POSITIVES FOR UNDERGROUND UTILITY

To Whom It May Concern: *Corporation Commission*

RECEIVED

47CS

In regard to the Underground Utility proposed for our Subdivision, I feel it would provide better service for the Electronic, Phone and Electrical Service. Also, it will be a safety feature, as you all know, we have high winds in our area and they would no longer be a detriment to the power lines.

Additionally, the ABSENCE of telephone poles would enhance the view for everyone.

To me, the Underground Utility is a "win-win", situation for every home owner. Concern, regarding the cost of installing and maintaining this UPGRADE to our community, should be minimal as the advantages outweigh the disadvantages
