RE: Salt River Project Santan electrical power generating facility expansion
Docket #: L-0000B-00-0105

Dear Chairman Mundell,

I am writing to you regarding the proposed expansion of the Salt River Projects' Santan electrical power generating facility at Warner and Val Vista Roads in Gilbert. I request that you, as my elected representative in this matter, deny SRP's request to expand the Santan facility.

Unlike twenty years ago, the SRP Santan facility now sits in the heart of a highly residential and family oriented community. The demographics surrounding the SRP Santan facility have changed greatly in recent years, and this area is not where a power generating facility of the magnitude proposed by SRP should be located. According to the Maricopa County Tax Assessor, there are now more than 15,000 homes within a two mile radius of the SRP Santan site. This represents nearly 50,000 people, about one third of which are school age children. As any reasonable person can conclude, a power generating facility of the magnitude proposed by SRP should not be located in a highly residential area such as this. Please also bear in mind that the residents of this area are among the most highly educated and vote among the highest percentages of anywhere in Arizona. We will remember how you vote on this issue when we go to the polls for many years to come.

Again, I ask you as my elected representative in this matter, to deny SRP's request to expand the Santan power generating facility at Warner and Val Vista Roads in Gilbert.

Thank you for your time and consideration.

Sincerely,

Clark Lathrum

I am writing to you because I need your help. I am ~~an Arizona~~ Gilbert resident, wife, and mother of two little asthmatic girls. My home is within 1/2 mile of the SRP Santan power plant. The proposed expansion of this plant to 1125 megawatts means that an additional 2.14 tons of pollution will fill the air around our home daily. I am gravely concerned about the already compromised health of my children. Lauren, now five, already uses a steroid inhaler twice daily. The nebulizer has become a permanent fixture in our living room for both Lauren and Aine (2 1/2 yrs). We wish we could move our family to a safer area of the valley, but we are very financially tied to this house that we had planned to stay in forever. It is also becoming increasingly difficult to sell a home in this area for obvious reasons. We are trapped. I am asking you to stop this expansion and protect the health of my family and neighbors. A power
