K2 Site, 1/4 mi W of AZ Hwy 87 / 260  
Strawberry AZ - Gila County  
Lat: N 34° 24' 20" Long: W 111° 29' 49"

RECEIVED  
2008 DEC 12 P 2:30  
CORP COMMISSION  
DOCKET CONTROL

**SUBJECT: Authorization to Discharge under AZPDES De Minimus General Permit  
Your DGP Authorization Number: AZDGP - 00997**

Dear Mr. Breninger:

Your Notice of Intent (NOI) for the above-referenced discharge was received on November 29, 2007, by the Arizona Department of Environmental Quality (ADEQ), and has been processed. This letter is to confirm that the above facility has been authorized to discharge as described in the NOI, under the terms and conditions of the AZPDES De Minimus General Permit (DGP), **effective December 6, 2007** (five business days after ADEQ received the NOI).

Please be aware that this document is not your permit but confirms your authorization to discharge within the requirements of the DGP. Discharge monitoring (Appendix A of the permit) and full implementation of your Best Management Practices (BMP) Plan are among those requirements. You must be prepared to demonstrate compliance with all elements of the BMP Plan and those of the DGP to maintain coverage and avoid possible penalties. The permit and associated forms are available on ADEQ's web site at:

<http://www.azdeq.gov/environ/water/permits/gen.html#demi>

Note that for discharges containing visible turbidity or solids (e. g., from well construction, borehole development, or test pumping), your BMP Plan must include provisions for a mud pit, retention basin, filtration, and/or other measure that will minimize sedimentation from such discharges in the receiving waterway.

Please keep this document for your records, and use your DGP Authorization Number (in the subject line of this letter) for any inquiries or correspondence. Use this number also on the Notice of Termination (NOT), which must be submitted within 30 days after 1) the discharge has permanently ceased; 2) coverage has been obtained under another AZPDES permit; or 3) responsibility for the discharge activity has been transferred. If the discharge lasts continuously
