumstances it would approve the proposals to offer them. The Commission concluded that Caller ID could be offered provided that per call and line blocking, with the capability to toggle between blocking and unblocking the transmission of the phone number, should be provided as options to which customers could subscribe with no charge. The Commission also approved a Last Call Return service that will

STAFF'S FIRST SET OF DATA REQUESTS TO
TRI-M COMMUNICATIONS, INC DBA TMC COMMUNICATIONS
DOCKET NO. T-03714A-01-0805

not return calls to telephone numbers that have the privacy indicator activated, which indicates that the number has been blocked. The Commission further required that USWC engage in education programs when introducing or providing the service(s). Staff does not believe that it is necessary for the Applicant to engage in the education program that was ordered for USWC as long as customers in the areas where the Applicant intends to serve have already been provided with educational material and aware that they can have their numbers blocked on each call or at all times with line blocking.)

29. Please indicate by reference to page number(s) in your Company's tariff that there is no Call Blocking charge.

30. Please provide your Operating Company Number ("OCN").

31. Please indicate the rate centers you plan on requesting initial codes for.

Please provide the number of codes you plan on requesting in each rate center.

32. Please indicate that your Company's switch is "fully equal access capable" (i.e. would provide equal access to facilities-based long distance companies).

(Note: The Commission requires facilities-based local exchange companies to provide 2-Primary Interexchange Carriers ("2-PIC") equal access. The 2-PIC equal access allows customers to choose different carriers for interLATA and intraLATA toll service and would allow customers to originate intraLATA calls using the preferred carrier on a 1+ basis.)
