DOCUMENT CONTROL JM

Members of the ACC:

As a resident of Gilbert, I am writing you regarding my opposition to the expansion of the SRP plant at the corner of Val Vista and Warner in Gilbert.

Many arguments have taken place since the announcement went public. I am sure that many more will take place as this moves forward. I would like to simplify the debate. This project does not belong in a bedroom community. There will be homes, whose backyards back the proposed expansion. There are homes surrounding the project. This is an industrial plant that belongs in an industrial development.

Recently, there was a fire at a warehouse in Phoenix. The fire officials were quoted as saying that it is good thing that the fire took place in an industrial complex. The problem could have been worse. The fire took place at the end of the business day and the evacuations were minimal. That is just one of many examples why industrial plants, businesses and manufacturing facilities belong in a low populated, industrial zoned areas.

As citizens, we do not have the financial resources to do battle with companies like SRP. We are simple working class families. We rely on our elected officials to protect us in situations such as this. I ask on behalf of my community, my family, please say no the San Tan expansion. Encourage SRP to relocate the plant outside this or any town. Bury the lines, and keep the beauty and integrity of this state intact.

Sincerely

Eric L. Burton
