1200 W. Washington
Phoenix , Arizona 85007

Dear Mr. Spitzer,

We are writing to you to express our concern over the SRP expansion plant on Val-Vista Rd. and Warner Rds. in Gilbert. We just built our dream home within a mile of the plant. We spent every dime and borrowed some so we could move into Ashland Ranch. We thought it would be a perfect place to raise our growing family. We even purchased a lot that backs to the new elementary school so I could watch my kids walk to school. We also bought this lot because it had great views of the mountains from our balcony. Now with everything that SRP wants to do at the Santan plant I see our dreams and the dreams of our neighbors gone. We will now get to look out our balcony and see three huge towers spewing toxic chemicals throughout our neighborhood. We also have seen first hand the loss in property value. Our next door neighbor had his house on the market for over a year. When he finally did sell it the people buying it backed out when they heard the expansion had been approved , they even threatened to sue our neighbor. We are within a mile , what about the poor people who's homes back up the power plant. Doesn't anybody care? All we keep hearing is well you knew the plant was there, Yes that is true but, just like a neighbor you do not expect your neighbor to build a 150 tower next door. The township would certainly have something to say about that. Unfortunately our township failed us; they did not listen to the people. Our former mayor should have learned a lesson and backed the people who put her in office but she didn't and she was voted out. All we are asking of you is to think about the people, who bought homes around the area, we are the ones that are going to pay the price. The Plant should be built somewhere else. There are other options. The risk is too great; there are four elementary schools and a junior high within the two-mile range of the plant. Its just not worth it, SRP can afford to build anywhere, they are going to sell the electric to California anyway. Let them build it somewhere else, PLEASE!!!!!!

Sincerely,

Gregg and Elizabeth Taran

To Marc Spitzer,

April 1, 2001

I am a homeowner in the Western Skies community in Gilbert Arizona. I am very concerned about the Santan Power Plant expansion on Warner and Val Vista. I am concern about the devalue of my property but more with the health problems I may be facing with the expansion. As a member of the community I am outraged that SRP and the Utilities Department thinks it's okay to expand a power plant in the middle of a residential area. There is a lot of open land and other power plants that are available to expand on that are not located in residential areas. Please reconsider and vote against the Santan power plant expansion in Gilbert.

Sincerely,

Tonya Watson

Dear Sir:

Given the current California electric utility crisis, and the resulting problems this crisis has caused for both the business community and general population, I want to convey my personal support for SRP's Santan expansion project. I urge you to approve this project so we do everything possible to provide and assure a continual, affordable source of electrical power to the Phoenix marketplace.

Sincerely,

Phoenix, AZ 85007

Dear Mr. Spitzer, Commissioner

We live within 1 mile from the proposed San Tan Power Plant.

We do not want this plant to be build nearby us for several reasons:

1. It is not necessary for the power plant to build in that location. They have other areas in which to build which won't be so close to residential neighborhoods.
2. The plant will de-value our property and many others.
3. It will be unsightly to look at. (The greater Phoenix area has prided itself in good planning and making their metropolitan area a joy to live in and visit)
4. Toxins or any other environmental hazards that would affect the surrounding community.

Please take in account our opinion when making decisions in this regard.

Sincerely,

Lawrence and Katherine Ibsen

Dear Commissioner Irvin,

I attended the majority of the 20 days of hearings conducted by the Power Plant and Line Siting Committee regarding the Santan Expansion Project. First I would like to commend the members of that committee for their patience and attentiveness to the concerns of the intervenors in that matter. They gave them every opportunity to express their concerns, and in the process developed 34 conditions, which directly address the concerns of those protesting the expansion.

I attended those hearings as a supporter of the expansion, and nothing I heard during the nearly 1500 hours of testimony has led me to have doubts about the appropriateness of the decision rendered by that committee.

I would like to add some comments, which I feel are pertinent in support of the project.

1. When the original plant was built in the early 1970s, the population of Gilbert was barely more than 2,000 residents.
2. The commercial and industrial square footage at that time was probably less than 50,000 square feet. The majority of the population engaged in farming activities.
3. The population in 2000 has reached over 100,000 residents and the majority of those residents are no longer involved in agriculture.
4. The commercial and industrial square footage in the Town of Gilbert is now over 9,000,000 square feet with much more on the drawing boards. Most of the additional commercial and industrial use also will require much more in the way of electricity per square foot than was used by comparison in the 1970s.
5. Many of those 100,000 residents are supported by jobs in the surrounding communities - Chandler and Mesa in addition to those employed locally.
6. If the only place that new power generation is permitted is in outlying areas, will this not further impact not only the quality of family life by requiring longer commutes and more time away from their children, but also create greater pollution from the additional traffic and congestion?

In conclusion, I would make the point that in Tempe, a city that is landlocked and where growth is virtually at a standstill, this Commission wisely sited the additional power unit at Kyrene to assure those residents and commercial interests of a reliable and stable electrical supply. Can the Commission do any less for the citizens of Gilbert where growth will continue unabated for many years?

Sincerely,

Barbara A Sheldon

ATTENTION: Commissioner Mark Spitzer
REFERENCE: "SanTan Expansion Project"
ACL Case No 105 Docket Control #L0000B-00-0105

Gentlemen:

As a business owner and homeowner in Arizona, I fully support Salt River Project's "SanTan Expansion Project" as well as other proposed power plant and transmission line projects.

We have been fortunate in the past to have had visionary electric companies who planned far enough ahead to preclude us from being faced with "*Brown Outs*" or power shortages.

I trust the commissioners will be as visionary as the power companies and approve Salt River Project's expansion.

Yours truly,

Wallace N. Brown

Gentlemen:

I am writing to express my support of Salt River Project's "San Tan Expansion Project" and other power plant and transmission line projects. We must plan for our future and our need for additional power supplies. This problem will not be solved by a "head in the sand" approach or by letting special interest groups distort the facts.

I hope the commission will be proactive in this matter and do what is right for our State by approving this project.

Sincerely,

Robert N. Brown

Re: SRP Santan Project

Dear Commissioner Spitzer:

I write in strong support of Salt River Project's plan to expand its Santan Power Plant in Gilbert, Arizona. The project is absolutely essential to maintaining an adequate supply of electricity to serve Arizona's needs in the near term.

I urge you and your fellow Commissioners to approve the Santan Project at the meeting now scheduled for April 25, 2001.

Thank you for allowing me to express my views on this important issue.

Very truly yours,

JAMES P. BARTLETT

Dear Commissioner -

I am writing to tell you of my support
for the Santan project.

The alternative to power shortages is
a real concern as I live on a very fixed
income and raising electricity charges
would be a real hardship for me.

I am hopeful your group will plan
for the growing needs of our area, and
approve Santan.

Thank you for your attention.

The Honorable Marc Spitzer
Arizona Corporation Commission
1200 West Washington
Phoenix, AZ 85007

Dear Commissioner Spitzer,

On behalf of Arizonans for Electric Choice and Competition, I write in support of the Salt River Project and attempts to modernize and expand the San Tan Generating Station in Gilbert, AZ.

AECC members are keenly aware of the electricity supply shortage we face in the Phoenix area. Additionally, AECC members are aware of the difficulty in siting transmission lines through urban residential zones. Arizona needs new electric generation, and the consumer electric load in Maricopa County creates a need for local generation.

For these reasons and many others, AECC members believe SRP plans for the San Tan Generating Station are necessary and appropriate.

As President of a coalition dedicated to bringing the benefits of a competitive electricity industry to the marketplace, I respectfully request your support for the SRP application regarding the San Tan Generating Station.

Sincerely,

Stan Barnes
President
AECC
