RECEIVED

Director of Utilities:

I am giving notice of intent to intervene on issues relating to the Salt River Project Application for a Certificate of Environmental Compatibility for its expansion of the San Tan Expansion Plant located in Gilbert, Arizona. I am a Gilbert resident and the former Secretary and Board member of the Rancho Cimarron HOA.

Respectfully submitted this 30th day of August 2000,

Constance L. Henson

Dear

2000 SEP 13 A 10:05

ARIZONA CORPORATION COMMISSION
RECEIVED
SEP 12 2000
Director of Utilities

I have been informed that SRP has filed for a permit for environmental compatibility in order to build three new power generators in Gilbert at Warner and Val Vista Roads. As a neighbor to the SanTan facility let me say that I support Citizens Opposed to SanTan in either halting this facility altogether or seriously limiting its size. I would ask the Arizona Corporation Commission to do an independent study into the need for more power in the Valley before granting any permit to SRP.

SRP has stated that they need 2700 new megawatts of power in order to meet future need. They have not proven that figure nor have they revealed where they will get this additional power since even with the SanTan expansion (825 new megawatts) they will still have a serious deficit. After they expand the Kyrene facility (250 megawatts) my understanding is that they will be short over 1600 megawatts. SRP told Tempe that without expanding the Kyrene facility (3 generators totaling 825 megawatts) there would be brownouts in the future. Knowing this, they then negotiated with Tempe to build a replacement plant to the current facility producing only 250 megawatts. They are now telling Gilbert residents the same thing. That if we do not build this facility we could be without air conditioning in summers to come. Since SRP hasn't revealed the whole picture we do not know if SanTan will actually solve this problem or not. I do not take the need lightly but if they will require building another facility outside of town in the coming years, I would ask the ACC to require that they build a larger facility there and bury the lines coming into town instead of building on a residential street. (Our homes are right across the street and some actually share a back wall with SRP's plant.)

I realize that SRP has owned their property for over 20 years however they were first allowed to build the SanTan plant when there was nothing but acreage and farmland here in Gilbert. In the last 5 years Gilbert has grown to over 100,000 people. We are already facing new pollution from all the new cars, new growth, the SanTan freeway just south of us, the expansion of the Williams Gateway Airport and the widening of the U.S. 60.

Since the closest air monitoring station is three miles away and upwind of the facility I would ask you, as a part of the Arizona Corporation Commission, to please withhold granting any permits to SRP until they have agreed to pay for an independent study into the air and environmental impact this plant would have on our community. I would also like to ask that COST be allowed to speak on my behalf at any and all hearings in regards to SanTan.

Thank you for your time and help in this regard.

Sincerely,

Rosemary + Vincent Savatieri

Dear Madam:

I attended an SRP public meeting on August 10, 2000. As you know, SRP is proposing to expand their electrical generation plant at Warner and Val Vista. This meeting had a very high turnout of residents. At this meeting, many Gilbert citizens expressed their concerns, frustrations, and anger. The people had many questions and valid ones. However, it was apparent limited data was available for the people to make an educated decision. I believe this process, if it continues like it is, will result in a similar fashion to the proposal for the State Fair in Gilbert; hostile. At this point, I do not believe the problem can be ignored. The people feel angry because they do not have answers to simple questions, answers which could have a huge impact on their quality of life. Currently, the process is what I consider a closed process. That is, the process does not let the public actively participate nor is there enough accurate information for the public to make a decision from unbiased data. SRP tells all of us citizens of Gilbert this is a good project and that the air pollution will be better with this project. I would like to agree with them, but I do not have enough information to agree.

