Docket No. E-01345A-07-0663

UNCS

Docket No. T-01846B-07-0663

To Whom It May Concern:

In regard to the Underground Utilities proposed for this area, I would like to voice my opinion.

After talking to a number of residents, and considering the advantages of having this type of facility installed, it seems like a very good plan.

Not only would the absence of the telephone poles and overhead wires enhance the beauty for each piece of property, it would also provide safety for the future.

High winds in this area have caused damage to our homes and property, and over time, the poles grow weak from wood erosion. The possibility of toppled poles and broken wires will be non-existent. It's to soon to state as a "matter of fact", but it is possible we could expect to lower are Home Owners Insurance Rates as well.

Not everyone is in agreement for this proposed upgrade and that is understandable, but considering the advantages over a long period of time, even those opposed would benefit from the decision to proceed with the construction.

I say let's just "git 'er done"!
