 17 TESTIMONY**

18 Far West Water & Sewer Company hereby submits this Notice of Filing Rebuttal
 19 Testimony in the above-referenced matter. Specifically filed herewith is Far West's
 20 rebuttal filing, which includes the following testimonies, along with supporting schedules
 21 and/or exhibits:

- 22 1. Rebuttal Testimony of Thomas J. Bourassa; and
- 23 2. Rebuttal Testimony of Andrew J. Capestro.

24 DATED this 31st day of March, 2009.

I. INTRODUCTION, PURPOSE OF TESTIMONY.....1
II. SUMMARY OF THE POSITIONS OF THE PARTIES2
III. FAR WEST’S CURRENT FINANCIAL CONDITION3
IV. REBUTTAL TO THE TESTIMONY OF RUCO WITNESS WILLIAM A RIGSBY11
V. REBUTTAL TO THE STAFF REPORT19

2180450.2

1 **I. INTRODUCTION, PURPOSE OF TESTIMONY.**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 A. My name is Thomas J. Bourassa and my business address is 139 W. Wood Drive,
4 Phoenix, AZ 85029.

5 **Q. HAVE YOU PREVIOUSLY SUBMITTED DIRECT TESTIMONY IN THE**
6 **INSTANT CASE?**

7 A. Yes, my direct testimony was submitted in support of the Far West Water and
8 Sewer Company ("Far West" or the "Company") Emergency Application for
9 Interim Rates and Charges for its sewer division filed on December 19, 2008. I am
10 also the finance, rates and accounting witness in the Far West Sewer's pending but
11 now stayed permanent rate case, Docket No. WS-03478A-08-0454. I also testified
12 in the Company's last rate case for the sewer division, and assisted with its
13 financing application, which was approved by the Commission in Decision No.
14 69950 (October 30, 2007). I am very familiar with the Company's current
15 financial picture.

16 **Q. WHAT IS THE PURPOSE OF THIS REBUTTAL TESTIMONY?**

17 A. I will provide rebuttal testimony in response to the direct filings by the Residential
18 Utilities Consumer Office ("RUCO") and the Arizona Corporation Commission
19 Utilities Division Staff ("Staff"). In doing so, I will provide further information for
20 the ALJ and Commission on the Company's current financial picture, and I will try
21 to convey the seriousness of the issues before the Commission in this emergency
22 rate case.

23 **Q. HOW WILL YOUR TESTIMONY BE ORGANIZED?**

24 A. First, I will summarize the positions of the parties at this stage of the proceeding.
25 Second, I address the Company current financial situation as well as the expected
26 financial picture if the Company does not receive interim rate relief for its sewer

1 division. Third, I will respond to the direct testimony of RUCO's witness William
2 A. Rigsby.¹ Fourth and finally, I will respond to Staff's recommendations in this
3 docket.²

4 **II. SUMMARY OF THE POSITIONS OF THE PARTIES.**

5 **Q. PLEASE SUMMARIZE THE POSITIONS OF THE PARTIES.**

6 A. The Company continues to recommend an interim increase of \$2,161,788 over
7 adjusted test year revenues, a 101.95 percent, for its sewer division. The
8 Company's request is less than half of the rate increase of \$4,595,748, or 214.76
9 percent, requested in its permanent rate application currently pending before the
10 Commission.³ This means the Company is asking for less than it actually needs to
11 recover its cost of service and is seeking no return whatsoever of or on its
12 investment.

13 RUCO recommends that the Commission deny all interim rate relief.⁴
14 RUCO also recommends that the Commission continue the suspension of the time
15 clock on the Company's pending but now stayed permanent rate application until a
16 full 12-month period after all the wastewater improvements ordered by ADEQ are
17 placed into service.⁵ Thereafter, RUCO recommends that the Company be forced
18 to update its permanent rate application using a more current test year before being
19 allowed to continue with its permanent rate case.⁶ This would leave the Company

20 ¹ Direct Testimony of William A. Rigsby ("Rigsby Dt.").

21 ² See Staff Report dated March 24, 2009 ("Staff Report")

22 ³ The Company has proposed a 3 year phase-in of the requested rate increase in its permanent rate
23 application. The Company's proposed Phase One revenue increase is \$2,807,676 over adjusted
24 test year revenues, or 131.2 percent. The Phase Two revenue increase is \$3,685,023 over
25 adjusted test year revenues, or 172.2 percent. The Phase Three increase is \$4,595,748 over
26 adjusted test year revenues, or 214.76 percent.

⁴ Rigsby Dt. at 5.

⁵ *Id.* at 6.

⁶ *Id.*

1 without rate relief for another two years or more, assuming Far West can bring the
2 plant on line immediately. Mr. Capestro discusses the impact of RUCO's
3 recommended delay in the permanent rate case in his rebuttal testimony.

4 Staff also recommends that the Company's request for an interim rate
5 increase be denied.⁷ However, if the Commission decides an interim rate increase
6 is warranted, Staff recommends an interim rate increase of \$972,150, or 46.3
7 percent. Staff's indecisive position would leave the Company's problems
8 unresolved.

9 **III. FAR WEST'S CURRENT FINANCIAL CONDITION**

10 **Q. PLEASE DESCRIBE FAR WEST'S CURRENT FINANCIAL PICTURE.**

11 A. The Company finds itself unable to cash flow operating expenses, pay current
12 obligations, and complete required sewer system improvements. This was the
13 reason why the Company filed for interim rates last December, 2008.⁸ However,
14 the situation has become critical, and the Company's ability to serve both its
15 approximately 15,000 water customers and approximately 7,000 sewers customers
16 is in jeopardy.

17 **Q. WHAT CAUSED THE COMPANY'S CURRENT FINANCIAL CONDITION**
18 **TO DETERIORATE?**

19 A. Put simply, the Company's current revenues are inadequate to cover the sewer
20 division's operating expenses. On top of that, the Company has been paying debt
21 service on the \$25 million of bonds since December 2007, which were issued to
22 finance the improvements mandated by ADEQ. Then, the Company ran into
23 higher than anticipated costs to complete the sewer system improvements. This

24 _____
25 ⁷ Staff Report at 4.

26 ⁸ See Direct Testimony of Thomas J. Bourassa in Support of Interim Rates ("Bourassa Dt.") at 2-3.

1 includes not only increased capital costs, but more than \$500,000 a year of effluent
2 removal costs that are necessary while the sewer improvements are in progress.⁹
3 As a result, the Company cannot complete the plant needed to comply with the
4 ADEQ orders.

5 **Q. WHY CAN'T THE COMPANY PAY THE REST OF THE COSTS OF THE**
6 **PLANT UPGRADE ORDERED BY ADEQ?**

7 A. The Company has utilized all of the available unrestricted cash from the IDA bond
8 proceeds for the wastewater system improvements and has virtually no
9 construction and operating cash reserves. At the end of 2008, the Company had
10 amassed over \$3.46 million in accounts payable – most of which is directly related
11 to construction of the sewer system improvements. Its operating cash balance was
12 approximately \$14,000 and its construction cash balance was less than \$240,000.¹⁰
13 Adding to the cash flow crunch is the fact that the Company needs to expend about
14 \$2.3 million to complete the sewer system improvements. Finally, the Company
15 must pay annual debt service of \$1.9 million. Together, these short-term
16 obligations generate a cash need of \$7.66 million. However, based on the 2008
17 financial statement for the Company, the cash flow provided by operations in 2009
18 will be less than \$2.9 million.¹¹ Ultimately, there is an immediate cash need for at
19 least \$4.76 million for the Company to complete its sewer system improvements
20 and pay its current obligations when they come due.

21
22 ⁹ Rebuttal Testimony of Andrew J. Capestro (“Capestro Rb.”) at 5-6.

23 ¹⁰ The Company also had approximately \$1.6 million of bond debt reserve funds at the end of
2008. This is addressed later in this section of this testimony.

24 ¹¹ Based on the 2008 financial statements, the cash flow from operations is operating income of
25 \$1,441,403 plus depreciation of \$1,423,338 plus income taxes of \$0. The \$2.9 million does not
26 include temporary effluent removal costs of over \$500,000 (included below the line in
extraordinary deductions) expected to be incurred in 2009. As such, the actual cash flow from
operations is closer to \$2.4 million.

1 Q. THE COMPANY IS REQUESTING AN INTERIM RATE INCREASE OF
2 APPROXIMATELY \$2.16 MILLION, LESS THAN HALF OF THE \$4.76
3 MILLION CASH SHORT-FALL. WOULD THE COMPANY'S INTERIM
4 RATE INCREASE SOLVE THE COMPANY'S PROBLEM?

5 A. Not by itself. The Company will need to seek some additional short-term
6 financing.

7 Q. DOES THE COMPANY CURRENTLY HAVE THE ABILITY TO OBTAIN
8 SHORT-TERM FINANCING TO MAKE UP THIS DIFFERENCE?

9 A. Not without meaningful interim rate relief. The Company's inability to borrow,
10 even in the short-term, is exacerbated by the fact that the Company already has
11 over 85 percent debt in its capital structure. But it has no other choice if it wishes
12 to fund the remaining plant improvements.¹²

13 Q. SO, WHAT YOU ARE SAYING IS THAT THE COMPANY HAS A NEED
14 FOR AN ADDITIONAL \$4.76 MILLION OF CASH WITHIN THE NEXT 12
15 MONTHS?

16 A. Actually, sooner than that. When we go to hearing in April, we will be into the
17 fourth month of 2009, and the obligations mentioned above will all come due well
18 before the end of 2009. The accounts payable balance of \$3.46 million is a very
19 short-term obligation.¹³ The additional \$2.3 million is needed well before the end
20 of 2009. Plus, the debt service of \$1.9 million has to be paid in 2009.

21 Q. COULDN'T THE COMPANY POSTPONE THE REMAINING SEWER
22 SYSTEM IMPROVEMENTS TO CONSERVE CASH?

23 A. Unfortunately, the Company cannot postpone the sewer system improvements to
24 eliminate the need for additional cash in the short-term. The sewer system

25 ¹² Capestro Rb. at 7.

26 ¹³ Accounts payable typically has 30 day terms.

1 improvements are the result of two consent orders the Company entered into with
2 ADEQ, and are required to bring much of the plant that has already been
3 constructed on line.¹⁴ But, even if it could, it still has to address the \$3.46 million
4 of short-term payables and pay its annual debt service of over \$1.9 million.
5 Together, these obligations require \$5.36 million of cash in the short-term, which is
6 still \$2.46 million above the operating cash flow of \$2.9 million. This does not
7 take into account the \$500,000 of effluent removal expenses the Company must
8 incur until the plant improvements are brought on line.

9 **Q. DOES THIS SITUATION AFFECT THE COMPANY AS A WHOLE, OR**
10 **JUST THE SEWER DIVISION?**

11 A. It affects the entire Company, including its water utility customers. The cash needs
12 described above ignore the fact that the water division needs to make roughly \$19
13 million of capital improvements to adequately serve its water customers.¹⁵

14 **Q. THEN WHY IS THE COMPANY'S INTERIM RATE REQUEST FOCUSED**
15 **SOLELY ON THE NEEDS OF THE SEWER DIVISION?**

16 A. The sewer division is the primary cause of the current financial dilemma the
17 Company finds itself in. Approximately \$21 million of the \$25.2 million of long-
18 term debt is directly attributed to the sewer division (about 83 percent of the total
19 debt incurred). The portion of the debt service attributable to the sewer division is
20 nearly \$1.6 million.¹⁶ Over \$3.1 million of the \$3.4 million of accounts payable is
21 directly attributable to the sewer division.¹⁷ Plus, as I have testified, the Company
22 needs to expend more than \$2 million to finish the sewer plant improvements. In

23 ¹⁴ See Direct Testimony of Gary M. Lee ("Lee Dt.").

24 ¹⁵ Capestro Rb. at 9-10.

25 ¹⁶ 83 percent of \$1.9 million.

26 ¹⁷ Over \$2.8 million of the \$3.1 sewer division accounts payable is comprised of construction payables for sewer plant improvements.

1 total, the sewer division alone needs at least \$7 million of cash within the next 12
2 months. Yet, based on 2008 sewer division results, the expected sewer division
3 operating cash flow for 2009 is a negative \$67,000.¹⁸

4 **Q. DID YOU PREPARE A 2009 PROJECTED CASH FLOW FOR THE**
5 **ENTIRE COMPANY?**

6 A. Yes. A 2009 projected cash flow for the Company was prepared and provided in
7 response to Staff data request GWB 4.2 and is attached hereto as Rebuttal Exhibit
8 2. As the projected cash flow statement shows, the projected cash flows from
9 operations are actually a negative \$2.5 million rather than the positive \$2.9 million
10 mentioned above.

