“We agree with Staff’s recommendations and will adopt them, however,”

INSERT:

“We disagree with APS’ proposal to cap the system size to 10 kW. Furthermore, we believe that Staff’s recommended cap of 100 kW will not allow the market to sufficiently take advantage of more economical large-scale photovoltaic systems. Therefore, we agree with the Solar Advocates’ proposal to increase the cap on an individual system to 2 MW. We also disagree with APS’ proposal to cap the program at 15 MW. Rather, we believe that the cap on aggregate generation should be commensurate with the requirements contained in Decision No. 69217. Finally, we do not agree that “uncollected fixed costs” or “lost revenues” should be collected through the EPS or RES surcharge. Rather, we believe that the Company should be allowed to defer such costs and seek their recovery in its next general rate case.”

Make all conforming changes as necessary.
