AZ CORP COMMISSION  
DOCUMENT CONTROL  
April 1, 2001

To William Mundell,

I am a homeowner in the Western Skies community in Gilbert Arizona. I am very concerned about the Santan Power Plant expansion on Warner and Val Vista. I am concern about the devalue of my property but more with the health problems I may be facing with the expansion. As a member of the community I am outraged that SRP and the Utilities Department thinks it's okay to expand a power plant in the middle of a residential area. There is a lot of open land and other power plants that are available to expand on that are not located in residential areas. Please reconsider and vote against the Santan power plant expansion in Gilbert.

Sincerely,

Tonya Watson

SANTAN

March 30, 2001

Chairman William Mundell  
Arizona Corporation Commission  
1200 West Washington Street  
Phoenix, Arizona 85007

Dear Chairman Mundell:

I am writing to voice my support for the responsible addition of electrical generating installations in Arizona. The realities are that with the continued population growth and resulting economic benefits we enjoy, we need to insure that our power generation resources are up to the challenge. The "not in my neighborhood" attitude has brought California to the position it is in now. In addition to the hardships it has, and will bring, the necessary fast track approach to alleviate the shortage, may result in less than optimum results. I believe that getting electrical generation close to the area using it makes sense from both a fairness standpoint and from a distribution standpoint, i.e. Gilbert and the southeast valley has enjoyed tremendous growth. Whose neighborhood do they think the electrical generation for their area should reside in? Which neighborhoods do they think the power lines to bring power from outside the area should cross through?

I think the answer is obvious that the Santan Expansion should be approved. If the neighborhoods can negotiate aesthetic improvements and enhancements from the utilities in the process that's even better.

Respectfully,

Daniel H. Burke  
President

Re: Case #105, Docket #L00000B-00-0105

Dear Chairman Mundell,

I have been following both the California energy crisis and the SRP's request in Arizona to build a new generation facility in Gilbert.

I want to encourage the Arizona Corporation Commission to approve SRP's request to ensure that the East Valley has the electricity it needs to continue to grow and prosper. As a Mesa business owner, I feel for the California small business owners who are suffering from the situation there. With the SRP plan, the ACC has the opportunity to help make sure we are protected from energy shortages in the Valley in the future.

There's been a lot of news about the SRP's plan and why it is needed. SRP has been a good company to its customers and to the Valley for many years, and they are doing what they can now to make sure they have enough power at good prices. We are lucky to have an electric company that is not profit-motivated and that plans ahead.

Again, I encourage the Commission to vote yes on the Santan proposal.

Sincerely,

A handwritten signature in black ink, appearing to read "Todd Schumacher".

Re: Application for Certificate of Environmental Compatibility  
SRP Santan Expansion Project - Case #105  
Docket No. L-0000B-00-0105

Your Honor:

I am one of the intervenors in the above referenced case. I wanted to express my gratitude for your consideration in allowing us the extra few days to review the transcripts that just arrived at the Library Tuesday or Wednesday night of this week. As most of us work, we will spend the entire weekend reviewing those transcripts that we did not have access to prior. As we are lay people, it took us over 45 hours to go through the original 9 that we had access to a week ago. I can only pray that we are able to get through the others in time for the Monday brief deadline. It is because we are lay people and the enormous delay in getting these transcripts that I hope we can include everything we intend to speak of in oral argument at the April 18<sup>th</sup> hearing. My purpose for writing you today is to ask additional consideration on the following:

- Extend the amount of time our group (led by Ms. Lopez) has to speak. There is no way that we can present everything put together by this group in a short 20 minutes. I respectfully request that you consider at least one hour to encapsulate the thoughts and concerns of the many included in that group. This is literally our final moment to summarize the unresolved issues of 25 days of testimony. We hope that you will be reasonable in your response.

Lyn S. Farmer, Esq.

4/6/01 - Page 2

- It is further requested that due to time constraints there may be an item or two that we would like to talk about in oral argument that cannot be part of the brief because we were out of time. We will work as hard as we can to avoid it, but there is the possibility and we wanted to be allowed to mention that one item or so if necessary - irregardless of it's inclusion in the brief.

Should you have any questions, please feel free to call me. Thank you in advance for your kind consideration and favorable response.

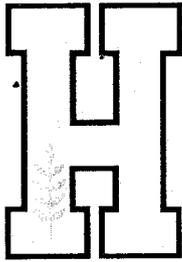

Respectfully,

Catherine M. LaTona

Chairman William Mundell  
ARIZONA CORPORATION COMMISSION  
1200 West Washington Street  
Phoenix AZ 85007

Dear Chairman Mundell:

As you may know, our family business has been a part of this community for 120 years. One of the keys to our success has been the fact that an affordable power supply has always been available to meet the needs of our business, as well as the needs of our many business customers and our individual consumers of bakery products. A great deal of foresight, on the part of the power suppliers, has gone into what all of us now enjoy in this regard.

Thinking about our collective future, and knowing what is happening in other areas of the U. S. regarding power, we at Holsum want to urge you to give favorable consideration to the proposal by Salt River Project on their Santan Expansion Project. One of the very key factors that many business people consider when making decisions to relocate their companies rests upon reliable and affordable power supplies. We see this decision you are soon to make will have definite (and positive) implications for everyone in the East Valley.

Sincerely,  
*Ed Eisele*

Dear Mr. Mundell,

We are writing to you to express our concern over the SRP expansion plant on Val-Vista Rd. and Warner Rds. in Gilbert. We just built our dream home within a mile of the plant. We spent every dime and borrowed some so we could move into Ashland Ranch. We thought it would be a perfect place to raise our growing family. We even purchased a lot that backs to the new elementary school so I could watch my kids walk to school. We also bought this lot because it had great views of the mountains from our balcony. Now with everything that SRP wants to do at the Santan plant I see our dreams and the dreams of our neighbors gone. We will now get to look out our balcony and see three huge towers spewing toxic chemicals throughout our neighborhood. We also have seen first hand the loss in property value. Our next door neighbor had his house on the market for over a year. When he finally did sell it the people buying it backed out when they heard the expansion had been approved , they even threatened to sue our neighbor. We are within a mile , what about the poor people who's homes back up the power plant. Doesn't anybody care? All we keep hearing is well you knew the plant was there, Yes that is true but, just like a neighbor you do not expect your neighbor to build a 150 tower next door. The township would certainly have something to say about that. Unfortunately our township failed us; they did not listen to the people. Our former mayor should have learned a lesson and backed the people who put her in office but she didn't and she was voted out. All we are asking of you is to think about the people, who bought homes around the area, we are the ones that are going to pay the price. The Plant should be built somewhere else. There are other options. The risk is too great; there are four elementary schools and a junior high within the two-mile range of the plant. Its just not worth it, SRP can afford to build anywhere, they are going to sell the electric to California anyway. Let them build it somewhere else, PLEASE!!!!!!

Sincerely,

*Gregg and Elizabeth Taran*
