PROPOSED AMENDMENT # Staff 1

AZ CORP COMMISSION
DOCUMENT CONTROL

DRAFT PREPARED August 26, 2002

COMPANY: Commission Staff

AGENDA ITEM NO. _____

DOCKET NO. E-00000A-02-0051 ET AL.

OPEN MEETING DATE: August 27, 2002

Staff proposes the following language changes to several Findings of Fact and Ordering paragraphs to add clarity regarding how to proceed with resolving transmission import constraints, continuing dependence upon RMR generation, and the merits of any future contemplated utilization of RMR to defer transmission projects.

FINDING OF FACTS

40. APS and TEP should work with Staff to develop a 2002 study process plan to resolve RMR generation concerns, such study plans results to be included in the ~~next-2004~~ Biennial Transmission Assessment. This includes studying and analyzing the merits of existing dependence on RMR generation instead of building transmission to resolve transmission import constraints and the merits of any future utilization of RMR to defer transmission projects.

41. Until the ~~next-2004~~ Biennial Transmission Assessment is issued with RMR study plan results resolved, APS and TEP shall file annual RMR study reports with the Commission in concert with their January 31 annual ten year plan for review prior to implementing any new RMR generation strategies.

ORDER

Ln 10, pg 32: IT IS FURTHER ORDERED that APS and TEP shall work with Staff to develop a plan as discussed herein to resolve reliability must-run generation concerns. Staff shall include results of such a plan in the ~~next-2004~~ Biennial Transmission Assessment.

Ln 13, pg 32: IT IS FURTHER ORDERED that APS and TEP shall file annual reliability must-run generation study reports with the Commission in concert with their January 31 ten year plan, for review prior to implementing any new RMR generation strategies until the next Biennial Transmission Assessment is issued.
