Dear Sirs;

We currently own a house in the Hillcrest Bay Mobile Manor. Our house is new construction and we have poles at the front corner and rear corner of our lot. These poles are to service the electric line into our house. As we are new, we have the old leaning ready to fall down pole at the rear of our lot and the new additional pole at the front to service our meter at the front of the house, as requested by APS. The rear poles are becoming every year more difficult to service, as new homes are built. The one at the rear of our lot should be replaced before it falls. The underground utilities would much improve the service. We feel it is the time to correct the wrong that was done in the 70's, when this development should have been underground. We were told during the construction of our house, by a supervisor at APS, that by law the utilities should have been underground when the project was originally developed, but by some untold means, the poles were placed instead. We understand this could be a financial problem for a few residents, but we also understand that there is a fund which many of us have contributed to, that would assist those who really need the help.

Please help us complete this underground utilities project while it is still affordable. Please help us be able to complete what the majority of the residents have voted for. Let's not adjudicate what was previously approved but popular vote.

Sincerely

Robert R Nielson

Lori L Nielson
