DOCUMENT CONTROL

February 1, 2001

Chairman Paul Bullis
Arizona Corporation Commission Power Plant and Line Siting Committee
Phoenix, Arizona

Dear Mr. Bullis,

I am writing to register my support for the proposed San Tan Power Plant expansion. I live near Greenfield and Williams Field approximately 1.5 miles southeast of the power plant, where I have lived for the past 21 years. The power plant has been a fixture in our community for many years and is a necessary and vital part of our need for dependable and affordable electrical power. It was part of the landscape of Gilbert long before any of the current residents who live around the plant and who oppose the plant expansion ever considered moving here. It was there when they came out to shop for their new homes and to view the neighborhoods. Now that they are comfortably settled into their new residences, they have decided that their needs for more power must come from somewhere other than the area they populated even though they themselves have created the need for more power generation.

The economical and plentiful water and power resources of Central Arizona were developed by farsighted and visionary people who could see past tomorrow and invested for their children's future. SRP has been at the forefront of this group and has been a leader in protecting our state from water and power shortages while at the same time minimizing the impact on the local environment. The very vocal and sometimes hysterical attitudes of the current crowd in Gilbert who are opposing this expansion are of the same shortsighted mentality that created the current enormous energy crisis in California. They all want to have access to cheap and dependable power but want it generated elsewhere. Even if it is not needed at the moment in Arizona, the revenues generated by the sale of excess power to other utilities help keep our power costs more affordable.

SRP has gone the extra mile to meet the requirements for pollution control, aesthetic appearances of the plant, for safety of the local community, and to address the concerns of the residents. I received a flyer from the group opposing this expansion in the newspaper today and find it to contain errors and distortions of the impacts of the proposed expansion on our community. They speak of water shortages caused by the power plant when their own use of water for lakes, golf courses, green lawns and other luxurious uses dwarfs the usage of water by the power plant. They state that we have a choice between losing property values and our health and the expansion of power plant. This is simply

not true. Neither our health nor our property values are threatened by the SRP plant. If they want to talk about loss of property values, talk to people currently leaving California because of power shortages.

I urge you to allow SRP to proceed with the proposed expansion as my economic future as well as that of everyone else in this valley is linked to our need for dependable and affordable power. I also urge you to not be persuaded by the cries of a group that rely more on amassing people for public rallies and the associated publicity rather than calm rational consideration of the facts and alternatives.

Sincerely yours,

A handwritten signature in cursive script that reads "Harold Payne".

Subject: SRP Expansion

I am in favor of SRP expanding the Gilbert, AZ, generating plant.

Please vote in favor of this expansion.

We are in need of the electricity and that is the cost-efficient and economical way to get additional capacity.

Subject: San Tan expansion

Mr. Olea,

I am concerned about this proposed expansion in its location. This plant is located about 1 mile from my house and I have no problems with it the way it is now and I do not want it to be expanded. I understand the growing need and concern for power, but expanding a plant in an existing neighborhood is not the answer. I have one set of power lines in my subdivision now and I wouldn't be opposed to another set coming through because I know it would be required.

I live in Finley Farms with my wife and 6 year old daughter. I do not want my little girl exposed the pollution this plant will be emitting on a daily basis. The offsets will not make up for the damage this will do to the air quality, property value loss, or quality of life in general.

I have lived in Arizona for 30+ years and have been a Gilbert resident for 5 of those. One reason I liked Gilbert was due to the lack of industrial companies located here.

Please have SRP put this plant at one of their alternative sites and pipe the power in, if not for me and my family, then for all the children located in the area. There must be 40 kids under the age of 10 on my street alone.

Subject: San Tan Proposed Expansion

Paul,

My family lives in Cottonwoods Crossing, & our house is for sale, due to health fears & lack of trust in SRP's intentions. However, we have absolutely no prospects in our effort to sell, & most of our neighbors have offers withdrawn when the proposed expansion is disclosed. Our realtor is suggesting a lower asking price, because the proposed expansion is killing the desire of home shoppers to move here. I know without a doubt that it's hurting our property value. Please don't let this expansion happen, for its just not right to have such a large power plant in the middle of so many families with young children. We would consider staying here if it doesn't happen, but right now we are very worried about this whole thing. SRP can build its plants outside of town, & I feel its the right thing for SRP to do.