It is very difficult for me and others to make a decision to support or not support the Santan-SRP Expansion project proposed in Gilbert. It is difficult because SRP has not been able to provide real data to support many of their claims. What data did you use to evaluate the project to make decisions? In order to evaluate this project, an alternatives analysis which depicts several options (i.e., different locations, different air pollution technologies, etc.) should be performed. The analysis needs to include environmental risks, economic, social, and other potential impacts for each alternative. This analysis document should model the federal NEPA Environmental Impact Statement (EIS) process. This process is being used for the SRP Kyrene station and needs to be used at this facility also. This analysis needs to be formal and unbiased. The public needs and deserves to have their questions answered in a formal comment and responses context. This document should be the basis for any decisions the City of Gilbert, Maricopa County Board of Supervisors, Arizona Corporate Commission or other permitting agencies make. Many questions still need answers. The unknown is a huge factor for fear. The questions people are asking, which SRP does not have answers to are simple ones like: how does the air emissions plume impact the immediate neighborhoods? In what direction does the emissions plume migrate based on prevailing wind directions? Should I be concerned for my health? Is it feasible to move the new plant to Power Road near the Williams Gateway Airport area or another southeast Gilbert location?

This project is an economic development proposal from SRP and the City of Gilbert has the responsibility to evaluate the alternatives and get unbiased answers to the citizens. I believe the City needs to partner with Gilbert citizens, SRP and a neutral consulting firm to develop a document which has all of the necessary answers to make informed decisions. I am confident if the analysis is done with public input, in the end, this will be a win-win project for both the City staff and elected officials, Gilbert citizens, and SRP.

I encourage and request that the City of Gilbert start a formal alternatives analysis with a study of environmental, economic, and social impacts. An open process will go a long way in building a better city and state. The bulldozer approach needs to stop.

Re: SRP's application for a Certificate of Environmental Compatibility to expand their Santan Generating Station in Gilbert, Committee Case No. 105

Dear Mr. Bullis:

As a major employer in the east Valley, Cerprobe Corporation supports SRP's plans for expanding its Santan Generating Station in Gilbert and urges your Committee to take favorable action on SRP's Santan application at your September 14 hearing.

We are convinced that additional generating capacity will be needed soon to meet the east Valley's continued growth. Speedy construction of an 825-megawatt gas-fired combined-cycle plant at the Santan will provide an economically practical and environmentally compatible means of meeting the region's mounting electricity demands. While having a reliable supply of affordably priced electricity is important to Cerprobe, we recognize that ensured electric supply also is important to our employees, their families and the overall economy of East Valley. The technology proposed for Santan project would appear to offer a good solution to local electric supply-and-demand challenges, until such time as additional electric resources can be made be available.

Cerprobe is a recognized world leader in the design and manufacture of semiconductor test interconnect solutions. The Company offers products and integrated systems for wafer and IC package testing. Cerprobe markets and distributes its products and systems worldwide, and operates domestic manufacturing facilities in Arizona, California, and Texas and international manufacturing facilities in France, Scotland, Taiwan, and Singapore. Local customers include Motorola, Intel, and Microchip Technology. Cerprobe has maintained its headquarters in the east Valley for more than twenty years, moving from Tempe to Gilbert in 1997. Cerprobe currently employs approximately 250 people in Gilbert; most local employees reside with their families in the east Valley. Additional information about Cerprobe is available at www.cerprobe.com.

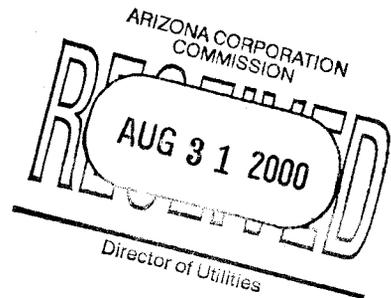

Respectfully,

Paul R. Tullis
Vice President, Worldwide Facilities

2000 SEP 13 A 10:05

Dear Sir/Madam:

AZ CORP COMMISSION
DOCUMENT CONTROL

L-00000B-20-0105

I would like you to know that I am concerned about my family's future, health and quality of life since I live near SRP's SanTan plant here in Gilbert. I also support CITIZENS OPPOSED TO SANTAN (COST) and have asked them to speak for me.

I believe that there are many other alternatives to expanding at SanTan, even if they are not as "cost effective". I would ask the ACC and the Power Plant and Transmission Line Siting Committee to look into these options before allowing any hearing or permit. I feel that SRP is trying to build this plant without true community input or involvement. I believe that their public process is largely for show and that they are not listening to what is best for our neighborhood. They are willing to listen to suggestions about trees and screening and where on the property the new plants will be located but not whether or not this expansion will be destructive to our neighborhood or property values. None of the SRP or EPG representatives live across the street from this plant as I do. They have also failed to tell me or my neighbors specific information about possible impacts this plant would have on my health or home in any of their mailers.

