Subject: APS MISMANAGEMENT OF RATEPAYERS FUNDS

August 6, 2008

Dear Honorable Members of the Arizona Corporation Commission:

On August 6, 2008, APS stuck a note in my front door stating that the meter would be changed between 7 am and 4 pm on 8/07/2008. The note was nearly pitched in the trash with the other junk door-hangers.

As a result of replacing this meter, APS will disrupt a dozen timed circuits, corrupt my wife's sensitive computer service work and possibly damage other electronic systems in the house.

But, the main issue is the arrogance and total neglect from APS towards their customers by giving only a few hours notice to disrupt living conditions and damage private property for absolutely no reason!

A NEW METER WAS JUST INTALLED BY APS 40 DAYS AGO ON JUNE 27, 2008!!!! TO REPLACE THIS METER AGAIN IS A BLATANT EXAMPLE OF THE COMPANY'S TYPICAL WASTE OF RATEPAYER'S FUNDS, NEGLECT OF SERVICE AND MISMANAGEMENT!!!

As members of the Arizona Corporation Commission, ask yourselves. Is a permanent or interim rate increase for APS justified? And, what are the benefits to the ratepayers of Arizona for an increase in revenue to an incompetent, spend-thrift and wasteful company?

Sincerely,

James C. Blosser