11 **Q. WHY IS THIS DIFFERENT THAN THE \$2.9 MILLION YOU**
12 **MENTIONED EARLIER?**

13 A. Because the projected statement of cash flows is a more comprehensive analysis of
14 cash flows and uses the net income of the Company as a starting point rather than
15 operating income, which is the correct methodology in performing a cash flow
16 analysis. It also contemplates paying down the \$3.46 million of short-term
17 payables, which is ignored by a simple operating cash analysis that merely adds
18 together operating income, depreciation and amortization, and income taxes. The
19 simplified operating cash flow analysis masks the true cash flow problem. The
20 projected cash flow statement shows the Company's projected operating cash flow
21 to be a negative \$2.5 million in 2009. After consideration of the principle payment
22 of debt and additional construction expenditures, the Company is projected to have
23

24 ¹⁸ Unaudited financial statements for the Company are attached hereto as Rebuttal Exhibit 1.
25 These schedules have been previously provided to Staff and RUCO. Based on the 2008 financial
26 information for the sewer division, the cash flows from operations is equal to (\$67,527), based on
operating income of (\$666,299) plus depreciation and amortization of \$598,772 and income taxes
of \$0.

1 a negative cash flow of over \$6.4 million in 2009. In my opinion, there is no way
2 any business the size of Far West can continue to operate in the face of such
3 negative cash flow without the entity compromising its ability to perform its
4 business functions, in this case water and sewer utility service.

5 **Q. WHAT ABOUT THE OVER \$1.6 MILLION IN BOND DEBT RESERVE**
6 **FUNDS ON THE 2008 BALANCE SHEET AT THE END OF 2008? COULD**
7 **THE BOND DEBT RESERVE FUNDS BE USED TO HELP SOLVE THE**
8 **COMPANY'S LIQUIDITY PROBLEM?**

9 A. No. This fund must be used solely for the payment of the principal of and interest
10 on the bonds when (whether at maturity, upon a redemption date or any interest
11 payment date) other funds available for such purposes are insufficient. However, if
12 the Debt Service Reserve Fund should ever contain less than the total Required
13 Reserve, monthly deposits in amounts equal to not less than one-sixth (1/6) of the
14 deficiency in the then Required Reserve must be made to the Debt Service Reserve
15 Fund on or before the 25th day of each month until the Required Reserve has been
16 fully restored. In other words, the fund must be restored within a six month period
17 if it is used. Consequently, this fund cannot be used for debt service for any
18 extended period, unless the Company wants to risk what appears to me (admittedly
19 a non-attorney) to be a default under the bonds. Besides, even if the bond reserve
20 funds could be used to help solve the liquidity problem, the Company would still
21 be short by \$4.8 million.

22 **Q. DOES A DEBT SERVICE COVERAGE RATIO COMPUTATION**
23 **INDICATE THE COMPANY CAN CASH FLOW ITS DEBT SERVICE?**

24 A. Ironically, yes.¹⁹ Based on the 2008 financial results, the debt service coverage
25

26 ¹⁹ See Rebuttal Exhibit 2 (cash flow schedule).

1 ratio (“DSC”) as typically computed by Staff is 1.49.²⁰ By this measure, it appears
2 that the Company can cash flow the debt service on the IDA bonds. However, the
3 DSC is misleading, at least in the short-term. In terms of liquidity, the current
4 financial picture is bleak. The “current ratio,”²¹ a measure of liquidity, based on
5 the 2008 financial results is 0.71.²² A more stringent measure of liquidity is the
6 “acid-test ratio”²³ which at the end of 2008 was a mere 0.06.²⁴ The liquidity ratios
7 and the inability of the Company to raise cash in the short-term without rate relief
8 tell the real current financial picture of this Company. If this does not constitute an
9 emergency, I do not know what does.

10 **Q. WHAT DO YOU UNDERSTAND THE CRITERIA TO BE FOR AN**
11 **EMERGENCY MR. BOURASSA?**

12
13 ²⁰ The calculation is 2008 cash flow from operations of \$2,864,741 divided by debt service of
14 \$1,916,250. In this way, DSCR is an indicator of the amount of cash flow available to meet
15 annual interest and principal payments on debt, including sinking fund payments. It is computed
16 by dividing the earnings before interest, taxes, depreciation and amortization (“EBITDA”) or
17 operating income by the annual debt service. A DSCR of greater than 1.0 indicates that there is
18 enough operating cash flow to cover the debt service and, conversely, a DSCR of less than 1.0
19 indicates that there is insufficient cash flow to service debt. Typically, loan covenants
20 requirement minimum debt service coverage ratios of 1.2 to 1.25 to provide a margin of safety.

17 ²¹ The **current ratio** is a measure of liquidity and measures whether or not a company has enough
18 resources to pay its debts over the next 12 months. It compares a company’s current assets to its
19 current liabilities. The higher the current ratio, the more capable the company is of paying its
20 obligations. A ratio under 1.0 suggests that the company would be unable to pay off its
21 obligations when they become due. While this shows the company is not in good financial
22 health, it does not necessarily mean that it will go bankrupt if the company has access to
23 financing - but it is definitely not a good sign. However, Far West does not have any means to
24 additional financing – short-term or long-term.

21 ²² Current assets of \$3,165,836 divided by current liabilities of \$4,445,590.

22 ²³ The **acid test ratio** is another measure of liquidity but is a more stringent test than the current
23 ratio. The acid test ratio indicates whether a firm has enough short-term assets to cover its
24 immediate liabilities. It compares cash, receivables, and short-term investments with current
25 liabilities. An acid test ratio of less than 1.0 indicates the company cannot pay its short-term
26 obligations. Obviously, it is vital that a company have enough cash on hand to meet accounts
payable, property and income taxes, interest, and other bills when they become due.

²⁴ Cash and cash equivalents of \$251,546 divided by current liabilities of \$4,445,590. Bond debt
reserve funds of \$1.6 million are ignored because this fund must be replenished within 6 months.

1 A. Staff has proposed three factors: (1) sudden change that causes hardship, (2)
2 insolvency, and (3) doubt over whether service can be maintained pending the
3 completion of a permanent case.²⁵ If any one of these conditions is met, there is an
4 emergency.²⁶ It seems to me that condition 1 is clearly met. As far as the second
5 condition, I am not sure what Staff's definition of "insolvent" is but I do know that
6 Far West is unable to pay all of its bills when they become due and has \$3.4
7 million of accounts payable. And condition 3 also seems to be met, given the
8 impact that the Company's finances will have on its ability to provide reliable
9 service over the next 12 months. I don't believe the Commission has to wait until a
10 utility has gone under to grant relief. By then it is too late. Is delayed rate relief
11 really a sufficient reason for risking water and sewer service to thousands of
12 customers?

13 **Q. DIDN'T THE COMMISSION STAFF AND THE COMMISSION ITSELF**
14 **RECOGNIZE THAT THE SEWER SYSTEM IMPROVEMENTS THAT**
15 **WERE NEEDED WOULD HAVE AN IMPACT ON RATES?**

16 A. Yes. In the Company's prior case, it was recognized that the sewer division's plant
17 needed substantial improvement. As Mr. Capestro explains, none of this should
18 come as a surprise.²⁷ I further agree with him that this should really be viewed as
19 the first step of a four phase rate increase to cover the costs of more than \$20
20 million of improvements ordered by the State of Arizona.²⁸

21
22
23 _____
24 ²⁵ Staff Report at 2.

25 ²⁶ See Attorney General Opinion 71-17.

26 ²⁷ Capestro Rb. at 7-8.

²⁸ *Id.* at 23.

1 **IV. REBUTTAL TO THE TESTIMONY OF RUCO WITNESS WILLIAM A**
2 **RIGSBY**

3 **Q. PLEASE COMMENT ON MR. RIGSBY'S TESTIMONY THAT THE**
4 **FINANCIAL ANALYSIS OF THE COMPANY'S INTERIM RATE**
5 **REQUEST BE DONE ON A COMPANY-WIDE BASIS.**

6 A. I don't necessarily disagree. But a "company-wide" picture must not be allowed to
7 mask the real problems Far West and its customers face right now. Whether an
8 analysis is performed on a company-wide basis or for the sewer division alone, the
9 conclusion is the same: Far West has a very serious cash flow problem that
10 qualifies as an emergency. The only available remedy is interim rate relief for the
11 sewer division.

12 **Q. WHY CAN'T THE WATER DIVISION CONTINUE TO SUBSIDIZE THE**
13 **SEWER DIVISION AS RUCO PROPOSES?**

14 A. Because the water division has been carrying the sewer division financially, water
15 system improvements are being delayed. Put simply, the water division is now on
16 the same troubled ship as the sewer division. This is why one customer group
17 should not subsidize the costs of service to another group of customers. Both
18 groups face the prospect of inadequate and deteriorating service. Given that about
19 half of Far West's water customers do not receive sewer service, this is a risk that
20 those water customers should not have to shoulder.

21 It is ironic that Mr. Rigsby's has no problem with the water division
22 subsidizing the sewer division. In the past, RUCO has argued that cross-
23 subsidization is unfair to rate payers.²⁹ In the Arizona Water Company case
24 (Decision No. 64282), for example, RUCO argued that cross-subsidization would

25 ²⁹ *E.g. Arizona Water Company*, Decision No. 66400 (October 14, 2003) and *Arizona Water*
26 *Company* Decision No. 64282 (December 28, 2001).

1 result in inequities between customer groups.³⁰ RUCO also opposed rate
2 consolidation in a later Arizona Water Company case (Decision No. 64440),
3 arguing that rate consolidation would cause customers on one system to subsidize
4 customers served by another system.³¹ In that case, RUCO witness, Marylee Diaz-
5 Cortez, testified that one system was the biggest “cost causer” of arsenic treatment
6 costs, and customers on that system should not be subsidized by customers on
7 another system.³²

8 Yet in this case, RUCO has no problem having the water division customers
9 subsidize the sewer division customers. I wonder whether the more than 7,500 or
10 so residential water customers who do not receive sewer service from Far West
11 agree with RUCO’s position.

12 **Q. BUT WASN’T RUCO’S POSITION ON CROSS-SUBSIDIZATION BASED**
13 **ON CONSOLIDATED RATES ACROSS MULTIPLE DIVISIONS?**

14 **A.** Yes, but the underlying rationale for RUCO’s opposition is unaffected. As Ms.
15 Diaz-Cortez argued, the “cost causer” should not be subsidized by customers on
16 another system. Clearly, the water and sewer customers of the Company are
17 served by separate systems, they have separate rate bases, and they are not even the
18 same customer groups. As stated, about half of Far West’s water customers do not
19 receive sewer service. RUCO’s reasoning and argument applies equally to the
20 situation in the Arizona Water Company cases and to the current situation for the
21 Company and its two divisions.

22 **Q. PLEASE RESPOND TO MR. RIGSBY’S COMMENTS THAT ALL OF THE**
23 **SEWER IMPROVEMENTS HAVE NOT YET BEEN COMPLETED.**

24 ³⁰ Decision No. 84282 at 20.

25 ³¹ Decision No. 64440 at 12.

26 ³² *Id.*

1 A. While a significant portion of the sewer system improvements have been
2 completed, the Company's interim rate request is not based on whether the plant
3 has been completed. Rather, it is based on the Company's inability to currently
4 cash flow its obligations, which jeopardizes its ability to maintain service to both
5 its water and sewer customers until permanent rate relief is granted. Thus,
6 RUCO's argument on whether all of the sewer system improvements are
7 completed muddles the real issue at hand. Again, the real issue is the Company's
8 inability to pay its bills, complete the sewer improvements, and continue to
9 maintain adequate service to its water and sewer customers.

10 **Q. PLEASE COMMENT ON MR. RIGSBY'S FINANCIAL ANALYSIS OF**
11 **THE COMPANY FINANCIAL SITUATION.**

12 A. Mr. Rigsby's financial analysis does not recognize the serious liquidity problem the
13 Company finds itself in today. The metrics that should be used to evaluate the real
14 problem facing the Company are the current ratio, the acid test ratio, and a
15 comprehensive analysis of the cash flow needs of the Company over the next 12
16 months. I will not repeat the financial picture revealed by those metrics, as I have
17 illustrated it in great detail above. But any person taking an unbiased view of the
18 facts here could not legitimately dispute that the Company needs additional cash
19 flow immediately.

20 **Q. DO YOU DISPUTE THE DSC RATIOS COMPUTED BY MR. RIGSBY?**

21 A. Yes, largely because Mr. Rigsby computes several ratios which are based upon
22 erroneous assumptions. I will address his computations, but let me first emphasize
23 that a discussion and analysis strictly based on a simple DSC itself does not
24 provide an accurate picture. A DSC does not analyze the true nature of the
25 problem facing the Company - inadequate actual cash flow. A computed DSC of
26 1.0 or above does not measure the Company's ability to pay its obligations as they

1 become due. A current ratio, acid test ratio and a comprehensive cash flow
2 analysis do.

3 Putting that error aside, Mr. Rigsby computed DSC ratios based on the
4 Company's 2007 and 2008 financial statements using an analysis similar to what
5 the Commission Staff performed in the Company's financing proceeding in 2007.³³
6 He computed DSC ratios for 2007 and 2008 of 1.49 and 1.35, respectively.³⁴ I
7 computed the similar ratios earlier in my testimony. Thus, I do not dispute Mr.
8 Rigsby's computed ratios based on the 2007 and 2008 financial statements.

