TARIFF FORMAT

- A. Sheet Numbering – Sheet numbers appear in the upper-right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between existing sheets with whole numbers, a decimal is added. For example, a new sheet added between Sheets 14 and 15 would be Sheet 14.1.
- B. Sheet Revision Numbers – Revision numbers also appear in the upper-right corner of the sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, 4th Revised Sheet 14 cancels 3rd Revised Sheet 14.
- C. Paragraph Numbering Sequence – This tariff contains various levels of paragraph coding. Each level of coding is subservient to its next higher level of coding. For example,
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a)
- D. Check Sheets – When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the Commission.

SECTION 3 – DESCRIPTION OF SERVICE AND RATES

3.1 Timing of Calls

The customer's monthly usage charges for Carrier service are based upon the total number of minutes the customer uses and service options subscribed to. There are no charges incurred if a call is not completed.

3.2 Start of Billing

For billing purposes, the start of service is the day first day on which service is available for use by the customer. The end of service date is the last day on which service was provided by the Carrier after notification of cancellation.

3.3 Interconnection

Service furnished by Carrier may be interconnected with services or facilities of other authorized communications common carriers and with private systems, subject to the technical limitations established by Carrier. Service furnished by Carrier is not part of a joint undertaking with such other carriers. Any special interface equipment of Carrier and other participating carriers shall be provided at the customer's expense.

Interconnection with the facilities or services of other carriers shall be under the applicable terms and conditions of other carriers' tariffs. The customer is responsible for taking all necessary legal steps for interconnecting his customer – provided terminal equipment or communication systems with Carrier's. The customer shall secure all licenses, permits, right-of-ways, and other arrangements necessary for such interconnection.

The company uses the rate centers and associated vertical and horizontal coordinates that are generally accepted within the industry.

Formula:

$$\frac{\sqrt{(V1-V2)^2 + (H1-H2)^2}}{10}$$

The customer can expect a call completion rate of 99% of calls attempted during peak use periods.

3.7 Special Services

3.8.2 Inbound Service (8XX)

The Company will accept a prospective inbound service customer's request for up to ten (10) toll free telephone numbers and will reserve such number(s) on a first serve basis.
