Dear Mr. Yahner,

I am responding to your April 26 e-mail to Corporation Commission Chairman Mike Gleason in which you asked when APS will provide net metering for solar users.

In fact, APS has proposed a net metering option in APS' rate case that is currently pending before the Commission. To learn more about what APS has proposed, you may want to review the Recommended Opinion and Order (ROO) that the Administrative Law Judge (ALJ) recently prepared after considering all the testimony that was presented during the hearing phase in this case. You can view the ROO on the Commission's website by entering the APS rate case docket number (E-01345A-05-0816) in the "E-Docket" menu option (at the bottom of the home page). The ROO was docketed on April 27. The Net Metering discussion begins on page 86 of the ROO.

I would like to emphasize^{size} that the ROO is only a discussion of what various parties have proposed, and even though the ALJ has written it as if she is speaking for the Commission, the ROO is **NOT** the Commission's decision in this case; it is only the ALJ's recommendation for the Commission's consideration at a future meeting.

Kenneth C. Rozen
Advisor to Chairman Gleason
