NARRATIVE DESCRIPTION OF APPLICATION FOR RATE INCREASE

Instructions:

Please provide a written narrative of the purpose for your request for a permanent rate increase. The narrative should include: changes in current, compared to past operations, that necessitate the increase; descriptions and/or calculations of adjustments made to amounts that are included in this application that are different than amounts recorded in your books/ledgers (pro forma adjustments); significant factors influencing your revenues, expenses and/or rate base; anticipated growth/decline in customers expected in the next two (2) years, the amount of anticipated construction to serve those customers, and how financed; the type of customers served by the utility, e.g. residential, irrigation, small retail businesses, large commercial, etc.; efforts made to encourage conservation of water through the proposed rate design or through other means; efforts made by the utility to control costs/expenses and/or mitigate the amount of rate increase; and other factors relevant to your request for increased rates.

The prior rate approval (effective April 1989) was inadequate at the time. The increased cost of ADFQ required testing over the past years, additional plant and maintenance are all factors.

As the Commission knows we are being required to add storage and pumping capacity. The need for sufficient revenues to maintain the Company at or above the required levels. The Company will need to secure financing for projects in the immediate future and will need adequate income to fund same. The rates requested at this time may be inadequate, as we have no way of foreseeing what effect the tiering will have on conversation. These rates could possibly result in only a minor increase in revenue.

Attach additional pages as necessary.

COMPLETE THE FOLLOWING STATEMENTS IN SUPPORT OF YOUR RATE REQUEST.

Miracle Valley Water Company has applied to the Arizona Corporation Commission for an increase in rates. The present rates have been in effect since April 1989. An increase in rates is necessary at this time due to the inflation in all facets of operation costs and the required expansion of Plant and necessary replacement of old Plant. We are tiering the increase in rates to encourage conservation.

Enclosed are all current and proposed rates and charges for your inspection.
