Please do what you can to stop these incessant APS requests for rate increases. I am painfully aware of inflation since I am on a fixed income. I live in Sun City and, due to necessity, am extremely careful on how I spend my money. There have been so many increases in the last few years, I can't remember them all. I have done everything possible to reduce my energy consumption, but a few more dollars every month is nearly intolerable. Maybe APS needs to tighten their belts like most of us have found necessary. Thank you for your consideration.
