Dear Sir/Madam:

Please note that I live in Gilbert near the proposed "San Tan" power plant expansion that SRP is now looking to expand to four times its original size. When I first moved into the neighborhood, I accepted living near the current facility as it only ran 10-20% of the time and was largely hidden. However, this area of Gilbert is now home to eight schools and over 20,000 residents. It is not an industrial area fit for a plant with more generation than the Hoover Dam, but rather a bedroom community. Unlike the Tempe Kyrene plant, there is no heavy industry in Gilbert to speak of. The vast majority of people moved to Gilbert (and chose to pay the highest property taxes in the Valley) because they do not want to live in an industrial area with the noise and pollution and sheer ugliness that industry brings.

SRP has not paid to have an independent air or environment impact study done by the town or by COST. We do not know what impact this plant will have on our lives, our children's lives or the value of our homes. You should know that many of us have paid thousands of dollars in recent years to move, to furnish our new homes and landscape our yards. Now we are stuck. SRP could have upgraded this facility 5 years ago before our homes were built. They did not do so. Please do not let them do so now that over 20,000 people live across and just down the street.

Please note that if you allow SRP to build this plant, it will set a precedent for years to come. In the last two months well over 1,500 local residents have signed petitions against SRP and this plant. It is not wanted here. SRP has not involved this community in their decision-making process and their select Community Working Group was not elected. I do not accept their decision or opinion as representing my community or me. My HOA Board was not on this Community Working Group nor were they consulted by SRP. What's more, SRP is now involved in popular "slam-polling" telemarketing to "prove" area acceptance of this facility rather than negotiating with those of us who have serious concerns for our families and property values.

I would ask you, as a part of the Arizona Corporation Commission to please withhold granting any permits to SRP until the communities affected have had an opportunity to negotiate with SRP in regards to where this power plant is sited, it's ultimate size and it's effect on the community. I would also like to ask that COST be allowed to speak on my behalf at any and all hearings in regards to San Tan. Thank you for your time and help in this regard.

Carl J. Kunasek, Chairman
Arizona Corporation Commission
1200 West Washington
Phoenix AZ 85007-2996

Dear Mr. Kunasek:

We have been informed that SRP has filed for a permit of Environmental Compatibility in order to build three new power generators in Gilbert at the San Tan Facility located at Warner and Val Vista Roads. As a neighbor to the San Tan Facility, let me say that I support Citizens Opposed to San Tan (COST) in either halting this facility altogether or seriously limiting its size. We ask the Arizona Corporation Commission to do an independent study into the need for more power in the Valley before granting any permits to SRP.

SRP has stated that they need 2700 new megawatts of power in order to meet future needs. They have not proven that figure, nor have they revealed where they will get this additional power, since even with the San Tan expansion (825 new megawatts), they will still have a serious deficit. After the expansion of the Kyrene facility in Tempe (250 megawatts), our understanding is that they will be short over 1600 megawatts. SRP told Tempe that without expanding the Kyrene facility (3 generators totaling 725 megawatts) there would be brownouts in the future. Knowing this, they then negotiated with Tempe to build a replacement plant to the current facility producing only 250 megawatts. They are now telling Gilbert residents the same thing, that if we do not build this facility we could be without air conditioning in summers to come. Since SRP hasn't revealed the whole picture, we do not know if the San Tan expansion will actually solve this problem or not. We do not take the need lightly, but if they will require building another facility outside of town in the coming years, we ask the ACC to require that they build a larger facility there and bury the lines coming into town instead of building on a residential street. Our home is located across the street from the plant, and some homes in the area actually share a back wall with the SRP facility.

We realized that SRP has owned their property for over 20 years, however they were first allowed to build the current San Tan plant when there was nothing but acreage and farmland in Gilbert. In the last five years, Gilbert has grown to over 100,000 people. We are already facing new pollution from all the new cars, new growth, the San Tan Freeway just south of us, the expansion of the Williams Gateway Airport and the widening of U.S. 60.

Since the closest air monitoring station is three miles away and upwind of this facility, we ask you, as part of the Arizona Corporation Commission, to please withhold granting any permits to SRP until they have agreed to pay for an independent study into the air and environmental impact this plant would have on our community. Thank you for your time in this regard.

