2009 FEB 20 P 2:23
AZ CORP COMMISSION
DOCKET CONTROL

IN THE MATTER OF THE APPLICATION OF
WATER UTILITY OF GREATER TONOPAH
FOR THE ESTABLISHMENT OF JUST AND
REASONABLE RATES AND CHARGES FOR
UTILITY SERVICE DESIGNED TO REALIZE A
REASONABLE RATE OF RETURN ON THE
FAIR VALUE OF ITS PROPERTY
THROUGHOUT THE STATE OF ARIZONA

DOCKET NO. W-20450A-09-

W-02450A-09-0081

APPLICATION

Arizona Corporation Commission

DOCKETED

FEB 20 2009

DOCKETED BY	MR
-------------	----

1. Water Utility of Greater Tonopah ("Greater Tonopah") applies for a rate increase.

A description of the proposed rate increase, an explanation of why it is necessary, and an explanation of the actions taken to limit the impact on customers (including elderly, low-water users, and low income customers) is included in the testimony that is being filed with this application. In addition, a complete set of rate case schedules is included in accordance with A.A.C. R14-2-103.

2. This application is being submitted at the same time as rate applications for 5 of Greater Tonopah's sister utilities: Global Water – Palo Verde Utilities Company, Global Water – Santa Cruz Water Company, Valencia Water Company – Town Division, Valencia Water Company – Greater Buckeye Division (formerly Water Utility of Greater Buckeye), and Willow Valley Water Company (collectively, the "Global Utilities", and together with their unregulated affiliates and parent companies, "Global Water"). Greater Tonopah requests that the Commission consolidate these 6 rate dockets.

1 9. The proposed rate design for Palo Verde shifts revenue requirements away from
2 residential customers and increasingly towards large users of recycled water. By increasing the
3 cost of recycled water the Commission can:

- 4 a. Reduce the rate increase needed from residential ratepayers, and
- 5 b. Encourage large users to conserve Arizona's only growing source of water,
6 recycled water.

7 10. The Global Utilities propose a new rate design for water rates – Rebate Threshold
8 Rates. The new rate design is designed to encourage conservation and to allow customers to
9 reduce their bills by reducing their usage. The rate design includes the following:

- 10 a. An increased number of tiers; and
- 11 b. A provision for a rebate for customers that reduce usage. In the
12 case of Santa Cruz, the majority of residential customers would qualify for the Rebate Threshold
13 due to their already low consumption.

14 11. The Global Utilities are not asking for rates based on "fair value" rate base, and
15 are limiting their rate requests to original cost rate base.

16 12. The Global Utilities are imputing the Global Parent tax-free bond debt to Santa
17 Cruz and Palo Verde, thereby lowering their overall rate of return.

18 13. The Global Utilities are stipulating to Staff's return on equity methodology, as
19 proposed in recent water and wastewater cases, rather than asking for a higher return.

20 14. The Global Utilities are proposing to consolidate the rates of three utilities² in the
21 West Valley Region, in order to limit the impact of the rate increases on the customers of the
22 smaller utilities.

23
24
25
26

27 ² Valencia Water Company – Town Division, Valencia Water Company – Greater Buckeye
Division, Water Utility of Greater Tonopah

Summary of Testimony

1
2 15. The Global Utilities are presenting the Direct Testimony of five witnesses. The
3 Direct Testimony is included with Palo Verde's application, but is applicable to each of the 6 rate
4 applications.

5 16. The testimony of Trevor Hill, Global Water's President, provides an overview of
6 the rate applications. Mr. Hill also describes the economic situation in the areas served by the
7 Global Utilities, and how the economic situation is impacting the Global Utilities. Mr. Hill also
8 provides a description of Global Water's cost-cutting efforts. He also describes Global Water's
9 Total Water Management strategy, which is based on recognizing the scarcity of groundwater and
10 promoting the use of recycled water. Mr. Hill also explains Global Water's Public Private
11 Partnerships with the cities served by the Global Utilities. Mr. Hill also explains Global Water's
12 regional approach to infrastructure, describes the conservation and efficiency benefits of that
13 approach, and explains how Global Water's Infrastructure Coordination and Financing
14 Agreements (ICFA) allow Global Water to follow its regional, Total Water Management strategy.

15 17. Mr. Graham Symmonds, Global Water's Chief Technical Officer, explains the
16 Global Utilities' approach to conservation-focused, regional and efficient infrastructure and
17 testifies that the Global Utilities' facilities are used and useful. He explains how this approach
18 leads to lower long term costs and promotes water conservation. He describes the Global Utilities
19 green billing system, and their renewable energy study. He describes the Global Utilities'
20 experience in addressing the infrastructure problems of small water utilities acquired by Global
21 Water. He introduces Global Water's innovative rate design, which promotes water conservation
22 and allows customers to reduce their bills by conserving. He also addresses changes to specific
23 fees and tariffs.

