Subject: Groom Creek Water - Docket #W-01865A-07-0385

W-01865A-07-0384

I am writing you because I am a very concerned homeowner in Groom Creek. My address is 1114 Elk Trail. I have owned my cabin for 2 years and have not seen an increase in my water bills although I know that there are many repairs being done to our water system.

My concern is simple. If we don't support our water system and continue to accrue additional expenses, Groom Creek Water Users will go bankrupt and the Arizona Corporation Commission will have to take it over. The result will be even higher water bills.

I am sensitive to the fact that we have many homeowners on fixed incomes, but they can't be the only ones that are listened to in this matter.

We need to fund our water system so that the system can be replaced and we don't have breaks that are more expensive to repair.

Please help us. We need the corporation commission to approve the \$50 base rate immediately.

Thank you so very much for allowing me to contact you regarding this matter.

Dear Sir,

As a resident of Groom Creek I support the increase in our water rates to \$50.00 in order to properly fund the water system and its necessary upgrade. I urge your support of this matter.

Thank you for your consideration.

We are in favor of the Groom Creek water delivery system upgrade project & have no objection to the new base rate of \$50.

It is necessary in order to secure the funding to get a new system. The last leak we had on Silver King Cir. Is just an example of the need.

Thanks,

Subject: Groom Creek water users W-01865A-07-0385

Dear Commissioner Mayes,

My family owns a cabin in the Groom Creek area of Prescott AZ. My father built the cabin himself in the early '70's and now his grandchildren and great-grandchildren are enjoying the beautiful Groom Creek area.

Our water system is in urgent need of repair. I understand that in order to fix our system it will mean a large increase in our water rate.

In my way of thinking, the increased rate is better than no water system at all. At times the water has had to be shut off for repairs, and these repairs are going to be increasing in the months and years ahead. The longer we delay the more expensive the repairs are going to be.

Please reconsider your stand on this issue for **Docket # W-01865A-07-0385**. These repairs are needed and they are needed now. We are willing to pay the increased rates for these important repairs.

Thank you

Attention: Kristina Mayes

We are residents of Groom Creek Area - Prescott Arizona. We have lived here nearly 12 yrs, and seen many changes.

Both my husband, John S. Cree has been a former water board member and myself, Maria J Cree former board member. The water users assn. has been well taken care of repaired when necessary with few problems. Some very knowledgeable people were working for the company and taking care of the situation.

Granted, this water system is getting older but has been kept in "good repair".

The past 2 yrs. since the current board has taken over, all kinds of problems have arisen. It seems that a smaller rate increase is more acceptable and probably needed. It would be unreasonable

to plan on a complete replacement of the whole water system at one time.

It should only be done in phases as needed -

I'm a very concerned resident at this time. I feel so many retired home owners are elderly and on limited income. This will really be a very difficult burden on most residents today in this economic time.

Thank you for your consideration and for listening.

Sincerely,

John S. Cree