Yours truly,

Phoenix, AZ 85007-2996

Dear Commissioner Kunasek:

No SRP representative has come to our door asking our opinion of the proposed SRP generating plant expansion a mile from our home, but we would like you to know that we manifestly OBJECT to such a proposal. When we purchased our home, no mention was ever made that such a monster could or would be added to our community.

Our family is not only concerned about the size of the plant and the loss of property values, but we know there are health risks associated with ELECTRO-MAGNETIC FIELDS and our exposure to them. Studies are beginning to show increased risks of conditions as serious as leukemia and cancer with this level 10 EMF exposure.

A generating plant of this enormous size does not belong in a residential area!! Please exercise your authority to see that SRP does the right thing and builds outside all city limits.

We would appreciate your response to our plea.

Sincerely,

Jess + Vickie Savory

RE: Docket No. L00000B-00-0105

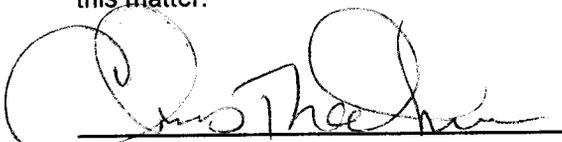

Dear Mr. Kunasek:

I have been informed that SRP has filed for a Certificate of Environmental Compatibility in order to build three new power generators in Gilbert at Warner and Val Vista Roads. As a neighbor to the Santan Facility, I support Citizens Opposed to Santan in either halting this facility altogether or seriously limiting its size. I request that the Arizona Corporation Commission require an independent study into the need for more power in the Valley before granting any permit to SRP.

SRP has stated that they need 2700 new megawatts of power in order to meet future needs. They have not proven that figure nor have they revealed where they will get this additional power since even after the Santan expansion (825 new megawatts) they will still have a serious deficit. Upon expansion of the Kyrene facility (250 megawatts) they will be short over 1600 megawatts. SRP told Tempe that without expanding the Kyrene facility (3 generators totaling 725 megawatts) there would be brownouts in the future. Knowing this, they then negotiated with Tempe to build a replacement plant to the current facility producing only 250 megawatts. They are now telling Gilbert residents the same thing - that if we do not build this facility we could be without air conditioning in summers to come. Since SRP hasn't presented the whole picture, we do not know if Santan will actually solve this problem or not. If they will need to build another facility outside of town in the coming years, I would ask the ACC to require that they build a larger facility there now and bury the lines coming into town instead of building on a residential street. Many homes are right across the street and some actually share a back wall with SRP's plant.

I realize that SRP has owned their property for over 20 years, however they were first allowed to build the Santan plant when there was nothing but acreage and farmland in Gilbert. In the last five years Gilbert has grown to over 100,000 people. We are already facing increased pollution from all the new cars, new growth, the San Tan Freeway just south of us, the expansion of the Williams Gateway Airport and the widening of US 60.

Since the closest air monitoring station is three miles away and upwind of the facility, I would ask the Arizona Corporation Commission to please withhold granting any permits to SRP until they have agreed to pay for an independent study into the air and environmental impact this plant would have on our community. I would also like to ask that COST be allowed to speak on my behalf at any and all hearings in regards to the Santan expansion. Thank you for your attention in this matter.

RE: Docket No. L00000B-00-0105

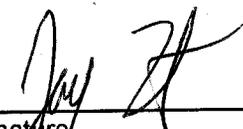

Dear Mr. Kunasek:

I have been informed that SRP has filed for a Certificate of Environmental Compatibility in order to build three new power generators in Gilbert at Warner and Val Vista Roads. As a neighbor to the Santan Facility, I support Citizens Opposed to Santan in either halting this facility altogether or seriously limiting its size. I request that the Arizona Corporation Commission require an independent study into the need for more power in the Valley before granting any permit to SRP.

SRP has stated that they need 2700 new megawatts of power in order to meet future needs. They have not proven that figure nor have they revealed where they will get this additional power since even after the Santan expansion (825 new megawatts) they will still have a serious deficit. Upon expansion of the Kyrene facility (250 megawatts) they will be short over 1600 megawatts. SRP told Tempe that without expanding the Kyrene facility (3 generators totaling 725 megawatts) there would be brownouts in the future. Knowing this, they then negotiated with Tempe to build a replacement plant to the current facility producing only 250 megawatts. They are now telling Gilbert residents the same thing - that if we do not build this facility we could be without air conditioning in summers to come.
