Subject: Deves Palo Verde 2

Sir:

From one Iowan to another (1963 graduate U of Iowa):
I ask that you deny the petition to build the Devers Palo Verde 2 transmission line. I see no reason why the state of Arizona should provide electricity, transmission lines or future electric generating facilities for the State of California, who refuses to allow them in their state. Arizona does not need the air pollution, or scenic pollution that will occur should this transmission line go through. I can see that if it does go through, there will be a demand for more electric generating facilities, all to be in Arizona, to satisfy the needs of the citizens of California. Let them build their own facilities and generate their own electricity. I understand this transmission line could also increase electric rates for myself and other citizens of Arizona while we would get no benefit. Vote NO on this proposal.