9 Next, in response to the Company pointing out that a simple DSC does not
10 consider extraordinary expenses like effluent removal costs, Mr. Rigsby computed
11 a modified DSC of 0.99.³⁵ Mr. Rigsby acknowledges a DSC of 0.99 is
12 problematic.³⁶ This is because it shows the Company does not have sufficient cash
13 flows from operations to cash flow debt service. But, Mr. Rigsby's then dismisses
14 this DSC result by claiming the Company has \$635,231 of interest income as an
15 alternative source of cash.³⁷ He then erroneously adds this income back to get a
16 DSC of 1.47.³⁸

17 **Q. WHAT IS THE PROBLEM WITH THIS ANALYSIS?**

18 A. First, the interest income from 2007 should not be considered because it no longer
19 exists and will not exist in the future.³⁹ In fact, for 2008, interest income dropped
20 to less than \$163,000. All of bond proceeds have been expended and are no longer

21 ³³ Rigsby Dt. at 14.

22 ³⁴ *Id.* at 15.

23 ³⁵ *Id.* at 16.

24 ³⁶ *Id.*

25 ³⁷ *Id.* at 17.

26 ³⁸ *Id.* at 17.

³⁹ Capestro Rb. at 13-14; Staff Report at 2-3.

1 available to generate interest.⁴⁰ Mr. Rigsby admits the interest income was earned
2 on unexpended bond proceeds which will not exist when these funds are
3 expended.⁴¹ At the same time, the level of extraordinary expenses (effluent and
4 legal) experienced in 2007 continued into 2008, and is expected to continue
5 through at least through 2009. So, Mr. Rigsby's DSC of 0.99 for 2008 is much
6 closer to reality right now than his DSC of 1.47 computed with phantom interest
7 income.

8 **Q. DOESN'T MR. RIGSBY QUESTION WHETHER THERE ARE COST**
9 **OVERRUNS ON THE SEWER SYSTEM IMPROVEMENTS AS WELL AS**
10 **THE NEED FOR IMMEDIATE CAPITAL IMPROVEMENTS FOR THE**
11 **WATER DIVISION?**

12 A. Remarkably, yes. But I see no evidence for this testimony, and the statement is
13 wrong.⁴² Just as important, and another critical aspect of the Company's cash flow
14 problem, is the \$3.46 million of short-term accounts payable at the end of 2008 that
15 I have mentioned several times. Mr. Rigsby completely ignores this fact. These
16 payables are very real and require real cash to pay them. As I testified earlier, even
17 if you dismiss the additional costs to complete the sewer system improvements,
18 there still is insufficient cash over the next 12 months to pay down these payables.

19 Mr. Rigsby has analyzed the wrong problem using the DSC and has ignored
20 or dismissed critical aspects of a comprehensive cash flow analysis. As a result, he
21 completely misses the mark on the Company's current financial predicament. In
22 his world, as long as the DSC is over 1.0, all is well, regardless of the business'
23 current needs.

24 ⁴⁰ Capestro Rb. At 13-14; *See also* Rebuttal Exhibit 1.

25 ⁴¹ Rigsby Dt. at 18.

26 ⁴² Capestro Rb. explained at 12-13.

1 **Q. PLEASE COMMENT ON MR. RIGSBY'S TESTIMONY THAT THE**
2 **COMPANY HAS NOT DEMONSTRATED THAT AN EMERGENCY**
3 **EXITS.**

4 A. Mr. Rigsby first cites the criteria set forth by the Attorney General concerning
5 when the Commission can approve interim rates.⁴³ One of those criteria is that an
6 emergency exists. As quoted by Mr. Rigsby and according to the Attorney General,
7 "an emergency exists when sudden change brings sudden hardship to a company,
8 when a company is insolvent, or when the condition of the company is such that its
9 ability to maintain service pending a pending formal rate determination is in
10 serious doubt."⁴⁴ These are the same three conditions listed on page 2 of the Staff
11 Report. As I testified earlier, conditions one and three are satisfied, and if the
12 Company is not yet insolvent, I don't believe it good public policy to drive utilities
13 into insolvency by delaying rate relief. By then, it is too late to proactively address
14 the problem.

15 **Q. WASN'T THE COMPANY GRANTED INTERIM RATE RELIEF FOR ITS**
16 **WATER DIVISION IN A PRIOR CASE?**

17 A. Yes. In Decision No. 61833 (July 20, 1999) (copy attached as Rebuttal Exhibit 3),
18 the Commission granted the Company's water division interim rates to provide
19 adequate cash flow to obtain financing for the construction of approximately \$6
20 million of new water treatment facilities. In that case the Company requested
21 interim rate relief at roughly half of the amount it was seeking in its permanent rate
22 filing (about \$2.5 million). The interim rate increase was sought because changes
23 in operating expenses and anticipated debt service requirements from new debt
24 would have prevent it from obtaining debt financing. In that case, as here, Far

25 ⁴³ Rigsby Dt. at 20.

26 ⁴⁴ *Id.*

1 West was constructing the water treatment plant, but required additional financing
2 to complete the facilities. After interim rates were approved, the Company was
3 able to borrow funds from WIFA and complete the plant prior to the hearing on the
4 permanent rate case.

5 **Q. DOESN'T THAT SOUND A LOT LIKE THE FACTS OF THIS CASE, MR.**
6 **BOURASSA?**

7 A. Yes. While the Company has already obtained long-term debt financing in the
8 instant case, which is different than the prior case, increased operating expenses
9 and higher costs of construction have resulted in the Company's inability to cash
10 flow debt service and to pay its operating costs and other current obligations, which
11 are similar to the prior case. But I believe the situation in this case is far more
12 serious. Because they cannot borrow any more money, Far West is trying to pay
13 for the improvements from cash flow, which limits the use of such funds to pay
14 other expenses.

15 In the prior case, the water treatment facilities were not mandatory. The
16 Company had a serious problem with high levels of total dissolved solids ("TDS")
17 affecting the taste and causing scale deposits on plumbing fixtures and filters and
18 problems with appliances.⁴⁵ But the Company's water met all federal and state
19 water quality standards. Customers just demanded better quality water. In this
20 case, the Company sewer system improvements are mandatory, and they cannot be
21 completed because the Company's cash flow is so poor.⁴⁶

22 **Q. DID RUCO TESTIFY THAT THERE WAS AN EMERGENCY IN THE**
23 **COMPANY'S PRIOR CASE?**

24 A. Yes. RUCO supported the Company recommendation for interim rates, albeit at a

25 ⁴⁵ Decision No. 61833 at 2.

26 ⁴⁶ Capestro Rb. at 6.

1 lower amount, and based its recommendation on the Attorney General's criteria for
2 authorizing interim rates.⁴⁷ In fact, in support of its recommendation to approve
3 interim rates in Decision No. 61833, RUCO cited a 1984 APS interim rate
4 decision⁴⁸ that involved similar circumstances. Both cases involved extensive
5 construction projects, large debt issuances, and a cash flow problem associated
6 with the debt issuances during the construction period.

7 In this case, as a result the construction of the new wastewater treatment
8 facilities, Far West's rate base for its sewer division will be about 15 times greater
9 than the rate base approved in the sewer division's last rate case, which was
10 decided just two years ago. And, as I have shown earlier in my testimony, there is
11 a serious cash flow problem related to debt service associated with this
12 construction project, which is not only preventing the completion of construction,
13 but preventing the Company from paying its operating expenses and its short-term
14 payables in the normal course of business.

15 **Q. IS THE COMPANY ATTEMPTING TO REDEFINE THE REGULATORY**
16 **PARADIGM IN ARIZONA BY ITS INTERIM RATE REQUEST?**

17 A. With all due respect, this is nonsense given Far West's circumstances. Interim rate
18 relief is an important aspect of regulation, as the interim rate increases granted to
19 APS last year illustrates. APS received interim rates to shore up its credit rating,
20 which in the long-run will lower financing costs and save rate payers money. But,
21 because Mr. Rigsby believes Far West's circumstances do not rise to the level of an
22 emergency, he obfuscates the issue at hand by making assertions about the
23 Company (and other utilities) attempting to circumvent the rate making process at
24 the expense of rate payers. This is misleading and should be rejected as bad policy.

25 ⁴⁷ Decision No. 61833 at 5.

26 ⁴⁸ *Id.* at 5 (discussing Decision No. 53909 (Jan. 30, 1984)).

1 **V. REBUTTAL TO THE STAFF REPORT**

2 **Q. PLEASE COMMENT ON STAFF'S CONCLUSION THAT NEGATIVE**
3 **NET INCOME DOES NOT NECESSARILY REPRESENT AN**
4 **EMERGENCY?**

5 A. I agree with Staff on this point.⁴⁹ It is true that the Company (combined water and
6 sewer divisions) lost over \$809,000 in 2008, over \$630,000 in 2007, and \$1.2
7 million in 2006, respectively.⁵⁰ While this is certainly not good for the Company's
8 financial health, those losses by themselves do not constitute an emergency. But
9 they are indicative of a lack of revenues sufficient to meet operating expenses,
10 which situation is not sustainable. At some point, these losses impact cash flows,
11 especially when the utility is forced to undertake a major construction project and
12 needs additional funds to support that project (e.g., debt service) in addition to
13 meeting ordinary expense requirements. In other words, although past and
14 continuing negative net income is not why there is an emergency, those losses
15 effectively set the stage for the Company's current cash flow problems. As I have
16 testified, this cash flow problem has been primarily caused by borrowing \$25.2
17 million and the related debt service, and by construction cost overruns that require
18 additional funding.

19 Like RUCO, Staff offers no way of that dilemma. Postponing rate relief is
20 obviously not the answer. It will simply exacerbate the Company's losses, delay
21 completion of the plant and ultimately require larger increases to maintain the
22 Company's solvency and allow it to continue to operate. As I previously
23 discussed, this is the same situation that Far West faced in 1999, when it was

24 _____
25 ⁴⁹ Staff Report at 3.

26 ⁵⁰ The sewer division losses for 2008, 2007, and 2006 were approximately \$2.58 million, \$2.8 million and \$1.2 million, respectively.

1 converting from groundwater to Colorado River water, and needed interim rate
2 relief to obtain permanent debt financing from WIFA and to complete the new
3 surface water treatment facilities.

4 **Q. WHAT POSITION DID STAFF TAKE ON THE COMPANY'S 1999**
5 **REQUEST FOR INTERIM RATE INCREASES?**

6 A. In contrast to RUCO, Staff opposed interim rate relief. Staff's position was
7 essentially the same as in this case. Staff argued that the Company's income
8 statements and cash flow projections failed to show that the Company was unable
9 to provide service to its customers and remain solvent.⁵¹ The Commission rejected
10 Staff's argument, recognizing that:

11 The construction project is very large in proportion to the Company's
12 current rate base, and the substantial debt required to finance the
13 construction of the project, along with the increased operating
14 expenses associated with the river water treatment will have a severe
15 negative impact on cash flow. This will damage the Company's
16 credit worthiness and cause the Company hardship until permanent
rates can be put into place. Based on the foregoing, we find Far West
is facing an emergency under the criteria established in Attorney
general Opinion 71-17.⁵²

17 **Q. WHAT ABOUT THE FACT THAT IN THE RECENT FINANCING**
18 **APPLICATION, DECISION NO. 69550, THE COMPANY ASSERTED AND**
19 **STAFF CONCLUDED THAT THE COMPANY'S REVENUES WERE**
20 **ADEQUATE TO SUPPORT THE REQUESTED INDEBTEDNESS?**

21 A. As a preliminary matter, it is again worth noting that Far West faced similar
22 circumstances in its 1999 interim rate proceeding. In that case, Staff
23 recommended, and the Commission authorized Far West to borrow \$6 million in
24 Decision No. 61713 (May 13, 1999), even though, according to Staff, the principal

25 ⁵¹ Decision No. 61833 at 6-7.

26 ⁵² *Id.* at 7-8.

1 and interest payments on the additional debt would result in a DSC of 0.3 and a
2 TIER of -0.29. The Commission recognized that the Company's rate base would
3 increase dramatically and that rates would likely have to increase, but also
4 recognized that it was in the public interest to provide funding for the project. The
5 issue facing the Company in this case is even more serious, given that the upgrades
6 to the Company's wastewater facilities have been mandated by another state
7 agency. It would be improper in my view to approve debt financing for the project,
8 and then argue, as Staff is doing, that because the debt was approved, the Company
9 should be able to service it as well come up with funding to finish the project
10 without needing any rate increases.

11 During the finance proceeding in 2007, Staff computed a DSC of 1.15 and a
12 TIER of 0.50. This is not in dispute.⁵³ In its report filed in that docket, Staff stated
13 that a TIER of less than 1.0 was not sustainable.⁵⁴ This is because a TIER of less
14 than 1.0 indicates the Company does not have operating income sufficient to cover
15 interest expense.⁵⁵ In other words, the Company is experiencing net losses. That
16 being said, I also do not dispute that, using Staff's approach, the DSC ratios for
17 2007 and 2008 suggest that the Company can support its long-term debt. However,
18 as I have testified, this is the wrong metric and obscures the real cash flow
19 predicament the Company currently finds itself in.

20 **Q. DOES THE FACT THAT STAFF DID NOT RECOMMEND A RATE**
21 **INCREASE IN ITS REPORT ON THE COMPANY'S FINANCING**
22 **APPLICATION HAVE ANY RELEVANCE?**

23 **A. No. Again, referring to Far West's 1999 financing application, Staff didn't**

24 ⁵³ *Id.*

25 ⁵⁴ Staff Report in Docket WS-0378A-07-0442 at 3.

