Subject: ICR Water Users Assn. Rate Case

Commissioner Mayes:

I was pleased to see you at the "hearing" yesterday and would like to express my appreciation to you for making the referenced case a priority. As you are probably aware there are several residents in our community who have been looking forward to this rate-making process to place in consideration a number of issues that we believe need to be addressed by the Commission.

Though not a central issue in the rate-making process, I firmly believe that the amount of fresh water that is being used to irrigate the Talking Rock Golf Course is truly inconsistent with the interests of area residents who are increasingly concerned about the adequacy of our water resources for human consumption. I firmly believe that the plans for and the approval of the Talking Rock Golf Course need to be reviewed for prudence in the face of increased population and the existing water resources in our area.

Thanks again to you and the Commission Staff for the excellent work that has been performed on this Case and look forward to a satisfactory resolution.

Best regards,

Jerome "Skip" Reid
