**Subject:** Gold Canyon Sewer Co. - New Rates

Dear Mr. Gleason,

We just received a notification from your office of a 73% rate increase for the Gold Canyon Sewer Company. What were the audited results of your commission staff that supported a 73% increase in rates? Has this company been operating in a vacuum? How have they remained operational if their rates were so inadequate? Did their business plan not foresee infrastructural changes over the past ten years? Are they operating with such antiquated equipment that such a preposterous rate increase was necessary? Someone is blowing smoke and using mirrors in our judgment.

None of the current or past economic data that we have found, can justify such an increase in rates. A reasonable increase due to inflationary factors is mandated, but our research of utility rate increases over the past few years in no way justifies this type of increase. What evidence was presented to you and your commission to substantiate this increase? Someone has to stand up and ask tough questions and demand truthful answers.

Sincerely,  
Bill Marozas