26 ⁵⁵ *Id.*

1 recommend rate increases despite the magnitude of the financing and the weak
2 DSC and TIER ratios Staff computed.⁵⁶ In its decision, the Commission stated that
3 the “substantial increase in rate base as a result of the new plant and added expense
4 of purchasing water from the District may have a significant impact on rates,
5 although the ultimate effect won’t be known until the Company’s next rate case.”⁵⁷
6 In my experience, this is normally what is done when financing application are
7 approved – no position is taken on whether rate increases will be needed and to
8 what extent.

9 In this case, I believe that rate increases were expected. It was just a matter
10 of when and how much. Anytime a Company borrows and spends over \$20
11 million for plant improvements and the rate base increases by some 15 times, a rate
12 increase is likely to be needed to maintain the utility’s financial condition and
13 provide for a fair return on rate base. Again, this happened in Far West’s water
14 division rate case in 1999. In this case, the Commission specifically ordered the
15 Company to file a rate case for its sewer division in 2008, presumably because it
16 anticipated that rate relief would be needed because of the major plant construction
17 needed to comply with ADEQ’s requirements. Unfortunately, the Company’s
18 financial condition has deteriorated such that an interim rate increase is now
19 needed in advance of the permanent rate increases.

20 **Q. DO YOU BELIEVE THAT STAFF’S ALTERNATIVE INTERIM RATE**
21 **OPTION FOR AN INCREASE OF \$972,150 TO BE SUFFICIENT?**

22 **A.** No. It is less than half of the Company request of \$2,161,788, which I have
23 already testified will not completely solve the Company’s financial problems. The
24 Company will still need to raise additional short-term funds. While an interim rate

25 ⁵⁶ Decision No. 61713 at 3.

26 ⁵⁷ *Id.*

1 increase of \$972,150 is certainly better than no interim rate increase at all, the
2 ability of the Company to raise additional short-term funds will be severely
3 diminished by Staff's alternative recommendation compared to the Company's
4 recommendation of \$2,161,788. Staff's recommendation is also flawed because of
5 its increase in the rate for effluent.

6 **Q. WHY IS THAT, MR. BOURASSA?**

7 A. Because the Company cannot dispose of all of its effluent now, and an increase in
8 the rate for effluent will leave it, not with more revenues, but with increased
9 operating expenses for effluent disposal.⁵⁸ This is why we did not propose any
10 increase in the effluent rate on an interim basis.⁵⁹ It is also why we have proposed
11 a decrease in the effluent rate in the permanent rate case.⁶⁰ So, in addition to Staff's
12 schedule erroneously showing an increase of 143 percent for all classes (Staff
13 Report at GWB-2), Staff's recommended increase in the rate for effluent is a
14 terrible idea at this time.

15 **Q. DOES THAT CONCLUDE YOUR REBUTTAL TESTIMONY?**

16 A. Yes, except I do wish to note that my silence on any position taken by Staff or
17 RUCO, or with respect to any public comment, does not signal agreement.

Far West Water & Sewer, Inc.
Notes to Financial Statements
December 31, 2008

Note 1. Summary of Significant Accounting Policies

Nature of Operations Far West Water & Sewer, Inc. is an Arizona Corporation providing water and sewer services to customers in the Foothills area of Yuma county. The Company was originally organized and began water utility operations in 1965 as a subsidiary of H&S Developers, Inc. Sewer operations began in 1994. The Company was reorganized and began operating as a separate corporation in 1998.

Water Supply The Company obtains its water from the Colorado River and from the Yuma area aquifer. The long-term availability of water supplies is dependent upon, among other factors, drought conditions, increases in population, water quality standards, and legislation that may potentially reduce water supplies. Various California water systems north of Yuma also draw water from the Colorado River.

Public Utility Regulation The Company is subject to regulation for rates and other matters by the Arizona Corporation Commission and follows accounting policies prescribed by the ACC. The Company prepares its financial statements in accordance with generally accepted accounting principles in the United States of America, which includes the provisions of Statement of Financial Accounting Standards No. 71, "Accounting for the Effects of Certain Types of Regulation." SFAS 71 requires cost-based, rate-regulated enterprises to reflect the impact of regulatory decisions in their financial statements. The balance sheet includes regulatory assets and liabilities as appropriate.

Business Risks Although the Company has a diversified base of residential, industrial and other customers, risks arise from weather conditions, adequacy and quality of water supplies, regulatory decisions, pronouncements and laws, litigation, and general business conditions.

Notes to Financial Statements
December 31, 2008
(Continued)

Note 1. Summary of Significant Accounting Policies (Continued)

Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Revenue consists of monthly cycle customer billings for regulated water and sewer services. Revenue includes estimated unbilled amounts based on the last billing to the end of the accounting period. The Company considers accounts receivable to be fully collectable; accordingly, no provision for doubtful accounts is provided for. When accounts become uncollectible, they are charged to operations.

Property and Equipment Depreciation is computed on a straight-line basis at various rates as approved by the Arizona Corporation Commission.

Cash and Cash Equivalents Cash and cash equivalents consist of highly liquid instruments with original maturities at the time of purchase of three months or less. The carrying amount approximates fair value.

Restricted Cash Restricted cash consists of money market cash funds held by banks. The cash is released from restriction as continuing infrastructure improvements are approved for funding.

Concentration of Credit Risk The Company maintains accounts at a bank which is also a related party. Account balances are insured by the Federal Deposit Insurance Corporation up to \$ 250,000 per bank. On occasion the Company has deposits at the bank in excess of the FDIC insured amount.

Far West Water & Sewer, Inc.
Notes to Financial Statements
December 31, 2008
(Continued)

Note 1. Summary of Significant Accounting Policies (Continued)

Utility Plant Utility plant is stated at the original cost of such property when first placed in service. Utility plant accounts are charged with the cost of improvements and replacements. Retired or disposed of depreciable plant is charged to accumulated depreciation and credited to the asset account together with any costs applicable to retirement, less any salvage received. Maintenance of utility plant is charged to expense.

Customers' Advances for Construction and Contribution in Aid of Construction

Under the terms of construction contracts with real estate developers, including a related-party developer, and others, the Company periodically receives either advances for the costs of new main installations or title to the main after it is constructed and financed by the developer. Refunds are made, without interest, as services are connected to the main. Payments are made over a period of ten years for water contracts and twenty years for sewer contracts, and not in excess of the original advance. Unrefunded balances at the end of the contract period are credited to contributions in aid of construction (CIAC) and are no longer refundable.

Income Taxes The Company is a "C" corporation for income tax purposes. Accelerated depreciation methods are used for tax purposes, and those methods have the potential to create a deferred income tax liability to the extent that cumulative accelerated depreciation deductions exceed cumulative straight-line depreciation for financial accounting purposes and taxable income results from operations. However, cumulative tax and financial accounting losses at December 31, 2008 are such that neither a current nor a deferred income tax liability exists.

Far West Water & Sewer, Inc.
Notes to Financial Statements
December 31, 2008
(Continued)

Note 1. Summary of Significant Accounting Policies (Continued)

Advances in Aid of Construction Advances for construction of collection and distribution lines and related equipment that have been paid by developers, including related-party developers, are reimbursable in part to those developers as a factor of revenue generated through the use of that infrastructure. No interest is payable on those advances.

Unamortized Debt Discount and Expense Fees paid to obtain the interim short-term financing and long-term financing have been capitalized, and are amortized over the life of the loans.

Note 2. Related Party Transactions

In addition to maintaining its checking account at a related party bank, the Company has transactions and balances with other related parties, including a land development company with which Far West Water & Sewer, Inc. works closely in developing water infrastructure in new subdivisions. Balances at December 31, 2008 were:

| | |
|--|-------------------|
| Accounts receivable - associated companies | <u>\$ 253,172</u> |
|--|-------------------|

Far West Water & Sewer, Inc.

(Continued)

Note 3. Bonds Payable

Industrial Development Authority of Yuma County, Arizona:

(1) Water & Sewer \$ 24,820,000 Sewer Exempt Facility Refunding Revenue Bonds (Far West Water & Sewer, Inc. Project) Series 2007A, and
(2) \$370,000 Taxable Sewer Exempt Facility Refunding Revenue Bonds (Far West Water & Sewer, Inc. Project) Series 2007B bonds were issued for the purpose of the financing and refinancing of the acquisition, construction, and installation of capital improvements and equipment.

| For the years ending December 31: | Principal | Interest |
|-----------------------------------|----------------------|----------------------|
| 2009 | 315,000 | 1,601,250 |
| 2010 | 335,000 | 1,580,775 |
| 2011 | 360,000 | 1,559,000 |

Far West Water & Sewer, Inc.
Notes to Financial Statements
December 31, 2008
(Continued)

Note 4. Judgment Payable

As a result of an accident in 2001, the Yuma County Superior Court in 2006 imposed fines and penalties against the Company and its former President. The liability for those fines and penalties was recorded as current expense and as a contingent liability as of December 31, 2006. The fine is recorded net of discounted imputed interest of 8.25%, since payment of the fine is over several years at \$17,500 per month and no interest is included in the stated amount. The case is under appeal, and management and legal counsel anticipate that a decision will be reached during 2009. If payments were to begin in January 2010, following unsuccessful appeals, the future principal and imputed interest payments would be as follows:

| For the years ending December 31: | Principal | Interest |
|-----------------------------------|---------------------|-------------------|
| 2010 | \$ 114,552 | \$ 95,448 |
| 2011 | 124,369 | 85,631 |
| 2012 | 135,026 | 74,974 |
| 2013 | 146,597 | 63,403 |
| 2014-2017 | <u>688,121</u> | <u>116,879</u> |
| Total | <u>\$ 1,208,665</u> | <u>\$ 436,335</u> |

Note 5. Extraordinary Deductions

Expenses that management has classified as non-operating and non-recurring are as follows:

| | |
|---|-------------------|
| Professional services | \$ 132,047 |
| Emergency services at the Palm Shadows wastewater treatment plant | <u>501,363</u> |
| | <u>\$ 633,410</u> |

Note 6. Pension and Other Employee Benefits

The Company maintains a profit sharing contributory 401 (k) plan that covers substantially all employees. Employees who have completed twelve consecutive months of service, have been employed at least 1,000 hours and have attained the age of 21 are eligible to participate in the plan. The Company matches 50% of each employee's contribution up to 8% of gross compensation.

The Company provides health insurance for all full-time employees upon their completion of six months of service. Dependents may be covered at the employees' expense.

Far West Water & Sewer, Inc.
Notes to Financial Statements
December 31, 2008
(Continued)

Note 7. Pending Litigation

The Arizona Department of Environmental Quality and Far West Water and Sewer, Inc. have executed two consent orders, in March 2006 and again in October 2006, which required Far West to upgrade three of its wastewater facilities and close three others.

In September 2008, the Director of that department filed a complaint in the Superior Court of Arizona, County of Maricopa, primarily based upon the matters contained in the Consent Orders and other alleged reporting violations. Far West has filed an answer to that complaint. No date has been set for any hearing in this matter.

¹ Assumes only change in net income will be due to depreciation. Assumes Composite rate of 3.5% on new plant and half-year conv.. Growth in revenues on the system is expected to be minimal in 2009 as little customer growth expected. Expenses are assumed to continue at the same level as 2008.

² Estimated based in plant installed in 2008 and 2009.

³ Restricted cash reserve balance must contain a full year on interest and principle totaling \$1,920,000 by end of 2009. Current balance is \$1,632,432. This will consume approximately \$287,568 of cash flow. On the other hand there was \$238,488 of restricted cash for construction funds at the end of 2008 which is assumed to be used for construction projects. The net increase (decrease) in restricted cash is \$(49,080).

⁴ Assume associated co. receivable at end of 2008 is collected.

⁵ Pay down of trade payables primarily the result of ww system improvements. Payable balance at end of 2008 was over \$3.4 million.

⁶ Estimated 2009 cost to complete wastewater system improvements is \$2,266,000.

⁷ Estimated required 2009 costs for water system improvements is \$1,000,000.

⁸ It is still unclear how Company will fund capital requirements and cash shortfalls.

⁹ Principle payment on Yuma Bonds for 2009 is \$315,000.

⁹ Refunds of advances are over \$300,000 annually.

DECISION NO. 61833

OPINION AND ORDER
(Interim Rates)

9 DATE OF HEARING: June 9, 1999
10 PLACE OF HEARING: Tucson, Arizona
11 PRESIDING OFFICER: Jane L. Rodda
12 APPEARANCES: Mr. Norman D. James, Fennemore Craig, on behalf of
13 Applicant;
14 Mr. Kevin D. Quigley, Streich Lang, P.A., on behalf of Yuma
15 Park Associates, Ltd., Intervenor;
16 Mr. Scott Wakefield, Chief Counsel, on behalf of Residential
17 Utility Consumer Office, Intervenor; and
18 Mr. Robert Metli, Staff Attorney, Commission Legal Division,
on behalf of the Utilities Division Staff.