I realize that SRP has a need for power. I do not believe that I should unfairly bear the burden of this need although I am willing to do my share. This is especially true if SRP intends to sell this power (or use it in town in order to see the power generated from their other coal-burning plants outside of town). I strongly oppose risking my family's health or my property value so SRP can make money. My understanding is that SRP has sold, and will continue to sell, power for profit on the open market whenever it is lucrative to do so even if that means more pollution and noise for those of us in Gilbert - 24/7, year-round. What about the negative impact these huge 15 story tall - very visible smoke stacks will have to us nearby.

Please do what you can to protect our environment, schools, and home values in the affected vicinity of Warner and Val Vista! We love our community and home but feel powerless in the face of an industry giant who wants to destroy what we have worked so hard for. I would also like you to please allow COST to speak on my behalf at any and all meetings in regards to this SanTan expansion. Thank you for helping to protect our future.

Phoenix, AZ 85007

Dear Steve Olea,

L-00000B-00-0105

Subject: Santan Power Plant

I am writing this letter to voice my concerns about the SRP Santan Power Plant expansion. From what I understand, SRP is considering the Val Vista & Warner site as possible grounds to build a new Power Plant which will include three smoke stacks fifteen stories high, six new industrial steam stacks and three 90 x 100 ft. heat recovery steam generators.

Please understand I am not against the building of the Power Plant. I feel a new Power Plant in/for the Gilbert area would be very beneficial in many aspects from job openings to covering the power demands the rapidly growing City of Gilbert is producing.

However, I am very much against building this Power Plant in such a residential area. Because there are so many other options for the building of the Santan Power Plant, it is not apparent to me why a residential area such as Val Vista & Warner is even being considered.

I also do not understand why the City or SRP do not seem more concerned for the health and well being of the residents of this community! The health issues the Power Plant will cause should be obvious to anyone. It should also be obvious who will suffer the most from the pollution this Power Plant will put off so close to our homes... the children!

As well as health issues, there are also many other negative reasons for such a Power Plant to be built in this residential area. As a one-year resident and recent new homeowner in the Gilbert area, I am very concerned about the investment I have made in my home and property. Who will want to buy a house that has a view of the SRP smoke stacks? I am fearful of how much our home value will drop, as our home is so close to this area. There have also been issues raised as to the affects the Power Plant will have on the water supply. I'm sure there are preventative measures to ensure water supply safety, but it seems it would be more difficult and risky to prevent water pollution in an area that has already been so heavily built on.

I hope you can see the seriousness of these issues, and what they mean to the residents of the Gilbert community. Again I would like to state that I am not against the Power Plant being built - I am against the Power Plant being built in such a residential area like Val Vista & Warner.

Thank you for taking the time to read this letter, and for having an open ear to the concerns of the community. If you would like to contact me, I can be reached at (602) 510-0175 or you can write to me at: Alexandra Prince, 621 East Eagle Lane, Gilbert, AZ 85296.

Sincerely,

A handwritten signature in cursive script that reads "Alexandra Prince".

We are already facing new pollution from all the new cars, new growth, the San Tan Freeway just south of us, the expansion of the Williams Gateway Airport and the widening of US 60.

Since the closest air monitoring station is three miles away and upwind of the facility I would ask you, as a part of the Arizona Corporation Commission, to please withhold granting any permits to SRP until they have agreed to pay for an independent study into the air and environmental impact this plant would have on our community. I would also like to ask that COST be allowed to speak on my behalf at any and all hearings in regards to the San Tan expansion. Thank you for your time in this regard.

Dear Sir/Madam:

AZ CORP COMMISSION
DOCUMENT CONTROL

I would like you to know that I am concerned about my family's future, health and quality of life since I live near SRP's SanTan plant here in Gilbert. I also support CITIZENS OPPOSED TO SANTAN (COST) and have asked them to speak for me.

