AZ CORP COMMISSION
DOCKET CONTROL

<http://www.cc.state.az.us/>

Concerning Jim Rhodes:

I spent some time this morning calling and writing each ACC Commissioner as well as the Director. I kept it simple.....I reminded them that we didn't want a dishonest developer controlling our water supply as with that control this county would be at his mercy and totally controlled by him! **He may control some of our powers that be but control of our water supply is the ONLY WAY that he will break this enlightened citizenship.**

Jim Rhodes has been hiding out these days and we recognize that strategic move. He hopes that everyone has forgotten that he is a corrupt developer and that crucial votes are still being pondered by many of the deciding entities. Although we (the general public) have not been as active recently concerning this issue **we still stand strong in asking the ACC to deny Rhodes the control over life sustaining water supplies he so desperately seeks.**

Nothing has changed in recent months. The facts are still out there concerning his deceptive ways. He bought and paid for **Erin Kenny** and she is still a key player in his organization. <http://www.lvrj.com/news/8242852.html> Ill share a little something that my Daddy always told me.. **"you are who you hang around with" ...bottom line.** Rhodes is a dishonest developer who does anything and everything he must (including payoffs to elected officials) to make the buck. He is raping this community of its water and its dignity> He will not stop until he has pumped us dry of both. **This community will then be giving him ANYTHING he wants for WATER!**

Take a moment to write a letter or call the ACC ASAP and send a copy to any and all media outlets that you communicate with!

Denise
