**Quarterly Compliance Report
Pursuant to Decision No. 67240**

Docket No. W-03576A-03-0586

April 16, 2007

Pursuant to Decision No. 67240, Palo Verde Utilities Company (PVUC) submits the following report setting forth its compliance reporting during the past quarter for the various permits and other compliance reporting obligations associated with the operation of PVUC.

Palo Verde Utilities Company (PVUC) received notification from ADEQ on 9 April 2007 that PVUC reported exceedances in turbidity in excess of the allowable quantity for the fourth quarter of 2006. ADEQ evaluates performance based on alert limits, discharge limits, and technical review criteria. The combination of those parameters resulted in their assessment. The turbidity upsets were the result of a loss of process control of the plant biological system, and the unanticipated failure of flex joints in decant system. PVUC had reported these exceedances to ADEQ while they were happening.

Throughout the first quarter of 2007, the treatment system has produced water that is in full compliance with the permit conditions. In addition, PVUC has instituted additional process control measures as well as equipment repairs to ensure continued compliance.

56-001355.0000

Pursuant to A.R.S. § 45-632 and the Assured & Adequate Water Supply Rules, designated water providers are required to supply the following information. Instructions are listed under each section of this form.

Note: If any information pre-printed on this form is incorrect, please make the needed corrections. For any information not already pre-printed on this form, please follow the directions below. All parts must be completed.

PART 1 - COMMITTED DEMAND

Please provide the estimated future demand in acre-feet for undeveloped, recorded plats that are located in the area as of December 31, 2006. Report demand for residential versus non-residential lots separately.

Number of Residential Lots	Demand per Lot (af/yr) **	* Total Demand (af/yr)
15373	.21	3228
Number of Non-Residential Parcels	Total Demand (af/yr)	
0	0	

Explain how the non-residential demand was calculated. Use a separate sheet if necessary.

PART 2 - PROJECTED ANNUAL DEMAND

Project the annual water demand in acre-feet for each year indicated. Calculate the increase in demand each year from the previous year. The projected demand in most cases will be greater than the total water use for the current calendar year. Current year demand should equal the total water deliveries in the service area for 2006 as reported on the Schedule F forms, plus system losses and unaccounted for water. Include all water sources used.

Year	Projected Population *	GPCD	Total Demand (af/yr)	Increase from Previous Year (af/yr)

2015	117000	70	9174	757

PART 3 - WATER QUALITY

- A. Is the provider currently in compliance with the Arizona Department of Environmental Quality's state water quality standards and reporting requirements? Yes No
- B. Have any new Superfund or WQARF sites been identified within the provider's service area or have existing contaminant plumes migrated to be within one mile of any service area wells? Yes No

Please contact the Office of Assured and Adequate Water Supply if you need assistance completing this form.

* Based on 2.68 per household (602) 771-8585

** Based on 2390 GW delivered to residential customers averaging 11.251 af/2006