I believe that there are many other alternatives to expanding at SanTan, even if they are not as "cost effective". I would ask the ACC and the Power Plant and Transmission Line Siting Committee to look into these options before allowing any hearing or permit. I feel that SRP is trying to build this plant without true community input or involvement. I believe that their public process is largely for show and that they are not listening to what is best for our neighborhood. They are willing to listen to suggestions about trees and screening and where on the property the new plants will be located but not whether or not this expansion will be destructive to our neighborhood or property values. None of the SRP or EPG representatives live across the street from this plant as I do. They have also failed to tell me or my neighbors specific information about possible impacts this plant would have on my health or home in any of their mailers.

I realize that SRP has a need for power. I do not believe that I should unfairly bear the burden of this need although I am willing to do my share. This is especially true if SRP intends to sell this power (or use it in town in order to see the power generated from their other coal-burning plants outside of town). I strongly oppose risking my family's health or my property value so SRP can make money. My understanding is that SRP has sold, and will continue to sell, power for profit on the open market whenever it is lucrative to do so even if that means more pollution and noise for those of us in Gilbert - 24/7, year-round. What about the negative impact these huge 15 story tall - very visible smoke stacks will have to us nearby.

Please do what you can to protect our environment, schools, and home values in the affected vicinity of Warner and Val Vista! We love our community and home but feel powerless in the face of an industry giant who wants to destroy what we have worked so hard for. I would also like you to please allow COST to speak on my behalf at any and all meetings in regards to this SanTan expansion. Thank you for helping to protect our future.

August 15, 2000

2000 SEP 13 A 10: 12

Dear Sir/Madam:

Please note that I live in Gilbert near the proposed "San Tan" power plant expansion that SRP is now looking to expand to four times its original size. When I first moved into the neighborhood, I accepted living near the current facility as it only ran 10-20% of the time and was largely hidden. However, this area of Gilbert is now home to eight schools and over 20,000 residents. It is not an industrial area fit for a plant with more generation than the Hoover Dam, but rather a bedroom community. Unlike the Tempe Kyrene plant, there is no heavy industry in Gilbert to speak of. The vast majority of people moved to Gilbert (and chose to pay the highest property taxes in the Valley) because they do not want to live in an industrial area with the noise and pollution and sheer ugliness that industry brings.

SRP has not paid to have an independent air or environment impact study done by the town or by COST. We do not know what impact this plant will have on our lives, our children's lives or the value of our homes. You should know that many of us have paid thousands of dollars in recent years to move, to furnish our new homes and landscape our yards. Now we are stuck. SRP could have upgraded this facility 5 years ago before our homes were built. They did not do so. Please do not let them do so now that over 20,000 people live across and just down the street.

Please note that if you allow SRP to build this plant, it will set a precedent for years to come. In the last two months well over 1,500 local residents have signed petitions against SRP and this plant. It is not wanted here. SRP has not involved this community in their decision-making process and their select Community Working Group was not elected. I do not accept their decision or opinion as representing my community or me. My HOA Board was not on this Community Working Group nor were they consulted by SRP. What's more, SRP is now involved in popular "slam-polling" telemarketing to "prove" area acceptance of this facility rather than negotiating with those of us who have serious concerns for our families and property values.

I would ask you, as a part of the Arizona Corporation Commission to please withhold granting any permits to SRP until the communities affected have had an opportunity to negotiate with SRP in regards to where this power plant is sited, it's ultimate size and it's effect on the community. I would also like to ask that COST be allowed to speak on my behalf at any and all hearings in regards to San Tan. Thank you for your time and help in this regard.

Dear Sir/Madam:

I have been informed that SRP has filed for a permit of Environmental Compatibility in order to build three new power generators in Gilbert at Warner and Val Vista Roads. As a neighbor to the San Tan Facility, let me say that I support Citizens Opposed to San Tan in either halting this facility altogether or seriously limiting its size. I would ask the Arizona Corporate Commission to do an independent study into the need for more power in the Valley before granting any permit to SRP.