18 **BY THE COMMISSION:**

19 On February 10, 1999, Far West Water & Sewer, Inc. ("Far West" "Applicant" or
20 "Company") filed with the Arizona Corporation Commission ("Commission") an application to
21 increase its water rates. On April 9, 1999, Far West filed an application for interim rates to provide
22 Far West with adequate cash flow to obtain financing for the construction of a water treatment plant
23 and related facilities to permit the use of Colorado River water. By Procedural Order dated April 16,
24 1999, a hearing on the interim increase was set for June 9, 1999, in Tucson, Arizona.¹

25 Pursuant to Procedural Orders dated April 13, 1999, May 26, 1999 and May 28, 1999, the
26 Commission granted intervention to the Residential Utility Consumer Office ("RUCO"), to Yuma
27

28 ¹ The hearing on Far West's permanent rate case is set to commence on December 9, 1999, in Yuma, Arizona.

1 Park Associates, Ltd. ("Yuma Park"), a commercial customer of Far West's, and to George T.
2 Broucek, President of the Mesa Del Sol Property Owners Association. In conformance with the
3 Procedural Orders dated May 17, 1999 and May 19, 1999, the Commission's Utilities Division Staff
4 ("Staff") and RUCO filed direct testimony regarding the interim rate increase on May 28, 1999, and
5 Far West filed rebuttal testimony on June 4, 1999. A hearing on the interim rate increase was held on
6 June 9, 1999 in Tucson, Arizona.

7 DISCUSSION

8 Background

9 Far West provides water service to more than 9,000 customers in an area immediately east of
10 the City of Yuma, Arizona. Historically, Far West's sole source of water has been groundwater from
11 wells within its certificated area. During Far West's last rate case (Decision No. 60437, September
12 29, 1997), a large number of Far West customers complained about the Company's service quality
13 and the quality of its water. The Company's groundwater contains a high level of total dissolved
14 solids ("TDS"), which, although within federal and state water quality standards, affected the taste
15 and caused scale deposits on plumbing fixtures and filters and problems with appliances. In Decision
16 No. 60437, the Commission ordered Far West to perform a study of its water quality problems,
17 addressing in particular, ways to efficiently and cost-effectively meet customer expectations for safe
18 and potable water.

19 The Company filed a report with the Commission's Utilities Division, as required in Decision
20 No. 60437, in which the Company's engineers and consultants discussed various alternatives. The
21 Company concluded that its best alternative to alleviate the TDS problem is to acquire a source of
22 Colorado River water and construct water treatment and delivery facilities. Consequently, to address
23 the TDS problem and to ensure a long-term supply, Far West initiated a program to substitute
24 Colorado River water for groundwater.

25 In June 1998, Far West entered into a contract with the Yuma Mesa Irrigation and Drainage
26 District ("District") under which Far West will purchase 5,000 acre-feet of Colorado River water
27 annually. The contract price for Colorado River water is \$75.00 per acre-foot, or \$375,000 annually.
28 This quantity of water will satisfy about 70 percent of Far West's current customer demand. Far

1 West intends to contract with the District for additional acre-feet in the next several years.

2 In conjunction with a finance request by Far West to finance the construction of the treatment
3 plant and delivery system, Commission Engineering Staff reviewed the Company's report and agreed
4 that the treatment plant and related facilities as proposed by the Company were its most reasonable
5 option for addressing the TDS problem. Staff recommended that the Company's finance request be
6 granted.

7 Construction Project

8 Far West has estimated that the new plant will cost \$6.0 million. The construction project
9 will nearly double the Company's gross utility plant in service. In Far West's last rate case, the
10 Commission determined that the Company had gross plant in service of \$6.4 million and an original
11 cost rate base ("OCRB") of \$2.9 million.

12 Far West commenced constructing the facilities in 1998, and by the time of the interim rate
13 hearing, a substantial portion of the facilities had already been completed, including a 3.0 million
14 gallon storage tank, 20-inch raw water transmission main, the raw water pump station and the
15 finished water pump station. Construction on the treatment plant itself had commenced and the
16 Company's president testified that Far West had already committed \$4.0 million to this project. Far
17 West expected the treatment facilities to be completed and in operation by October 1999.

18 In Decision No. 61713 (May 13, 1999), the Commission authorized Far West to borrow up to
19 \$5.0 million on a short-term basis as an interim loan from H&S Developers, an affiliate of Far West,
20 and \$6.0 million on a long-term basis to construct the Colorado River water treatment plant and
21 delivery system. The short-term debt bears an interest rate of prime plus 1.5 percent, or 9.25 percent
22 at the time of the hearing. Far West initially intended to obtain long-term financing from a
23 conventional lender, but also sought assistance from the Water Infrastructure Finance Authority of
24 Arizona ("WIFA"). In March 1999, WIFA adopted a resolution authorizing a binding commitment
25 to assist Far West with its construction project. At the time of the hearing, the precise form of
26 WIFA's financial assistance was unclear. WIFA will either make a direct loan in the amount of \$6.0
27 million or provide financial assistance in the form of a "linked deposit guarantee," under which funds
28 will be deposited with a conventional lender in order to reduce the interest rate that would otherwise

1 be payable by Far West. In either case, the interest rate for the long-term debt will be reduced to
2 approximately 75 percent of the prime lending. WIFA has conditioned its financial assistance on the
3 approval of rates and charges for services that are "sufficient to make principal repayments and
4 interest payments and generate net revenues coverage."

5 Requested Revenue Increase

6 In Far West's permanent rate application, the Company sought an increase of \$2.5 million, or
7 140 percent, over test year revenues. In its interim application, Far West is seeking a revenue
8 increase of \$1,258,630 (on an annualized basis). Based on its projected changes in operating
9 expenses associated with the new plant and the anticipated debt service requirements resulting from
10 the long-term debt, Far West projected negative net income of \$948,612, negative operating income
11 of \$520,941 and a negative cash flow of \$547,194 for the period June 1999 through May 2000, if
12 interim rates are not granted. The Company contended that the lack of operating income and positive
13 cash flow would result in debt service coverage of only 0.06, negative interest coverage of (1.22) and
14 a negative return on rate base of (4.8) percent. Far West argued that without interim rates, the
15 negative coverage ratios would prevent the Company from obtaining long-term debt financing and
16 Far West would have to either halt construction of the facilities or finance those facilities with equity
17 which would substantially increase the Company's cost of capital, and increase the accrual of a
18 substantial allowance for funds used during construction ("AFUDC") which would inflate Far West's
19 rate base in future.

20 Far West assumed that the interim rates would go into effect in August 1999 and remain in
21 effect until May 2000 when it is expected the permanent rates would go into effect. The actual
22 revenue increase produced by Far West's proposed interim rates would be \$1,015,213 over the ten
23 month period. Far West calculated this revenue increase would result in a debt service coverage of
24 1.78, an interest coverage of 1.12 and a positive net income of \$51,000, and a return on common
25 equity of approximately 1.0 percent.

26 Far West recognized that the magnitude of its interim request is substantial, nearly a 70
27 percent increase. Far West argued, however, that its existing rates are very low compared with other
28 water utilities. Far West noted that under its proposed interim rates the average monthly bill for a

1 5/8" x 3/4" meter would increase from \$12.73 to \$21.47. In addition to the Colorado River project,
2 Far West has made capital improvements of approximately \$2.0 million since its last rate case.

3 Criteria For Interim Rates

4 RUCO supported the Company's interim rate request, although it recommended lower interim
5 rates than those sought by the Company. RUCO based its recommendation on the criteria established
6 in Arizona Attorney General Opinion No. 71-17 (May 25, 1971) regarding when the Commission can
7 set interim rates. Attorney General Opinion No. 71-17 found that the Commission has jurisdiction to
8 grant interim rates to be effective until the Commission establishes permanent rates without having to
9 make a finding of fair value if the need for interim rates qualifies as an "emergency." Specifically,
10 the Attorney General's Opinion found an emergency exists "when sudden change brings hardship to
11 a company, when the company is insolvent, or when the condition of the company is such that its
12 ability to maintain service pending a formal rate determination is in serious doubt."

13 In formulating its recommendation, RUCO noted the precedent set in Arizona Public Service
14 Company ("APS") Decision No. 53909 (January 30, 1984) when the Commission issued emergency
15 rates for APS because of severe cash flow restraints associated with extensive construction projects.
16 At that time APS was engaged in an extensive construction program to build the Palo Verde nuclear
17 plants. Due to the large investment requirements for the nuclear plants and resultant debt issuances,
18 APS had negative cash flow indicators. Absent interim rate relief, APS's commercial paper rating
19 was in danger of being downgraded which would have increased its cost of debt and further eroded
20 APS's cash flow ratios. In Decision No. 53909, the Commission recognized the severe drain that a
21 massive construction project has on cash flow, and the resulting adverse effects on the financial
22 viability of the utility. Accordingly, the Commission found these conditions to constitute an
23 emergency that qualified for interim rates.

24 RUCO believed that the situation faced by APS in the 1984 Decision and by Far West
25 currently are similar in that they both involve proportionately large construction projects, large debt
26 issuances to finance the projects and a cash flow problem associated with the debt issuance during the
27 construction period. Consequently, RUCO concluded that Far West's situation meets the criteria for
28 emergency interim rates as set forth in Attorney General Opinion No. 71-17 and Decision No. 53909.

1 RUCO believed Far West's situation qualified as an "emergency" because the construction project is
2 very large relative to the current rate base; the debt necessary to finance the construction has a severe
3 impact on cash flow, and ultimately on the Company's continued viability; and the Company is
4 unable to service the debt with current rates. RUCO disagreed with Far West that the timing
5 differences that arise as a result of the lag between the plant construction period and the time when
6 the plant enters service and is included in rates constitutes an "emergency" justifying interim rates.
7 RUCO believed such "timing differences" were faced by all regulated utilities and alone do not
8 constitute an emergency.

9 RUCO also disagreed with the amount of the interim rate increase Far West requested
10 because in RUCO's opinion, the increase exceeded the amount necessary to address the emergency.
11 RUCO argued that under Attorney General Opinion 71-17, interim rates are reserved for emergencies
12 and are not used to compensate a utility for a mere inability to generate profits or pay dividends, and
13 consequently, the magnitude of Far West's request, which included a small profit margin, was more
14 than needed to address the emergency situation. RUCO calculated that an increase of \$837,817 (on
15 an annual basis) is necessary to address the emergency. This is the amount, RUCO argued, that the
16 Company would require to service the new debt and provide for increased operating costs associated
17 with the new treatment plant. To provide a margin of safety, RUCO's recommendation provided a
18 debt service coverage ratio of 1.5. Far West calculated that under RUCO's recommendation, the
19 Company would experience a net loss of \$215,828 during the expected interim period ending May
20 31, 2000.

21 Staff and Yuma Park opposed the interim rate increase because in their opinions, Far West
22 was not facing an "emergency" under the criteria of the Attorney General's Opinion. Staff testified
23 that historically Staff recommends interim rate increases in cases where an operating change has or
24 will create a hardship for the company, the company is insolvent, or it is doubtful that the company
25 can maintain service pending a rate determination. After review of the submitted income statements,
26 Staff determined that Far West's request for interim rates did not meet the criteria Staff historically
27 applies. Staff did not believe that the cash flow of the Company as of September 30, 1998, the test
28 year used in the permanent rate case, indicated an insolvent entity or an entity unable to provide

1 service to its customers. Even utilizing the Company's cash flow projections Staff did not believe
2 Far West was unable to provide service to its customers and remain solvent. Yuma Park did not
3 present witnesses of its own, but participated in the questioning of witnesses and agreed with Staff
4 that the current request did not meet the "emergency" criteria established in the Attorney General
5 Opinion as the Company was not insolvent or unable to continue providing service.

6 Analysis

7 Under the unique circumstances presented by this case, we concur with RUCO and the
8 Company that Far West is facing an "emergency" caused by severe cash flow shortfalls associated
9 with the financing of a substantial construction project. The Company's move to utilize Colorado
10 River water for a large portion of its supply needs represents a significant operating change. The
11 additional plant associated with the project will almost double the Company's gross utility plant in
12 service (based on its last rate case). Without the interim increase, Far West will not be able to obtain
13 debt financing for the project until permanent rates are in place. It is uncertain whether Far West
14 would be able to finance the project with equity in the event it cannot obtain debt financing, but we
15 note that even if it could command an equity infusion of such magnitude, equity funding will
16 substantially increase the Company's cost of capital and affect the ultimate rates customers will be
17 required to bear at some point in the future.

18 The Company has determined that acquiring a source of Colorado River water is necessary
19 for it to address water quality issues that have plagued the Company. We concurred with that
20 determination in Decision No. 61713. Consequently, the Company has engaged in a relatively large
21 project to acquire Colorado River water and to construct the facilities necessary to deliver the treated
22 water to its customers. Absent sufficient rates to cover debt service, including interest, principal and
23 reserve requirements, neither WIFA nor conventional financing will be available for the Colorado
24 River water project. Far West's current rates are not sufficient to meet WIFA's or a conventional
25 lender's lending requirements, and Far West has not been able to make interest or principal payments
26 on its existing short-term loan. The construction project is very large in proportion to the Company's
27 current rate base, and the substantial debt required to finance the construction of the project, along
28 with the increased operating expenses associated with the river water treatment will have a severe

1 negative impact on cash flow. This will damage the Company's credit worthiness and cause the
 2 Company hardship until permanent rates can be put in place. Based on the foregoing, we find Far
 3 West is facing an "emergency" under the criteria established in Attorney General Opinion 71-17.
 4 The interim rates we approve herein shall be subject to refund in the event they are not justified in the
 5 final determination of the permanent rate case.

