Subject: Arizona to California Power Line

ORIGINAL

Dear Chairman Gleason,

I would like to express my concern about the purposed transmission line to California (CA). From what I have seen in the news a large portion of the cost of this line would fall on the shoulders of Arizona. This line would be for the benefit of CA customers and the companies that built the gas fired power plants near Palo Verde. If this line is built it 100% of the cost should be paid for by the CA users and the companies that built the gas fired plants (on speculation). While I admire some of CA environmental laws the simple fact is that is why the plants were built here. There is no reason that AZ should be burdened with the pollution and the use of our infrastructure (power and natural gas transmission lines). Some of these facilities are already burdened (natural gas shortage last winter) and supplying power to CA should not be our priority.

Please take my concerns in consideration at the hearing and feel free to pass this on to the other commissioners.

Thank You
Clifford Ehlers