24 18. Mr. Greg Barber, Global Water's Chief Financial Officer, testifies concerning cost
25 allocation, test year expenses and rate base and the Global Utilities' cost of debt.

26 19. Mr. Matthew Rowell of Desert Mountain Analytical Services, and formerly Chief
27 Economist of the Commission, explains the importance of consolidating the many small,

1 inefficient and poorly capitalized water utilities in Arizona. He describes the Global Utilities'
2 Single Tariff Pricing proposal for the West Valley, and he demonstrates how Single Tariff Pricing
3 promotes consolidation of small utilities. He explains how the ICFA agreements create
4 appropriate regulatory incentives to pursue consolidation, and to emplace regional water
5 infrastructure in the face of growth and water scarcity. He also testifies concerning the regulatory
6 and ratemaking treatment of the ICFA agreements. Finally, he testifies concerning the Global
7 Utilities' cost of capital.

8 20. Mr. Jamie Moe, Global Water's regulatory accountant, and formerly a rate analyst
9 for the Commission, will testify concerning the Global Utilities' requested adjustment
10 mechanisms, including their groundbreaking request for a renewable energy adjustor to support
11 renewable, distributed energy facilities at their water recycling plants. He also testifies in support
12 of the various adjustments made in the rate schedules.

13 **Contact Information**

Compliance Information

22. The Global Utilities are currently in compliance with all requirements of the Commission, ADEQ and ADWR. Copies of ADEQ Compliance Status Sheets for each utility are included as Attachments to Mr. Symmonds' direct testimony.

Test Year

23. This rate application is based on a test year of 2008. No post test year plant or construction work in progress is included in the proposed rate base.

WHEREFORE, Greater Tonopah respectfully requests that the Commission:

- A. Consolidate this case with the Rate Applications of the other 5 Global Utilities;
- B. Schedule a hearing on this Application as soon as possible; and thereafter
- C. Issue a final order:
 - 1. Granting the rate increase requested herein;
 - 2. Approving the adjustment mechanisms requested herein; and
 - 3. Granting such other and further relief as may be appropriate under the circumstances herein.

RESPECTFULLY SUBMITTED this 10 day of February 2009.

Re: PWS 07-733

Dear Ms. Armijo:

On October 14, 2008 I performed a sanitary survey of the West Phoenix Estates #6 water system, which included a list of deficiencies that needed to be corrected. This department has received your documentation of deficiencies corrected. Based on the information available, we currently show the water system is in **Compliance** with the Safe Drinking Water Rule for this date.

If this department is made aware of new or different information, the compliance status may change. If you have any questions or need additional information on the requirements for a public water system operating in Maricopa County, please feel free to contact me at (602) 506-5173.

Sincerely,

Phoenix, Arizona 85007

RE: Compliance Status for Palo Verde Utilities WRF, Inventory number 105228,
Place ID: 5048, Permit number: 34986 and 43460.

Dear Ms. Hains;

Your request for evaluation of compliance status for the above facility is completed. Our records indicate that Palo Verde Utilities, WRF has Aquifer Protection Permit number 34460 and AZPDES permit number 37120 issued on 11/05/2007 and 6/5/2006 respectively.

Both, the Aquifer Protection and AZPDES Permit reporting requirements and monitoring results which have been submitted indicate the facility **is in compliance** based on the current information that is available to ADEQ. No enforcement actions are pending.

It should be understood that the compliance status of a facility may change from time to time based upon monitoring results or a facility inspection. Therefore this is based on the most current information available.

**ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY
MONITORING ASSISTANCE PROGRAM
ANNUAL SAMPLING FEE INVOICE**

* Pursuant to A.R.S. § 49-113, interest will be charged if full payment is not received by the specified due date. If you dispute the amount listed, please contact ADEQ as soon as possible. To reduce interest costs on an unpaid invoice, you may remit an amount that you believe is not in dispute. However, if nonpayment is due to willful neglect, you may suffer an additional five percent penalty of up to twenty-five percent of the amount due for each month or fraction of a month the amount is past due.

If you have any questions about your invoice, contact W. Scott Steinhagen at (602) 771-4445 or toll-free within Arizona at (800) 234-5677, extension 771-4445.

Pursuant to A.R.S. § 49-360 F and A.A.C. R18-4-224 through R18-4-226, "The director shall establish fees for the monitoring assistance program to be collected from all public water systems..."

