Subject: Concerning Desert hills Water Co.

W-02124A-06-0717

Dear Mrs. Mayes,

I am a resident of Cave Creek and wanted to let you know of concerns I have regarding the Desert hills water Co. now run by the town town of Cave Creek. Right now I have it on good authority that the desert hills water Co. has some major water supply issues One being that their main well has been down now for quite a few days and Cave Creek has not yet done anything to repair it. Second the connection between anthem and desert hills has been turned off due to a leak in the pipe with no plans to repai at this time, this has been off now for over two weeks. Thirdly all of the water for desert hills is now being supplied through one connection from Global Water. Thier new pump station which was just installed is not being used because the water is being supplied from Global Water on their pressure. This is certainly demonstrates that the town of Cave Creek has no clue of how to run a water utility and should have never been allowed to purchase Desert hills water Co. to begin with. I hope that you can have someone look into these issues. As the weather warms up Desert hills (Cave Creek) will never be able to meet the water demands. Thank you for your time.

Sincerely,

Dea O.
