OPEN MEETING AGENDA ITEM

From: William Kapfer [50chevyguy@cox.net]
Sent: Saturday, November 15, 2008 4:35 PM
To: Mayes-WebEmail
Subject: Tucson Elec Power

Greetings from Tucson. I have been wanting to post a message to all of you up there; but I don't see a place that includes all the emails. So please bear with me on this. I worked for TEP for 12 1/2 years and suffered thru different injuries over the years. So far most have been taken care of over this period. But I still have to go thru their insurance carrier Sedwick Insurance. It appears that it makes no difference that I had an operation and need another that they make me and my lawyer jump thru the hoops for no apparent reason other than to prelong the pain and suffering that I endure.

They spend lots of monies on both this carrier and the lawyers they sic on me everytime something comes up. That company has spent more to keep me from getting the attention I need than I receive in compensation. They throw thousands out to charity and around \$10,000 a year for TEP field that carries their name. If they wanted to save money and keep from having a big rate increase they should stop this hurtful practice against past employees for one.

Another is that fact that they should have gone to natural gas on all their trucks before now.

Please take all this into consideration on anything you give them. I'm fighting with them again now to reopen a case.

Have a great day and a better tomorrow.