6 We agree with RUCO that the interim rates should be designed to address the "emergency"
 7 situation. In this case, interim rates should provide sufficient cash flow to enable the Company to
 8 meet debt service requirements of WIFA and/or a conventional lender and should not provide a return
 9 on equity during the interim period. We accept RUCO's recommended revenue level and rate design
 10 because we agree with RUCO that in calculating cash flow requirements the same time period must
 11 be utilized for determining revenues and expected expenses. RUCO utilized a twelve month period
 12 in analyzing both sources and uses of cash. The Company appears to have utilized a ten month
 13 period for calculating revenue and a twelve month period for calculating debt service costs.

14 In general, we agree with the Company that an AFUDC component in rate base is reasonable.
 15 In balancing the Company's entitlement to recover costs during construction with the effect of the
 16 emergency rate increase on customers, we find that it is reasonable in this case to require that any
 17 AFUDC that may be approved in the permanent rate case shall be offset by the amount of revenues
 18 collected from the emergency rate increase.

19 * * * * *

20 Having considered the entire record herein and being fully advised in the premises, the
 21 Commission finds, concludes, and orders that:

22 **FINDINGS OF FACT**

23 1. On February 10, 1999, Far West filed with the Commission an application to increase
 24 its water rates. The hearing on Far West's application for permanent rates is set to commence on
 25 December 9, 1999, in Yuma, Arizona.

26 2. On April 9, 1999, Far West filed an application for the implementation of interim rates
 27 to provide the Company with adequate cash flow to obtain financing for the construction of a water
 28 treatment plant and related facilities to permit the use of Colorado River water to improve water

1 quality and to provide a long-term source of supply.

2 3. By Procedural Order dated April 16, 1999, a hearing on the interim increase was set
3 for June 9, 1999, in Tucson, Arizona.

4 4. Pursuant to Procedural Orders dated April 13, 1999, May 26, 1999 and May 28, 1999,
5 respectively, the Commission granted intervention to RUCO, to Yuma Park, a commercial customer
6 of Far West's and to George T. Broucek, President of the Mesa Del Sol Property Owners
7 Association.

8 5. In conformance with the Procedural Orders dated May 17, 1999 and May 19, 1999,
9 Staff and RUCO filed direct testimony regarding the interim rate increase on May 28, 1999, and Far
10 West filed rebuttal testimony on June 4, 1999.

11 6. A hearing on the interim rate increase was held on June 9, 1999, in Tucson, Arizona.

12 7. Far West, Staff and RUCO presented witnesses at the hearing and Yuma Park
13 participated in the examination of witnesses.

14 8. Following the hearing, Far West and RUCO filed a joint submission for the purpose of
15 explaining a dispute that developed during the hearing concerning the computation of Far West's
16 debt service coverage.

17 9. Far West provides water utility service to over 9,000 customers, many of whom are
18 seasonal.

19 10. Historically, groundwater has been Far West's sole source of water and has been
20 characterized by high concentrations of TDS. Far West's groundwater supply meets or exceeds
21 federal and state drinking water quality standards, but the high levels of TDS caused deposits of scale
22 on plumbing fixtures and filters, undesirable taste, and in certain cases, damage to plumbing and
23 appliances.

24 11. Far West's current rates and charges for water utility service were approved in
25 Decision No. 60437, as modified in Decision No. 60826 (April 13, 1998).

26 12. During Far West's last rate case, many customers complained about the appearance,
27 odor and taste of Far West's water and its corrosive effect on appliances.

28 13. In Decision No. 60826, the Commission ordered Far West to perform a study of its

1 water quality problems, addressing in particular, ways to efficiently and cost-effectively meet
2 customer expectations for safe and potable water.

3 14. The Company filed a report with the Commission's Utilities Division as required in
4 Decision No. 60437. The Company concluded that its best alternative to alleviate the TDS problem
5 is to acquire a source of Colorado River water.

6 15. Far West has entered into a contract with the District to purchase up to 5,000 acre-feet
7 of Colorado River water annually at a cost of \$75.00 per acre-foot (an annual cost of \$375,000).

8 16. In order to utilize the Colorado River water, Far West is constructing a water treatment
9 plant with a capacity of 4.0 million gallons per day, together with a 3.0 million gallon storage
10 reservoir, a six mile 20-inch raw water transmission main, raw water pumping station, finished water
11 pumping station and other transmission mains and improvements.

12 17. Far West estimates a cost of \$6.0 million for constructing the water treatment plant
13 and other facilities required to use Colorado River water.

14 18. In November 1998, Far West filed an application requesting authority to incur long-
15 term debt in the amount of \$6.0 million and to incur a short-term bridge loan in the amount of \$5.0
16 million to finance the construction of the facilities needed to utilize Colorado River water. Staff
17 investigated Far West's proposal to use Colorado River water in connection with analyzing the
18 Company's financing application, and concurred with the Company that the use of Colorado River
19 water is the best and most cost-effective option currently available for improving water quality.

20 19. In Decision No. 61713 the Commission approved Far West's request for authority to
21 incur long-term debt in the amount of \$6.0 million, at an interest rate not to exceed 8.0 percent per
22 annum, and to incur short-term debt in the amount of \$5.0 million in connection with constructing the
23 Colorado River water treatment plant and related facilities.

24 20. Far West commenced construction of the facilities in 1998, and as of the date of the
25 hearing, had completed a significant portion of the facilities, including the 20-inch raw water
26 transmission main, 3.0 million gallon storage tank, raw water pump station and turn-out on the
27 District canal, and finished water pump station. As of the date of the hearing, Far West had already
28 expended, or had committed to spend, approximately \$4.0 million in connection with the purchase of

1 materials, labor, engineering and design services and other activities related to the construction of the
2 facilities.

3 21. Far West anticipates completing the treatment plant and related facilities by early
4 October 1999.

5 22. Far West has applied for and obtained a binding commitment for financial assistance
6 from WIFA, under which WIFA will either loan funds directly to Far West or provide a "linked
7 deposit guarantee" to a conventional lender in order to reduce the interest rate for the loan.

8 23. WIFA's financial assistance is expected to reduce the interest rate that Far West must
9 pay in connection with the long-term debt to approximately 75 percent of the prime interest rate, or
10 about 6.0 percent.

11 24. WIFA has informed Far West that to obtain WIFA assistance, Far West must obtain
12 approval of rates and charges sufficient to make interest payments, principal repayments and satisfy
13 other requirements of WIFA and any conventional lender.

14 25. Far West's current rates and charges are not sufficient to generate sufficient cash flow
15 to make debt service payments on either its existing short-term note or its anticipated long-term
16 financing.

17 26. Far West requested approval of interim rates that would produce, on an annualized
18 basis, additional revenue of \$1,258,630, to become effective on August 1, 1999, and remain in effect
19 until the effective date of the rates established in the permanent rate case.

20 27. For the period June 1999 through May 2000, Far West projects that it will have a
21 negative cash flow of \$547,194 and negative operating income of \$520,941 without the interim rate
22 increase.

23 28. Without an interim rate increase, Far West's debt service coverage, interest coverage
24 and other negative financial indicators will undermine Far West's credit-worthiness and prevent Far
25 West from obtaining long-term debt financing for its Colorado River project on reasonable terms
26 prior to the establishment of permanent rates.

27 29. Far West had not been able to make interest or principal payments on its short-term
28 bridge loan from its affiliate H & S Developers. Interest continues to accrue on the short-term debt at

1 the rate of 9.25 percent.

2 30. The long-term debt financing will allow Far West to achieve a balanced capital
3 structure of approximately 50 percent equity and 50 percent debt, which will reduce the Company's
4 cost of capital.

5 31. RUCO testified that the proportionately large construction project, the large debt
6 financing required to fund the project and the resulting severe negative impact on Far West's cash
7 flow constituted an "emergency" under Arizona Attorney General Opinion 71-17. RUCO
8 recommended that the Commission grant Far West interim rates that would generate additional
9 revenue of \$837,817 on an annual basis.

10 32. Staff and intervenor Yuma Park did not believe that Far West's financial position
11 constituted an emergency and recommended against the Company's request for interim rates.

12 33. The proportionately large capital improvement project, the large amount of financing
13 required to fund the project and the severe cash flow shortfalls caused by the debt service and
14 increased operating costs will cause a hardship on Far West that will negatively impact its credit
15 worthiness and ability to provide quality water utility service until permanent rates can be put in
16 place, thus constituting an "emergency" under Arizona Attorney General Opinion 71-17.

17 34. It is reasonable to set interim rates at a level that will allow Far West to make interest
18 and principal payments and meet reserve requirements on the proposed long-term debt. Interim rate
19 relief should not include any sums to generate a positive operating income.

20 35. An interim increase in water revenues of \$837,817 (on an annual basis) is sufficient to
21 insure adequate cash flow, debt service and interest coverage to alleviate the emergency and to allow
22 Far West to proceed with its long-term financing and complete construction of the treatment plant
23 and other facilities needed to use Colorado River water.

24 CONCLUSIONS OF LAW

25 1. Far West is a public service corporation within the meaning of Article XV of the
26 Arizona Constitution and A.R.S. sections 40-250 and 40-251.

27 2. The Commission has jurisdiction over Far West and of the subject matter of the
28 application.

1 3. Notice of the application was provided in the manner prescribed by law

2 4. Far West is facing an "emergency" within the definition set forth in Arizona Attorney
3 General Opinion No. 71-17.

4 5. The emergency rates approved herein and set forth in Exhibit A, attached hereto, and
5 incorporated by reference, are just and reasonable on an interim basis and should be granted.

6 6. It is reasonable to require that any AFUDC that may be approved in the permanent
7 rate case shall be offset by the amount of revenues collected from the emergency rate increase
8 approved herein.

9 **ORDER**

10 IT IS THEREFORE ORDERED that Far West Water & Sewer, Inc. shall file on or before
11 July 30, 1999, a schedule of interim rates reflecting the monthly minimum changes and commodity
12 rate set forth in Exhibit A hereto.

13 IT IS FURTHER ORDERED that the rates approved herein shall be interim and subject to
14 refund pending the resolution of a permanent rate case.

15 IT IS FURTHER ORDERED that the above rates and charges shall be effective for all service
16 provided on and after August 1, 1999.

17 IT IS FURTHER ORDERED that Far West Water & Sewer, Inc. shall notify its customers of
18 the interim rates and charges authorized herein and the effective date of same as well as the fact such
19 rates are subject to refund in the event they are not justified in the permanent rate case, by means of
20 an insert in its next regular monthly billing.

21 IT IS FURTHER ORDERED that in the event of any refund, interest is to be paid at the legal
22 rate.

23 ...
24 ...
25 ...
26 ...
27 ...
28 ...

1 IT IS FURTHER ORDERED that any AFUDC that may be approved in the permanent rate
2 case shall be offset by the amount of revenues collected from the emergency rate increase approved
3 herein.

4 IT IS FURTHER ORDERED that this Decision shall become effective immediately.

5 BY ORDER OF THE ARIZONA CORPORATION COMMISSION.

6
7   
8 CHAIRMAN COMMISSIONER COMMISSIONER

9
10 IN WITNESS WHEREOF, I, BRIAN C. McNEIL, Executive
11 Secretary of the Arizona Corporation Commission, have
12 hereunto set my hand and caused the official seal of the
13 Commission to be affixed at the Capitol, in the City of Phoenix,
14 this 20th day of July, 1999.

15

IV. RESPONSE TO STAFF19
V. CUSTOMER CONCERNS AND PUBLIC COMMENT.24

2142973

1 **I. INTRODUCTION, PURPOSE OF TESTIMONY.**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 A. Andrew J. Capestro, 12486 Foothills Blvd., Yuma, Arizona 85367.

4 **Q. WHAT IS YOUR OCCUPATION?**

5 A. I am an attorney.

6 **Q. WHAT IS YOUR AFFILIATION WITH FAR WEST WATER AND SEWER**
7 **COMPANY?**

8 A. I am affiliated with Far West Water and Sewer Company ("Far West" or the
9 "Company") because my wife, Paula Capestro, and my sister-in-law, Sandra
10 Braden, are the officers of the Company and its sole stockholders. Until the
11 beginning of 2006, I assisted Far West primarily with legal matters as they arose.
12 For example, I was lead counsel for Company in the criminal complaint brought by
13 the State of Arizona against the Company. However, I still am not on the
14 Company's payroll, and I bill Far West for legal services rendered.