Sincerely,

Paul Griggs & Family

I understand that the next hearing on 2/12/01 will still continuing addressing "conditions" and there may be a vote of the committee. I thought it was important to bring to your attention that some of the intervenors have decided to retain an attorney to discuss the lost property values/damage condition. Our appointment is this Thursday. I have been told that our attorney will not be available to attend the hearing on 2/12/01 as he will be out of town. In this regard, we would appreciate some time at the beginning of the next hearing to report to the committee on our attorney's advise regarding the lost property condition. I am copying Mr. Sundlof on this email for his information.
Thank you for your time Cathy Lopez

Below is a copy of a letter I sent to SRP.
I support the building of new power plants.

Ron Hahn
1354 S Doran
Mesa AZ 85204

The people around this plant need to get a clue. I saw the news last night and some woman was all upset about water usage. Well we got a huge lake in Tempe using millions of gallons of water, we have of acres golf courses, fountains and lakes on every corner. Some how these people of Gilbert have a mob mentality that SRP is out to F*&^ us all. I have no problem with the building of the plant. I am about 5 miles away, but SRP seems to be doing everything it can to be fair to the people of this area. I want to continue to have cheap and reliable power as my home is all electric. Someone needs to smack these people into reality.

Paul Bullis

Re: Proposed S.R.P. San Tan Power plant Expansion
At Val Vista and Warner Rd., Gilbert, AZ

Dear Mr. Bullis:

We are residents and homeowners in Gilbert, Arizona. We speak on behalf of our family, as well as those fellow residents who also oppose this intrusion into our neighborhood, but who may not write to you. We strongly oppose the proposed expansion of the S.R.P. San Tan Power plant located at Val Vista and Warner Rd., Gilbert, Arizona, for the following reasons:

The existing SRP facility was built over 25 years ago when there was little, if any, development in the area; now, over 25 years later, the town of Gilbert has grown into a heavily populated residential area, growing rapidly. An industrial facility of the size and nature proposed by SRP has no business being located in a heavily populated residential area such as Gilbert. Nowhere else in the nation is there a facility of the size and nature of what SRP now proposes located in such a similarly heavily populated residential area. Please do not allow SRP to expand their San Tan facility in Gilbert!

Further, our "Valley of the Sun" is already struggling to meet E.P.A. air quality standards, and has had to have an extension of time to be able to meet the standards. Why add to the already existing air problems by locating in Gilbert? Have you seen the pollution carrying clouds of steam rising continuously from the existing plant? We have, and we don't want double or triple that in our backyard! Our children have to breathe this air!

Nor is there any good reason why the plant has to be expanded at this location: there are other sites available for this power plant which are not in close proximity to so much population. Please do not allow SRP to expand their San Tan facility in Gilbert!

SRP has not even conducted any government controlled environmental impact study on the facility they propose! SRP does not truly know what the impact will be of operating this proposed expanded facility in close proximity to so much residential population. A medical doctor who has

reviewed the levels of emissions contemplated by the proposed expanded facility was shocked that allowing this to take place was even a possibility! Please do not allow SRP to expand their San Tan facility in Gilbert!

And why should SRP be allowed to build a pollution generating facility in this Gilbert residential area, when the bulk of the power will be transported to, and consumed by, users nowhere near Gilbert? If you allow this plant to be built, other users, far away, get the power, SRP gets the profit, and us residents of Gilbert get the pollution. How is that right? It's not! Please do not allow SRP to expand their San Tan facility in Gilbert!

And don't be misled by SRP's recently raised claims of the need to generate power close to the point of consumption: if power transmission was such a problem, how could the "Four Corners" coal-fired generating facility, the Hoover Dam hydro facility, or the Palo Verde nuclear facility have operated so successfully all these years? Power from these facilities is transported literally hundreds of miles, with no problem. Yet, now that it wants to expand in Gilbert, SRP claims it would be a problem to build in Coolidge, Arizona, and transport power 30 miles into the valley! That argument defies logic! Don't be misled by SRP's false arguments!

Contrary to the recent media blitz of "power shortages", we have no power shortage in Arizona, nor are we likely to anytime in the near future: Arizona consumes only 5,002 megawatts of the 15,000 megawatts presently produced by SRP; the rest is sold outside our borders, and 10 more power generating facilities have already been approved to be built in the coming several years. Our needs now, and in the future, will be met without expanding the San Tan generating facility in Gilbert.

