Office of the Attorney General
1275 W. Washington Street, Phoenix, AZ 85007

January 25, 2001

Re: Arizona Corporation Commission Power Plant and Line Siting Committee

Docket number: 105
SRP SanTan Application For Certificate of Environmental Compatibility

Dear Mr Bullis:

As per the suggestion of the Line Siting Committee a public meeting was held in Gilbert on January 16, 2001 from 7:00pm-9:00pm at the Gilbert Public Library regarding SanTan and conditions residents would ask the Committee to consider. There were approximately 100 attendees and 60 or so responses.

This meeting was advertised in all three newspapers letting members of the community know that they could give input to the ACC prior to a final decision being rendered regarding SRP's application to expand SanTan at ValVista and Warner.

These public responses are now being forwarded to you to consider prior to the January 26 hearing and for consideration at that time.

Thank you.

Mark Sequeira,
on behalf of COST, Intervenors, HOAs and concerned residents of Gilbert

COMMUNITY MEETING FEEDBACK - 1/16/01: Although I still oppose any version of the SanTan Power Plant Expansion, please impose these conditions to SRP upon any form of permit approval. (Check any of the sample conditions below that you may agree with and/or add your own).

- A \$50 million trust fund is established by SRP to be administered by a court appointed trustee to cover any loss in property values that residents have within a specific radius. The interest from the fund should be accrued by the fund - not SRP.
- A \$20 million fund be set up to be administered by a court appointed trustee to cover any health issues that residents have within a 2 mile radius. The interest from the fund should be accrued by the fund - not SRP.
- No additional power lines are added to our area.
- Have SRP clean the arsenic and any other dangerous chemicals from the water before it is dispensed into the canals.
- Mandate that the plant be shut down on high pollutant days.
- All of the homes within a specific radius should have their electric bills reduced by 50% for as long as the expanded plant is operational.
- A minimum of three mailers is sent to all Gilbert residents identifying the true details of the expansion, approved in advance by COST.
- Deliver a post-construction property value study from an area elsewhere in the USA where a similar expansion has taken place in a residential neighborhood.
- Require SRP to fund an independent air and water quality study. COST to choose the company.
- Require SRP to install additional air monitoring stations in the immediate area.
- Require that the mitigation efforts begin now so that some vegetation growth will have taken place before the stacks are erected. COST to be part of the mitigation efforts.
- Form a Community Working Group that will include COST members, local residents, and Board members from local HOA's.
- Build a significant barrier around the existing gas metering station to protect against explosion from accidental auto impact on Warner Road.
- Get an independent health impact study from medical professionals funded by SRP but chosen by COST.
- Any plants should be required to run in such a way that it is not audible, visible, or a risk beyond the plant boundaries as required by Code.
- Require exact pollution offsets to be set prior to permit of any application.
- Have SRP and/or Town of Gilbert fund an independent gas pipeline safety study regarding the proximity to the homes along Warner Road.
- Require that the pipelines be installed at the furthest S.E. area of the property.
- Request and display to the public a "to-scale" Diorama model of the camouflage/mitigation efforts to more visually depict the stack and smoke visibility after the project is completed.
- Have SRP buy all homes within a 1-mile radius at fair market value so that they can be demolished and a safety buffer zone created.
- Reduce visual effect of vapor clouds and explain why there has been intermittent burning of diesel fuel.
- Develop guidelines for upkeep of the property.

- Develop guidelines for upkeep of the property.

* *All of the above conditions should be imposed however, the approval of this expansion is outrageous and unreasonable. SRP is clearly the enemy of humanity and obviously is more interested in dollars than public health and property values.*

COMMUNITY MEETING FEEDBACK - 1/16/01: Although I still oppose any version of the SanTan Power Plant Expansion, please impose these conditions to SRP upon any form of permit approval. (Check any of the sample conditions below that you may agree with and/or add your own).

- A \$50 million trust fund is established by SRP to be administered by a court appointed trustee to cover any loss in property values that residents have within a specific radius. The interest from the fund should be accrued by the fund - not SRP.
- A \$20 million fund be set up to be administered by a court appointed trustee to cover any health issues that residents have within a 2 mile radius. The interest from the fund should be accrued by the fund - not SRP.
- No additional power lines are added to our area.
- Have SRP clean the arsenic and any other dangerous chemicals from the water before it is dispensed into the canals.
- Mandate that the plant be shut down on high pollutant days.
- All of the homes within a specific radius should have their electric bills reduced by 50% for as long as the expanded plant is operational.
- A minimum of three mailers is sent to all Gilbert residents identifying the true details of the expansion, approved in advance by COST.
- Deliver a post-construction property value study from an area elsewhere in the USA where a similar expansion has taken place in a residential neighborhood.
- Require SRP to fund an independent air and water quality study. COST to choose the company.
- Require SRP to install additional air monitoring stations in the immediate area.
- Require that the mitigation efforts begin now so that some vegetation growth will have taken place before the stacks are erected. COST to be part of the mitigation efforts.
- Form a Community Working Group that will include COST members, local residents, and Board members from local HOA's.
- Build a significant barrier around the existing gas metering station to protect against explosion from accidental auto impact on Warner Road.
- Get an independent health impact study from medical professionals funded by SRP but chosen by COST.
- Any plants should be required to run in such a way that it is not audible, visible, or a risk beyond the plant boundaries as required by Code.
- Require exact pollution offsets to be set prior to permit of any application.
- Have SRP and/or Town of Gilbert fund an independent gas pipeline safety study regarding the proximity to the homes along Warner Road.
- Require that the pipelines be installed at the furthest S.E. area of the property.
- Request and display to the public a "to-scale" Diorama model of the camouflage/mitigation efforts to more visually depict the stack and smoke visibility after the project is completed.
- Have SRP buy all homes within a 1-mile radius at fair market value so that they can be demolished and a safety buffer zone created.
- Reduce visual effect of vapor clouds and explain why there has been intermittent burning of diesel fuel.
- Develop guidelines for upkeep of the property.