15 **Q. WHAT ARE YOU DOING FOR THE COMPANY AT THIS TIME?**

16 A. Following the conclusion of the criminal matter, I started to take a more active role
17 in Far West's day-to-day operations, in addition to my legal counsel role. At that
18 time, the Company had a director of operations, Dusty Thomas, and a field
19 manager, Mark Kaveney. By the end of 2006, both Mr. Thomas and Mr. Kaveney
20 were gone. Since that time, I have essentially been acting as a *de facto* director of
21 operations, although I still have no official title. In that role, I sign all checks
22 issued by the Company, I approve most purchase orders and work orders, I
23 negotiate contracts and I work on the budget. I am also in direct communication
24 with the vendors and contractors supplying equipment for and constructing the
25 wastewater treatment plant improvements. I approve the hiring, promotion and
26 discharge of personnel. I review safety standards with the Company's safety

1 officer, and I assist in resolving customer complaints. I oversee regulatory matters
2 including the recent financing application approved by the Commission and I am
3 directly responsible for overseeing the prosecution of the Company's emergency
4 and permanent rate cases. I also work with county and city officials, and I am in
5 the field almost every day. Paula Capestro and Sandra Braden are also in the field
6 most days, meet with the Company's personnel, and review and approve action I
7 have either taken or recommended.

8 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE COMMISSION?**

9 A. No.

10 **Q. WHAT IS THE PURPOSE OF THIS TESTIMONY AND HOW IS YOUR**
11 **REBUTTAL TESTIMONY ORGANIZED?**

12 A. The purpose of my testimony is two-fold. First, I will respond to certain issues
13 raised in the filings by Staff and RUCO on the Company's request for emergency
14 rate relief. I will begin by discussing the Company's rapidly deteriorating financial
15 condition. Then, I will address RUCO's position that there is no emergency and no
16 basis for interim rate relief. In doing so, I will discuss the impact of Far West's
17 changed and changing circumstances, and the severe hardship the Company and all
18 of our over 15,000 water and our over 7,000 sewer customers will suffer if
19 RUCO's recommendations were adopted. Thereafter, I will respond to Staff's
20 filing and discuss Staff's alternative recommendations. Staff's recommendation
21 that the Commission deny any interim rate relief suffers from many of the same
22 flaws as RUCO's recommendation, and its alternative recommendation of an
23 interim increase of 46 percent is insufficient to address the Company's problems.

24 Second, I will address some of the concerns that were expressed by
25 customers at the Commission's recent public comment session, and that have been
26 expressed in the numerous customer inquiries and informal complaints we have

1 received from Commission Staff since our pending, permanent rate case for the
2 sewer division was filed last summer. *Far West Water and Sewer Company*,
3 Docket No. WS-03478A-08-0454.

4 **Q. WHY DOES THE COMPANY FEEL THAT IT NEEDS TO ADDRESS**
5 **MATTERS RAISED IN PUBLIC COMMENT OR COMPLAINTS?**

6 A. We understand that these issues are not directly related to the request for interim
7 rate relief. Nevertheless, I attended the public comment session and I was quite
8 disturbed by the number of customers that stated that no one ever responded to
9 complaints, that service was bad and that the Company did not care. Until the rate
10 cases were filed, we were not experiencing a lot of complaints from our customers,
11 and since I have been involved with the daily operations of the Company, our staff
12 has tried to resolve every complaint received in a timely manner. Far West's
13 personnel try hard to put the customer first, and everyone was devastated following
14 the Commission's public comment session. Of course, any legitimate customers
15 complaints about service are justified and must be addressed and rectified.

16 **II. OVERVIEW OF THE COMPANY'S CURRENT FINANCIAL PICTURE.**

17 **Q. MR. CAPESTRO, WHY DID FAR WEST SEEK EMERGENCY RATE**
18 **RELIEF?**

19 A. To ensure that the Company does not become insolvent and will be able to provide
20 adequate and reliable water and wastewater service. That is what our application
21 for interim rate relief filed last December says on the first page.

22 **Q. IS THE COMPANY INSOLVENT TODAY?**

23 A. I really don't know. I do know that the Company cannot pay its bills when they
24 become due. For instance, Far West owes \$318,281 for property taxes which it
25 cannot pay. The Company also has an outstanding bill with Yuma Mesa Irrigation
26 District ("YMID") for over \$100,000 for last year which has not been paid, and it

1 has another bill from YMID for \$100,000 for water used between December 2008
2 and February 2009 that must be paid.

3 **Q. HAS YMID TAKEN STEPS TO COLLECT THESE OUTSTANDING**
4 **AMOUNTS DUE?**

5 A. Not since I went to a YMID board meeting, and pled my case. They agreed to
6 accept payments of \$10,000 per month, plus interest of 1.5% per month for unused
7 water, but they are requiring that all present use be paid when due.

8 **Q. THANK YOU. YOU WERE DISCUSSING BILLS THE COMPANY**
9 **COULD NOT PAY. PLEASE CONTINUE.**

10 A. The Company owes \$2,932,734 for unpaid sewer plant invoices for equipment
11 delivered and services rendered through March 25, 2009. This does not include an
12 additional \$557,996 for equipment yet to be delivered, or services yet to be billed,
13 for completing the improvements at the Section 14 and the Del Oro treatment
14 plants. In addition, \$533,045 will be needed to complete the Seasons WWTP, and
15 \$440,045 will be needed to construct the Paula Street lift station. We cannot pay
16 for any of these remaining plant upgrades, and as a result, we cannot bring the
17 system into compliance with the two ADEQ Consent Orders that required these
18 system improvements.

19 **Q. WHAT BILLS ARE BEING PAID, MR. CAPESTRO?**

20 A. The ones that have to be paid to keep operating. We have to pay for power because
21 we cannot provide water or wastewater service if we do not have electricity.
22 Salaries and wages have to be paid, or there will be no one to operate the plants to
23 treat wastewater and deliver treated water for potable use. We also have to pay for
24 chemicals, testing, and materials and supplies, or we wouldn't be able to operate
25 properly. We have to make our monthly payments on the IDA bonds, including
26 funding the debt reserve, or else we will be in default. We have to pay the City of

1 Yuma to take the effluent from Palm Shadows or else the Company's ability to
2 dispose of that effluent will be in danger. We have to pay for the fuel and repairs
3 of the trucks and tanker trailers that transport that effluent. And we are making
4 payments from cash flow to pay the subcontractors working on the ADEQ-ordered
5 plant improvements so that they can make their own payroll.

6 **Q. WEREN'T ALL THESE EXPENSES BEING INCURRED BY THE**
7 **COMPANY DURING FAR WEST'S 2007 TEST YEAR?**

8 A. No. The first payment made by the Company on the IDA bond issue was in
9 January 2008. The monthly interest and principal payment, including funding the
10 debt service reserve, is \$201,096.61. In addition, in 2007 the Company did not pay
11 the City of Yuma for the effluent removal. That began in 2008 when we had to
12 find another source for removing effluent.

13 **Q. WHY IS FAR WEST PAYING THE CITY TO REMOVE EFFLUENT?**

14 A. I need to provide a little history here. Under a temporary permit issued by ADEQ,
15 the effluent from our Palm Shadows plant was used for dust control. When that
16 permit expired and could not be renewed, Far West transported the effluent from
17 that plant to other treatment plants owned by the Company. When it became clear
18 that those couldn't handle the extra volume, the City of Yuma agreed to take up to
19 100,000 gallons a day of effluent. Later, the City agreed to take 200,000 gallons a
20 day. Permits are now being issued by the City, in thirty day increments, to allow
21 for the transportation of the Palm Shadows effluent to a sewer manhole designated
22 by the City. Hauling to the City began in the middle of February, 2008, and during
23 2008, the Company paid the City of Yuma \$192,375 to take its effluent.

24 **Q. WAS THAT THE TOTAL COST TO THE COMPANY FOR EFFLUENT**
25 **REMOVAL?**

26 A. No. The total cost to the Company to remove this influent, including hauling,

1 came to \$501,363 and will continue to cost over \$40,000 each month until the
2 Section 14 plant is finished.

3 **Q. ARE THERE ANY OTHER EXPENSES THE COMPANY IS PAYING**
4 **TODAY THAT ARE OUTSIDE THE 2007 TEST YEAR?**

5 A. In addition to those expenses I have already discussed, on the water side, the
6 Company now must pay YMID for an additional 2,500 acre feet of surface water.
7 In 2007, the commitment to take or pay was for 5,000 acre feet, but beginning in
8 2008 the commitment to take or pay increased to 7,500. Our contract with YMID
9 calls for payment of \$100 for each acre foot not used. Far West barely uses 5,000
10 acre feet . The additional charge should be \$250,000, however, when I met with
11 the District and pled my case, YMID agreed to accept \$50 an unused acre foot
12 (\$125,000) for a short period of time. This is less than it could have been, but still
13 a new drain on cash flows.

14 **Q. BUT FAR WEST IS CURRENTLY UNABLE TO COMPLETE THE**
15 **IMPROVEMENTS REQUIRED BY THE TWO CONSENT ORDERS WITH**
16 **ADEQ?**

17 A. That is correct. The improvements required by ADEQ cost more than expected,
18 and Far West has spent all the funds from the IDA bond financing. Without rate
19 relief, the improvements may never be completed. Far West will be stuck in
20 regulatory limbo, with substantially completed plants that cannot be placed in
21 service.

22 **Q. WHY CAN'T FAR WEST BORROW MORE MONEY TO FINISH THE**
23 **NECESSARY IMPROVEMENTS?**

24 A. For two reasons. First, capital markets are extremely tight, and conventional
25 lenders are unwilling to lend funds except at very high interest rates, if at all.
26 Second, Far West has been unable to pay its current obligations, as previously

1 explained. The Company is having great difficulty securing even more debt given
2 its current cash flow problem. Let me put it this way – would you lend Far West
3 say \$2 million based on its current financial situation?

4 **Q. WHY DON'T THE SHAREHOLDERS FINANCE THE BALANCE OF THE**
5 **TREATMENT PLANT CONSTRUCTION COSTS WITH PAID IN**
6 **CAPITAL?**

7 A. This economy has hit the shareholders as hard as anybody else. The shareholders
8 do not have the money to invest in the Company, let alone several million needed
9 to finish the project. The shareholders have found the extremely tight credit market
10 to be just as daunting as has the Company. As shareholders, they receive no
11 dividends. As officers on the Company, Paula Capestro and Sandra Braden receive
12 a salary for their work, but earn no return on their investment in Far West.

13 **Q. SO THE ONLY SOURCE OF FUNDS AVAILABLE TO FINISH FUNDING**
14 **PLANT IMPROVEMENTS AND PAY EXISTING EXPENSES AND DEBT**
15 **SERVICE ARE YOUR CURRENT REVENUES?**

16 A. Yes, and those revenues are inadequate. Rebuttal Testimony of Thomas J.
17 Bourassa ("Bourassa Rb.") at 3-4. That is why we need rate increases, now, and
18 then again in the permanent rate case. Hopefully, if we can get the additional cash
19 flows we need to service the IDA debt from interim rate relief, we can pay for
20 some of these other extraordinary expenses, and obtain the funding to finish the
21 necessary sewer improvements and bring everything on line.

22 **Q. HOW DID THINGS GET THIS WAY?**

23 A. There are a number of reasons, including the inadequate revenues we were
24 authorized in our last rate case. But the straw that broke the camel's back was the
25 two ADEQ's Consent Orders. These orders forced us to make major upgrades to
26 our wastewater system in a very short period of time. Far West went from being a

1 small sewer utility operating several small, package-type treatment plants to serve
2 fewer than 1,000 customers in the late 1990s to needing more than \$20 million in
3 additional plant to satisfy regulatory requirements today.

4 **Q. ARE YOU SUGGESTING THAT THIS IS SOMEHOW ADEQ'S FAULT?**

5 A. No. While we have disagreements with ADEQ, we have accepted responsibility
6 for our problems. We are doing what ADEQ has required to ensure safe and
7 reliable wastewater treatment, which is what Far West promised the Commission it
8 would do in its last rate case. Frankly, none of this should come as a surprise to the
9 Commission, Staff or RUCO.

10 **Q. WHAT DO YOU MEAN, MR. CAPESTRO?**

11 A. Our last rate increase two years ago was conditioned on entering into the Consent
12 Orders with ADEQ. The Commission was aware that the Company would be
13 undertaking a substantial construction project to upgrade and expand its wastewater
14 treatment facilities to comply with those Consent Orders. Moreover, the rates
15 approved in that case were based on a now very distant 2004 test year. *See*
16 *Decision No. 69335 (Feb. 26, 2007)*. Putting aside the cost of construction needed
17 to comply with the ADEQ Consent Orders, the Company's rate base and operating
18 expenses have increased since 2004.

19 In Decision No. 69335, the Commission ordered Far West to file another
20 rate case for its sewer division by April 30, 2008. Presumably, the problems that
21 led to the ADEQ Consent Orders and the investment needed to address those
22 problems are what led the Commission to order us to file our pending, permanent
23 rate case. And we told the Commission in the prior rate case, roughly a year before
24 we actually issued the IDA bonds, that the rates being approved were inadequate
25 and that we would likely have to file for emergency rate relief to support the capital
26 investment needed to comply with the ADEQ Consent Orders.

1 In addition, the Commission authorized Far West to borrow \$25 million
2 later in 2007 in Decision No. 69950 (October 30, 2007). By contrast, the original
3 cost rate base approved in the sewer division's last rate case was \$1,549,650. No
4 one that understands anything about business would seriously contend that Far
5 West could borrow \$25 million and make payments of principal and interest for
6 several years without having to seek rate increases to be able to meet debt service
7 requirements and have sufficient funds to operate the business.

