 Anthem, AZ. 85086

Pursuant to the Rules of Practice and Procedure of the Arizona Corporation Commission (Commission), the Distributed Energy Association of Arizona (DEAA) hereby moves to intervene in the above-captioned docket and, in support thereof, states as follows:

1. DEAA is an Arizona, member-based non-profit organization serving a diverse group of stakeholders in the broad area of on-site power generation and distributed energy. DEAA has been involved in proceedings before the Commission before and has been granted intervenor status in various dockets over the years. As part of this work, DEAA has represented many Arizona utility ratepayers and customers on energy issues.

2. DEAA's mission is to promote the efficient generation and use of distributed energy throughout Arizona. DEAA advocates for fair and reasonable pricing in the utility industry within the state and encourages the development of sustainable, clean and efficient power generation infrastructure. DEAA assists our members with the understanding and evaluation of various energy issues beyond on-site power, including but not limited to, energy efficiency, demand side management, energy management system development and renewable energy.

3. DEAA has appeared in rate proceedings before the Commission to provide professional testimony in many utility related issues, including but not limited to rate design, cost recovery mechanisms, portfolio diversity and development of standards.

4. Intervention by DEAA will not unduly broaden the issues or delay the proceeding, and DEAA has not ascertained the position(s) it will take in this proceeding.

5. DEAA requests that all pleadings, correspondence, discovery and other documents be served on the following:
