RE: SANTAN GENERATING STATION EXPANSION – COMMISSION
DECISION NO. 63611 – DOCKET NUMBER L-00000R-00-0105; YOUR
LETTER OF DECEMBER 21, 2001

Dear Mr. Johnson:

On Saturday, January 5, 2002, the SRP Santan Community Working Group (“CWG”) met and reviewed among other things, your letter dated December 21, 2001 directed to Kevin Wanttaja at Salt River Project. The CWG has come to a consensus that all three oil tanks should be removed for proper mitigation relating to both on-site and off-site mitigation.

The CWG is acting according to the conditions set forth in the Commission Decision number 63611, specifically those conditions which formed the CWG, condition number 7 and the other conditions relating to both on-site mitigation and off-site mitigation.

At this time, it is the understanding of the CWG, that the two northern most oil tanks are already slated for removal. For this reason, and for the reasons stated above, we are asking for the Arizona Corporation Commission to take the necessary action in order to remove the southern most oil tank as well.

Respectfully,

The SRP Santan Community
Working Group