SRP has stated that they need 2700 new megawatts of power in order to meet future needs. They have not proven that figure nor have they revealed where they will get this additional power since even the San Tan expansion (825 new megawatts) they will still have a serious deficit. After they expand the Kyrene facility (250 megawatts) my understanding is that they will be short over 1600 megawatts. SRP told Tempe that without expanding the Kyrene facility (3 generators totaling 725 megawatts) there would be brownouts in the future. Knowing this, they then negotiated with Tempe to build a replacement plant to the current facility producing only 250 megawatts. They are now telling Gilbert residents the same thing. That if we do not build this facility we could be without air conditioning in summers to come. Since SRP hasn't revealed the whole picture, we do not know if San Tan will actually solve this problem or not. I do not take the need lightly but if they will require building another facility outside of town in the coming years, I would ask the ACC to require that they build a larger facility there and bury the lines coming into town instead of building on a residential street. (Our homes are right across the street and some actually share a back wall with SRP's plant).

I realize that SRP has owned their property for over 20 years, however they were first allowed to build the San Tan plant when there was nothing but acreage and farmland in Gilbert. In the last five years Gilbert has grown to over 100,000 people. We are already facing new pollution from all the new cars, new growth, the San Tan Freeway just south of us, the expansion of the Williams Gateway Airport and the widening of US 60.

Since the closest air monitoring station is three miles away and upwind of the facility I would ask you, as a part of the Arizona Corporation Commission, to please withhold granting any permits to SRP until they have agreed to pay for an independent study into the air and environmental impact this plant would have on our community. My understanding is that SRP has sold, and will continue to sell, power for profit on the open market whenever it is lucrative to do so even if that means more pollution and noise for those of us in Gilbert - 24/7, year-round. What about the negative impact these huge 15 story tall - very visible smoke stacks will have to us nearby.

Please do what you can to protect our environment, schools, and home values in the affected vicinity of Warner and Val Vista! We love our community and home but feel powerless in the face of an industry giant who wants to destroy what we have worked so hard for. I would also like you to please allow COST to speak on my behalf at any and all meetings in regards to this SanTan expansion. Thank you for helping to protect our future.

Docket # ~~LR-000000B~~ 00-8105

Director of Utilities

Dear Steve Olea:

I would like you to know that I am concerned about my family's future, health and quality of life since I live near SRP's SanTan plant here in Gilbert. I also support CITIZENS OPPOSED TO SANTAN (COST) and have asked them to speak for me.

I believe that there are many other alternatives to expanding at SanTan, even if they are not as "cost effective". I ask the ACC and the Power Plant and Transmission Line Siting Committee to look into these options before allowing any hearing or permit. SRP admits that they will need to build additional facilities in the very near future—even with expanding San Tan—but they have not announced where or when. I do not take the need lightly but if they will require building another facility outside of town in the coming years, I would ask the ACC to require that they build a larger facility there and bury the lines coming into town instead of building on a residential street.

I feel that SRP is trying to build this plant without true community input or involvement. I believe that their public process is largely for show and that they are not listening to what is best for our neighborhood. They are willing to listen to suggestions about trees and screening and where on the property the new plants will be located but not whether or not this expansion will be destructive to our neighborhood or property values. None of the SRP or EPG representatives live across the street from this plant as I do. They have also failed to tell me or my neighbors specific information about possible impacts this plant would have on my health or home in any of their mailers.

I realize that SRP has a need for power. I do not believe that I should unfairly bear the burden of this need although I am willing to do my share. This is especially true if SRP intends to sell this power (or use it in town in order to see the power generated from their other coal-burning plants outside of town). I strongly oppose risking my family's health or my property value so SRP can make money. My understanding is that SRP has sold, and will continue to sell, power for profit on the open market whenever it is lucrative to do so even if that means more pollution and noise for those of us in Gilbert - 24/7, year-round. What about the negative impact these huge 15 story tall - very visible smoke stacks will have to us nearby.

Please do what you can to protect our environment, schools, and home values in the affected vicinity of Warner and Val Vista! We love our community and home but feel powerless in the face of an industry giant who wants to destroy what we have worked so hard for. I would also like you to please allow COST to speak on my behalf at any and all meetings in regards to this SanTan expansion. Thank you for helping to protect our future.