To reduce interest costs on an unpaid invoice, you may remit an amount that you believe is not in dispute. However, if nonpayment is due to willful neglect, you may suffer an additional five percent penalty of up to twenty-five percent of the amount due for each month or fraction of a month the amount is past due.

If you have any questions about your invoice, contact W. Scott Steinhagen at (602) 771-4445 or toll-free within Arizona at (800) 234-5677, extension 771-4445.

Pursuant to A.R.S. § 49-360 F and A.A.C. R18-4-224 through R18-4-226, "The director shall establish fees for the monitoring assistance program to be collected from all public water systems..."

1 **Significant Accounting Policies** — The Company prepares its financial statements in
2 accordance with accounting principles generally accepted in the United States of America.
3 *Significant accounting policies are as follows:*

4
5 **Utility Plant** — Utility plant is stated at cost with depreciation provided on a straight-line basis
6 at annual rates ranging from 2% to 20% for each depreciable asset class as set by the
7 Commission or, in the absence of a set rate, by water industry standard. Expenditures for
8 maintenance and repairs are charged to expense. The cost of replacements and
9 improvements is capitalized. When assets are retired or otherwise disposed of, the cost is
10 eliminated from the accounts and is charged to the related accumulated depreciation.

11
12
13 **Revenue Recognition** — Water usage revenues are generally recorded when service is
14 rendered or water is delivered to customers. However, the determination and billing of water
15 sales to individual customers is based on the reading of their meters, which occurs on a
16 systematic basis throughout the month. At the end of the fiscal year, amounts of water
17 delivered to customers since the date of the last meter reading and the corresponding
18 accrued revenue are estimated. Water meter connection fees are recorded when service is
19 rendered for new customer connections. Revenue from water meter sales, that is not
20 refundable pursuant to an advance in aid of construction agreement with the developer, is
21 generally recorded at the time the water meters are installed and service begins to a
22 particular lot.

23
24 **Advances and Contributions in Aid of Construction** — The Company has various agreements
25 with real estate development and homebuilding companies (the "Developers"), whereby
26 funds and water line extensions are provided to the companies by the Developers and are
27 considered refundable advances for construction. These advances in aid of construction are
28 noninterest-bearing and are subject to refund to the Developers through annual payments,
29 that is computed as a percentage of the total annual gross revenue earned from customers
30 connected to utility services constructed under the agreement over a specified period. The
31 portion of the advance, that is not refunded, is considered a contribution in aid of construction
32 (CIAC) at the time it becomes nonrefundable. CIACs are amortized as a reduction of
33 depreciation expense over the estimated remaining life of the utility plant.

1 **Significant Accounting Policies** — The Company prepares its financial statements in
2 accordance with accounting principles generally accepted in the United States of America.
3 Significant accounting policies are as follows:

4
5 **Utility Plant** — Utility plant is stated at cost with depreciation provided on a straight-line basis
6 at annual rates ranging from 2% to 20% for each depreciable asset class as set by the
7 Commission or, in the absence of a set rate, by water industry standard. Expenditures for
8 maintenance and repairs are charged to expense. The cost of replacements and
9 improvements is capitalized. When assets are retired or otherwise disposed of, the cost is
10 eliminated from the accounts and is charged to the related accumulated depreciation.

11
12
13 **Revenue Recognition** — Water usage revenues are generally recorded when service is
14 rendered or water is delivered to customers. However, the determination and billing of water
15 sales to individual customers is based on the reading of their meters, which occurs on a
16 systematic basis throughout the month. At the end of the fiscal year, amounts of water
17 delivered to customers since the date of the last meter reading and the corresponding
18 accrued revenue are estimated. Water meter connection fees are recorded when service is
19 rendered for new customer connections. Revenue from water meter sales, that is not
20 refundable pursuant to an advance in aid of construction agreement with the developer, is
21 generally recorded at the time the water meters are installed and service begins to a
22 particular lot.

23
24 **Advances and Contributions in Aid of Construction** — The Company has various agreements
25 with real estate development and homebuilding companies (the "Developers"), whereby
26 funds and water line extensions are provided to the companies by the Developers and are
27 considered refundable advances for construction. These advances in aid of construction are
28 noninterest-bearing and are subject to refund to the Developers through annual payments,
29 that is computed as a percentage of the total annual gross revenue earned from customers
30 connected to utility services constructed under the agreement over a specified period. The
31 portion of the advance, that is not refunded, is considered a contribution in aid of construction
32 (CIAC) at the time it becomes nonrefundable. CIACs are amortized as a reduction of
33 depreciation expense over the estimated remaining life of the utility plant.