As a homeowner, we are concerned about lower property values if the expansion is approved. Who will want to buy a home near an industrial facility? WE wouldn't, nor would you! The generating facilities at Palo Verde, Four Corners, and Hoover Dam do not impact residential land values because they are nowhere near residential development. A member of my family, within the past 30 days, had earnest money down on a new home near the facility, cancelled the purchase when he learned of the proposed power plan expansion; he bought elsewhere. There is a very real, very negative, financial impact to this expansion. Please do not allow SRP to expand their San Tan facility in Gilbert!

For all these reasons, we strongly oppose the proposed expansion of the S.R.P. San Tan Power plant located at Val Vista and Warner Rd., Gilbert, Arizona

Sincerely,

R. Austin Goodale

Lynn Goodale

Subject: Dear Governor, Congressman, Senators, and Commissioners,

Dear Governor, Congressman, Senators, and Commissioners,

I just became aware of the controversy surrounding the San Tan Power Plant in Gilbert a few weeks ago when I bought a house less than one half mile away from the plant. Although the plant currently runs quite often when I'm home, the constant drone of the engines and spewing of gasses is tolerable from my distance. When I was informed this plant would triple in capacity and have 12-story smoke stacks scratching the skyline, I knew, at the very least, I should write a letter.

Since the Town of Gilbert relinquished its power governing the matter some years ago, the area they originally approved for such a massive size plant has expanded exponentially. There are now 40,000 constituents living in the area that just five years ago had a few hundred.

I beg each one of you voting on this decision to deny SRP the permission to expand the plant at this location. I also beg each of you with such great influence and power to urge the Arizona Corporation Commission to deny SRP. There are dozens of plants throughout Maricopa county in much more unpopulated areas (some of which may never be populated) that SRP should be focusing on expanding to meet the growing power needs of Arizona and the western states.

Thank you for your consideration,

Sean Murphy

Subject: San Tan Power Plant

Dear Sirs,

On February 23rd I will be signing the mortgage papers on my first home. I recently found out about SRP's plans to more than triple the production at the San Tan power plant at the intersection of Val Vista and Warner roads. I am very worried about the effects this plant will have on my family, and my community. I do not understand why such a large plant needs to be built in the center of a densely populated city. I know you would not want your loved ones living close to this plant. You wouldn't want your daughter to purchase her first home, and have her first child grow up by that plant. Then why would you want me to? Please give thought to this decision. I am entrusting you people not to endanger my life or the lives of my neighbors. I understand that this decision is more financially based, and no one has proof that this plant "may" damage citizens health, but please consider me in your decision. I am a wife, a daughter, a sister and a friend not just another complaining nobody. Why can't the citizens of Gilbert vote if we want this plant? Why is it that people who don't even live in the vicinity can change our lives and our community? Please move do not expand the production of this plant.

I would appreciate any thoughts or comments on this situation.

Sincerely,

Beth Licklider

Ruth

**Re: Case No. 105 - San Tan Power Plant Expansion
(Warner & Val Vista Roads)**

Dear Sirs:

This letter is being written to you to express the numerous concerns of Gilbert citizens regarding the anticipated expansion by Salt River Project of the San Tan Power Plant Facility at Warner and Val Vista Roads that the Arizona Corporation Commission Power Plant and Line Siting Committee will decide on Monday, February 12th.

As citizens of Gilbert, we are mad at our Town Leaders...

On April 25th, 2000, you, the Gilbert Town Council voted to approve entering into an Intergovernmental Agreement (IGA) with SRP, providing SRP's San Tan Expansion Project. The IGA was a major milestone in the development of the San Tan Expansion Project, planned 825-megawatt electric generating facility, with a **total expansion of 1125 megawatts by 2005**. You showed no regard to the Gilbert citizens of this densely populated residential community. Did you not think it would directly impact their lives? **With eighteen (18) power plants to be proposed and built in the State of Arizona, how could you approve the expansion of the ONLY POWER PLANT PROPOSED FOR IN A DENSELY POPULATED RESIDENTIAL AREA...OUR COMMUNITY!**

Why should the citizens of Gilbert become the "sacrificial lambs"?

