AZ CORP COMMISSION  
DOCUMENT CONTROL

Dear Corporation Commission,

Please accept my comments on Docket No. E-00000A-99-0205. We are a Manufacturer of Wind Turbines in Flagstaff. We produce approximately 5 Million dollars worth of wind turbines annually. We ship 50% out of the country directly and 90% of the remainder out of state.

We request that any "Solar Portfolio Standard" specifically include wind turbine generators, and preferably include any non-polluting renewable. All of the non-polluting renewables are in the environmental, social, economic and security interest of the state and nation.

Please consider me, or another representative of Southwest Windpower as available for testimony regarding this issue.

Please also add our address to your mailing list.

Sincerely,

David G. Calley  
President  
Southwest Windpower
