ORIGINAL

To Whom It May Concern:

My wife and I are retired, full time residents at Hillcrest Bay who strongly support the UCSA. I have heard the comments from the small group who are opposed take an "us against them" attitude in the letters that they have been sending in. We enjoy the many resources the area has to offer much like the weekenders. Maintaining a quality of life that this area can offer means getting rid of the spider web of poles and wires that pollutes the mountain and lake views is important to us. And it is only destined to get worse if this project is rejected.

Along with the majority, we still want to see this project move forward. We recognize that this is a one time opportunity and the cost will be deferred until the project is completed. The board has shown good faith in taking steps to help cover some of the financial cost for those that claim and show hardship. I am one of the neighbors willing to help monetarily
We bought in this area hoping that it would progress with the times, increase in home and property values, new home construction, community development, etc. not stand still in time. Please consider what the majority homeowners have asked for and move this project ahead.

Sincerely,

Vern & Loretta Kraus