You say you are powerless on these issues, but your silence is deafening! Where is your concern for our citizens?

As citizens of Gilbert, we are mad at our State Representatives and Senators...

You would think that with the lives of almost 40,000 constituents in the balance, you could give us a moment of your time. You give us

Arizona Corporation Commission
Docket Control
February 6, 2001
Page 2

lip service and little more. We have come to expect this. Who do you represent anyway? **With eighteen (18) power plants to be proposed and built in the State of Arizona, how can you stand by while SRP proposes the expansion of the only power plant proposed in a densely populated residential area...our community!**

As citizens of Gilbert, we are mad at the media...

We are tired of you skirting and clouding the issues. **Every time we voice our concerns about health issues, property values, or give you information that substantiates real concerns over the San Tan 825 megawatt power plant expansion, you give us video and sound bites of black-outs in California and inform us that this could be a reality here in Arizona...with a sense of urgency that our lights will go out too!** It is, at best, inaccurate reporting. The evidence presented by the COST Committee from research and public records indicates that we do not and will not have California's problem. But you chose to ignore these facts. They tell you about harmful emissions from this proposed power plant, the effects on our health, especially the elderly and children, and not only do you ignore these facts, but fail to report them. You were once called the "public watchdogs." Your one-sided reporting, misinformation or lack of information is appalling and should be major concern to all!

As citizens of Gilbert, we are mad at Governor Jane Hull...

More than once you have said we are not going to have California's energy problem, because we have planned so well. **The San Tan Power Plant Expansion at Warner and Val Vista Roads is one of eighteen (18) recently proposed or approved power plants in the state of Arizona and the only one proposed for in a densely populated residential area...our community!** Yes, the people whose homes and lives are going to be jeopardized by this power plant expansion have every right to say **"we don't want it in our backyard."** We don't want it and we don't need it on Warner and Val Vista Roads in Gilbert. There are other sites; there are other power plants! Why jeopardize our children's health, our homes, and our community? **The lights will not go out in Arizona if the proposed San Tan Power Plant Expansion to be located on**

Warner and Val Vista Roads is built in a more remote site! Have you ever been to Warner and Val Vista Roads Governor Hull...this intersection is surrounded by homes, supermarkets, schools, churches, parks...our community...our investment for the future for our families and ourselves. What are you thinking? Do you really believe it belongs in OUR backyard?

And finally, as citizens of Gilbert, we are mad at SRP...

You show no regard for the residents of Gilbert. You insult us by saying you will clean up the existing power plant if you can build another three times the size adjacent to it. If the state had the technology to clean up the existing plant, why wasn't it done sooner? This is one of your bargaining chips. How much cleaner would our air be if you cleaned up the existing plant and built the expansion on a new site and **not in a densely populated residential area!**

You say the citizens of Gilbert want this plant, yet meetings and hearing are **NOT** held in the Town of Gilbert, but in adjacent cities, with inconvenient dates and times, that will guarantee the smallest possible turnout. Among your offers to the Town of Gilbert there are two street sweepers, a horse trail, a forty-foot high dirt mountain with trees on it! **What a trade off our health, our community, our future!**

You show statistics that the population of Gilbert will double within the decade, the San Tan Freeway, increased traffic, more homes, and businesses and the need for more power, here in Gilbert. With these projections, if this power plant expansion isn't approved in Gilbert, we will have no power. But to your credit, you have proposed and anticipate approval of **eighteen (18)** new power plants and more on the way that can handle not only the demands for Gilbert and the entire Valley, but also have a sizeable surplus to sell to outside markets. **But you insist that the largest power plant expansion be built on Warner and Val Vista Roads...a highly densely populated residential area.**

The EPA reports say emissions from the proposed power plant of this size are harmful to living things! So why would you build a horse trail around it? You say you have models and statistics. You

say we will be better off, but smaller proposed power plants with populations living further away than the proposed San Tan Power Plant Expansion have been unanimously turned down because of the potential harmful health hazards to people. We say "potential harmful hazards" because we won't know what will happen...do we? This is a big risk you are willing to take at the expense of the citizens of Gilbert! An expansion on the intersection of Warner and Val Vista Roads is utter madness! This is our community...what are you thinking!
