Subject: Fw: SW-02519A-06-0015 Gold Canyon Sewer Rehearing

Sir:

It has been stated, that Gold Canyon Sewer estimates, that each household on average puts approximately 450 gallons of affluence into their system daily. According to my statement from the Arizona Water Company for the period from April 2007 to March 2008 we used a total 62,700 gallons of water. If we subtract what we estimate is used to water our landscaping and other miscellaneous uses such as washing cars and changing water in our spa (approximately 14,000 gallons total), that leaves our affluence discharge at 48,700 gallons for the year or about 134 gallons a day. Even if we put all our water back into the system it would only be 172 gallons a day.

I would hope someone has contacted the Arizona Water Company and asked if they can estimate the average water usage for the area to see if it corresponds with what the Gold Canyon Sewer estimate.

Thanks

Howard Woodbridge
