Docket No. E-01345A-07-0663 and Docket No. T-01846B-07-0663

Dear Sir or Madam:

I wish to voice my support for the conversion of the utilities to underground in the Hillcrest Bay development. As an owner in Hillcrest Bay, I strongly urge you to approve the conversion to the underground systems. My property has one of the best views in the area with no power poles or wires blocking our view. In addition because of a long driveway I have the most expensive conversion costs in the entire Hillcrest Bay development and I'm still willing to pay to have the utilities converted to underground. This is for the betterment of the entire community. This will allow many of the homes to capture the true beauty of their views unencumbered by the unsightly wires and poles. I firmly believe that this will increase all of our property values in the long term. This will benefit those that support the conversion and those that do not. All of us will win. Even those that can not afford this conversion now have options through community assistance and long term financing to make this an affordable, worthy project for the long term betterment of the community.

The utility poles and wires are unsightly and a hazard. Many of the poles are rotten and unstable. However the main concern is for the beauty of the community. Owning another home in a community that has all underground utilities and then returning to Hillcrest to see all the poles and wires is sad and undervalues the unique location of Hillcrest Bay.

I strongly urge you to approve the underground conversion

Sincerely,

Roger and Sally Shore