SALT RIVER PROJECT, OR THEIR ASSIGNEE (S),
IN CONFORMANCE WITH THE REQUIREMENTS
THE ARIZONA REVISED STATUTES 40-360.03
AND 40-360.06 FOR A CERTIFICATE OF
ENVIRONMENTAL COMPATIBILITY
AUTHORIZING THE CONSTRUCTION
OF NATURAL GAS-FIRED, COMBINED
CYCLE GENERATING FACILITIES AND
ASSOCIATED INTRAPLANT TRANSMISSION LINES,
SWITCHYARD IN GILBERT, ARIZONA LOCATED
NEAR AND WEST OF THE INTERSECTION OF
VAL VISTA DRIVE AND WARNER ROAD

CASE #105
DOCKET NO. L-00000B-105

After the Arizona Corporation Commission Power Plant and Line Siting Committee hearing and closing arguments, I am opposed to SRP expanding the SanTan site since it would risk harming our community while not solving our long term power problems. I also believe that the record shows that there are other solutions to our power needs such as the ACC's recommendation to upgrade the current transmission system to better utilize SRP's surplus power outside the Valley.

SRP should be held to the same standard as APS and other industrial plants in seeking a Certificate of Environmental Compatibility. It does not have the support of the community and if it cannot pass the current standards and codes of the Town of Gilbert, it is not compatible and should be rejected.

PLEASE DENY THIS APPLICATION.

IN THE MATTER OF THE APPLICATION OF
SALT RIVER PROJECT, OR THEIR ASSIGNEE (S),
IN CONFORMANCE WITH THE REQUIREMENTS
THE ARIZONA REVISED STATUTES 40-360.03
AND 40-360.06 FOR A CERTIFICATE OF
ENVIRONMENTAL COMPATIBILITY
AUTHORIZING THE CONSTRUCTION
OF NATURAL GAS-FIRED, COMBINED
CYCLE GENERATING FACILITIES AND
ASSOCIATED INTRAPLANT TRANSMISSION LINES,
SWITCHYARD IN GILBERT, ARIZONA LOCATED
NEAR AND WEST OF THE INTERSECTION OF
VAL VISTA DRIVE AND WARNER ROAD

CASE #105
DOCKET NO. L-00000B-105

After the Arizona Corporation Commission Power Plant and Line Siting Committee hearing and closing arguments, I am opposed to SRP expanding the SanTan site since it would risk harming our community while not solving our long term power problems. I also believe that the record shows that there are other solutions to our power needs such as the ACC's recommendation to upgrade the current transmission system to better utilize SRP's surplus power outside the Valley.

SRP should be held to the same standard as APS and other industrial plants in seeking a Certificate of Environmental Compatibility. It does not have the support of the community and if it cannot pass the current standards and codes of the Town of Gilbert, it is not compatible and should be rejected.

PLEASE DENY THIS APPLICATION.

VAL VISTA DRIVE AND WARNER ROAD

CASE #105
DOCKET NO. L-00000B-105

After the Arizona Corporation Commission Power Plant and Line Siting Committee hearing and closing arguments, I am opposed to SRP expanding the SanTan site since it would risk harming our community while not solving our long term power problems. I also believe that the record shows that there are other solutions to our power needs such as the ACC's recommendation to upgrade the current transmission system to better utilize SRP's surplus power outside the Valley.

SRP should be held to the same standard as APS and other industrial plants in seeking a Certificate of Environmental Compatibility. It does not have the support of the community and if it cannot pass the current standards and codes of the Town of Gilbert, it is not compatible and should be rejected.

PLEASE DENY THIS APPLICATION.

Resident of Gilbert for how many years?

IN THE MATTER OF THE APPLICATION OF
SALT RIVER PROJECT, OR THEIR ASSIGNEE (S),
IN CONFORMANCE WITH THE REQUIREMENTS
THE ARIZONA REVISED STATUTES 40-360.03
AND 40-360.06 FOR A CERTIFICATE OF
ENVIRONMENTAL COMPATIBILITY
AUTHORIZING THE CONSTRUCTION
OF NATURAL GAS-FIRED, COMBINED
CYCLE GENERATING FACILITIES AND
ASSOCIATED INTRAPLANT TRANSMISSION LINES,
SWITCHYARD IN GILBERT, ARIZONA LOCATED
NEAR AND WEST OF THE INTERSECTION OF
VAL VISTA DRIVE AND WARNER ROAD

CASE #105
DOCKET NO. L-00000B-105

After the Arizona Corporation Commission Power Plant and Line Siting Committee hearing and closing arguments, I am opposed to SRP expanding the SanTan site since it would risk harming our community while not solving our long term power problems. I also believe that the record shows that there are other solutions to our power needs such as the ACC's recommendation to upgrade the current transmission system to better utilize SRP's surplus power outside the Valley.

SRP should be held to the same standard as APS and other industrial plants in seeking a Certificate of Environmental Compatibility. It does not have the support of the community and if it cannot pass the current standards and codes of the Town of Gilbert, it is not compatible and should be rejected.

PLEASE DENY THIS APPLICATION.
