Re: Santan Generating Station Expansion-Commission Decision No. 63611
Docket No. L-00000R-00-0105; Follow-up letter to our January 8, 2002 letter

Dear Mr. Johnson:

The SRP Santan Community Working Group ("CWG") previously sent you correspondence, dated January 8, 2002, wherein the Group stated that a consensus had been reached that the southernmost oil tank should be removed for proper mitigation relating to both on-site and off-site mitigation. After this letter was sent, the hearing which had previously been scheduled on this issue was canceled.

The purpose of this letter is to notify the Arizona Corporation Commission that the CWG has not changed its position regarding the removal of this third oil tank. S.R.P. has stated that it intends to remove this oil tank, only to replace it with two smaller tanks, which will be thirty-two feet tall. This is unacceptable to the C.W.G. Wherefore, the C.W.G. hereby requests that the Arizona Corporation Commission hold a hearing to determine whether the third oil tank must be removed entirely and not replaced with any further tanks, so that proper mitigation can be completed.

Respectfully,

The SRP Santan Community Working Group