8 **Q. WHAT OTHER PROBLEMS DOES THE COMPANY FACE AS A RESULT**
9 **OF ITS PRESENT FINANCIAL CONDITION?**

10 A. On the sewer side, if and when we get the rest of the new treatment facilities in
11 operation, we will immediately face increases in certain operating expenses
12 relating to the operation of the plants. DR 4.2, Rigsby Attachment E. Reduced
13 sludge removal costs will offset some of these additional expenses, but we still
14 anticipate that operating expenses will increase.

15 In addition, the construction of the facilities for sewer division has caused us
16 to postpone capital improvements for the water division. For example, we need to
17 expand our surface water treatment plant to allow us to utilize additional Colorado
18 River water. The current plant is operating at capacity, forcing us to use increasing
19 quantities of lower quality groundwater. We also need to make upgrades to wells
20 and water storage facilities. In effect, we have been forced to neglect upgrades and
21 improvements for the water division to keep the sewer division operational. We
22 can't continue to ignore the water division in this manner.

23 **Q. HOW WILL THESE WATER UTILITY PROJECTS BE FINANCED?**

24 A. I have no idea. The budgeted cost for the planned well improvements totals
25 \$3,000,000. The budgeted cost for storage tank improvements is \$1,000,000. The
26 budgeted cost to expand the water treatment plant is \$16,928,016. The total of

1 these water projects is \$19,928,016. As I discussed, there is no way for us to raise
2 another \$20 million of capital given our current financial picture, especially in
3 today's economy. Not when we can't even secure financing to finish the sewer
4 projects ordered by ADEQ.

5 **Q. DOES THE COMPANY UNDERSTAND THAT INTERIM RATES ARE**
6 **TEMPORARY?**

7 A. Yes, we only expect these rates to be in effect until the decision is issued in the
8 pending rate case, at which time we expect permanent rates based on a higher
9 revenue requirement than the interim revenue requirement

10 **Q. WHY DO YOU BELIEVE THAT TO BE THE CASE MR. CAPESTRO?**

11 A. Because the interim rate increase we are seeking will only pay 83% of the
12 Company's annual debt service. Application at 2; Bourassa Rb. at 6-7. As a
13 practical matter, that means we will not be recovering increases in operating
14 expenses since our last rate case, or any sort of return on any of our additional,
15 post-2004 rate base. When all those things factor in, I believe additional increases
16 will be necessary above what we have asked for on an interim basis.

17 **III. RESPONSE TO RUCO.**

18 **Q. HAVE YOU REVIEWED RUCO'S FILING IN RESPONSE TO THE**
19 **COMPANY'S REQUEST FOR INTERIM RATE RELIEF?**

20 A. Yes, I have read Mr. Rigsby's testimony. I was really disappointed.

21 **Q. WHY IS THAT, MR. CAPESTRO?**

22 A. We are working very hard to keep Far West up and running, while also trying to
23 finish the construction of more than \$20 million of sewer improvements. We are
24 also responding to dozens of customer inquiries and "informal" Commission
25 complaints per week since the rate cases were filed. We worked very hard to
26 provide RUCO and Staff all of the information they requested. It took some time,

1 but I believe that information supports everything I have said about our current
2 financial crisis.

3 And I personally spent a day with Mr. Rigsby showing him everything we
4 have done and are doing to improve our wastewater treatment system. Mr. Rigsby
5 saw the significant changes in our sewer operations, and he seemed to appreciate
6 that more than \$20 million of sewer improvements don't just appear overnight for
7 free. Perhaps he should have spent a month with us so he could witness our
8 inability to pay debts when they fall due. It is very disappointing that RUCO is
9 ignoring the serious threat faced right now by the Company and all of its water and
10 sewer customers.

11 **Q. WOULD YOU LIKE TO RESPOND TO MR. RIGSBY'S DIRECT**
12 **TESTIMONY?**

13 **A.** Yes. I would like to make four points in response:

14 First, RUCO's two-fold recommendation that: interim rates are denied and
15 the permanent rate case be stayed, is truly terrifying. It will leave the Company in
16 regulatory limbo, unable to resolve its cash flow problem and unable able to pay
17 our bills.

18 Second, Far West sewer division is clearly insolvent, and the Company as a
19 whole is unable to pay its bills as they fall due and its ability to continue providing
20 water and wastewater service is seriously in doubt.

21 Third, Mr. Rigsby's financial analysis is contrary to reality.

22 Fourth, our circumstances and the relief sought to address them are
23 consistent with past Commission precedent involving Far West.

24 **Q. WHAT IS IT ABOUT RUCO'S RECOMMENDATION THAT FRIGHTENS**
25 **YOU MR. CAPESTRO?**

26 **A.** RUCO's recommendation that the Commission not even consider rate relief until

1 we have operated more than \$20 million of new sewer utility facilities for at least
2 one full year. Rigsby Dt. at 6. We started this project in 2006. We began making
3 debt service payments on over \$25 million dollars of IDA bonds in January 2008.
4 Even if we could finish all of the ADEQ-mandated sewer plant improvements
5 tomorrow, under RUCO's approach, we would not be able to continue our rate case
6 until sometime in mid-2010, and there would be no rate relief before sometime in
7 2011, under the best of all possible scenarios.

8 **Q. WHAT DO YOU MEAN "EVEN IF YOU COULD FINISH" ALL OF THE**
9 **PLANT IMPROVEMENTS?**

10 A. As I testified above, we cannot finish the plant improvements required by ADEQ
11 and bring the remaining plant on line.

12 **Q. WHY NOT?**

13 A. As I previously explained, we do not have the \$4,463,820 to finish the plant
14 improvements and finish bringing Section 14, Del Oro and the Palm Shadows force
15 main on line. We already owe \$2,932,734 at present, and there is another \$557,996
16 still to be billed for the Section 14 WWTP and the Del Oro WWTP. Plus, we still
17 need \$533,045 to complete the Seasons WWTP and \$440,045 to construct the
18 Paula Street lift station.

19 **Q. DOESN'T MR. RIGSBY TESTIFY (AT 18) THAT THE CLAIMED COST**
20 **OVERRUNS ARE "QUESTIONABLE"?**

21 A. Yes, but he does not provide any evidence to support his opinion, and with all due
22 respect, he has no idea what he is talking about. The original budget was based
23 upon engineers estimates, and some suppliers purchase orders, issued before
24 ADEQ issued approved permits. My rebuttal testimony contains the most current
25 updated numbers based upon issued contracts complying with the requirements of
26 the permits. In reality, RUCO would have us caught in an endless regulatory

1 Catch-22. We cannot increase our rates because we cannot bring the plant on line.
2 We cannot bring the plant on line because we have no money. We cannot get more
3 money because we cannot get our plants on line. It is the regulatory equivalent of
4 your worst nightmare.

5 **Q. WHY DOESN'T RUCO AGREE THAT THE COMPANY'S**
6 **CIRCUMSTANCES ARISE TO AN EMERGENCY?**

7 A. Because, according to Mr. Rigsby, we are not yet insolvent, and "there is no
8 question that the Company can continue to maintain service." Rigsby Dt. at 22, 23.

9 **Q. DO YOU AGREE WITH MR. RIGSBY THAT THERE IS NO**
10 **EMERGENCY BECAUSE THERE IS NO QUESTION THAT YOU CAN**
11 **CONTINUE TO MAINTAIN SERVICE?**

12 A. No, and Mr. Rigsby is not qualified to render such an opinion. He has spent his
13 entire working career at RUCO, the Commission and the Department of Revenue.
14 He is not an engineer or a utility plant operator, and he has no real world business
15 experience of any kind. He has based his opinion almost entirely on his view of
16 our financial data, and he is wrong. A utility that cannot pay its bills when they fall
17 due in the usual course of business is in clear jeopardy of having its ability to serve
18 compromised.

19 **Q. WHY DO YOU BELIEVE THAT MR. RIGSBY'S FINANCIAL ANALYSIS**
20 **IS CONTRARY TO REALITY?**

21 A. Mr. Bourassa addresses RUCO's numbers in his rebuttal testimony, including Mr.
22 Rigsby's debt service coverage calculations. Mr. Bourassa testifies that we do not
23 have adequate cash flows and we are on the verge of a financial collapse. Bourassa
24 Rb. at 11.

25
26

1 **Q. CAN YOU PROVIDE A SPECIFIC EXAMPLE OF WHERE MR. RIGSBY'S**
2 **ANALYSIS DIVERGES FROM REALITY?**

3 A. Sure, that's an easy one. Mr. Rigsby's reliance on Interest Income of \$635,000.
4 Rigsby Dt. at 16-19. When we first borrowed the IDA funds in late 2007, we put
5 roughly \$8.5 million in the bank, (the remainder was used to pay off the short term
6 financing used for engineering and for down payments on equipment) until we
7 could obtain certain approvals from ADEQ. While we waited, the funds earned
8 interest and kept doing so until the funds were fully expended. Mr. Rigsby saw the
9 plant we built with those funds and he knows that these funds are gone. Rigsby
10 Dt., Attachment E. There is no current source of interest income to subsidize
11 operations.

12 **Q. ANY OTHER EXAMPLES?**

13 A. Mr. Rigsby also ignores the real and continued impact of sludge removal costs,
14 which are nearly \$500,000 a year. Rigsby Dt. at 19. Yes, once the plant is on line,
15 these costs will go down, but we are paying about \$40,000 each month to haul off
16 sludge right now as I testified in detail above. When we have to pay an
17 extraordinary cost of more than \$40,000 a month, something else isn't going to be
18 paid. This is the real world, and it is really that simple.

19 **Q. ISN'T RUCO REALLY JUST SUGGESTING THAT YOU KEEP**
20 **YOURSELF AFLOAT WITH REVENUES FROM WATER SALES?**

21 A. Yes. In his rebuttal Mr. Bourassa discusses how convenient this argument seems
22 given past testimony by RUCO. Bourassa Rb. at 11-12. But in general, I agree
23 with Mr. Rigsby that the Commission should consider things on a Company-wide
24 basis. Particular attention should be given to the 8,000 customers that pay their
25 water bills every month but do not receive sewer service from us. Those folks are
26 on the same ship which is headed for disaster unless relief is given.

1 **Q. WELL MR. CAPESTRO, IF THAT'S TRUE, DIDN'T THE COMPANY**
2 **PLACE ITS CUSTOMERS IN PERIL?**

3 A. The Company's President in our last rate case accepted responsibility for not
4 keeping up with the explosive growth that took place in our service area. We grew
5 from less than 500 customers in 1998 to approximately 7,000 customers in 2006,
6 and neither the Company, its management nor its plant kept up. We accepted that.
7 Transcript from July 18, 2006 Hearing at 21, Docket No. WS-03478A-05-0801.
8 And we accepted responsibility to fix it. As I testified earlier, the Commission
9 would not approve our last rate increase if we did not enter into the Consent Orders
10 with ADEQ.

11 Bottom line, the Company could spend a lot of time assessing blame and
12 defending itself from accusations. But I urge Judge Rodda and the Commission
13 not to make this emergency rate case about finger pointing. Why ADEQ ordered
14 us to do what we were told to do, and whether we did it as we were ordered can be
15 addressed in our pending, permanent rate case.

16 **Q. ARE THERE ANY PROBLEMS SPECIFIC TO THE WATER DIVISION**
17 **YOU WOULD LIKE TO DISCUSS?**

18 A. Yes, I would like to respond to Mr. Rigsby's testimony (Dt. at 18) that it is
19 "questionable" that any water utility improvements are needed. Again, as with his
20 claims regarding cost overruns, Mr. Rigsby has no basis to make this claim, and he
21 is wrong. As we told RUCO and Staff in discovery, we are going to have to make
22 an estimated \$20 million worth of water system improvements if we are going to
23 continue to provide potable water utility service to our over 15,000 water
24 customers. Rigsby Dt., Attachment E. We have already delayed these projects,
25 and we cannot do so indefinitely, as Mr. Rigsby believes.

26

1 Q. THEN WHY DOESN'T THE COMPANY GET STARTED ON THE
2 IMPROVEMENTS TO THE WATER UTILITY SYSTEM?

3 A. Because we do not have another \$20 million to invest, and we cannot borrow any
4 more money. Because we are currently unable to finance the remaining costs of
5 the sewer plant improvements ADEQ has ordered us to construct. We can only
6 hope that Judge Rodda and the Commission see that our water customers are
7 already at risk of deteriorating service due to the financial crisis.

8 Q. WHAT ABOUT MR. RIGSBY'S CONCERNS THAT THE COMPANY IS
9 SEEKING TO SET RATES BASED ON PLANT THAT IS STILL BEING
10 BUILT?

11 A. I will leave it to Mr. Bourassa to discuss ratemaking concepts, but I found this
12 testimony to be a bit misleading. Bourassa Rb. at 12-13. For one thing, the
13 Company's rate base increased by nearly \$4 million dollars between the last test
14 year, 2004, and the test year in the Company's pending rate case before
15 consideration of the IDA Bond funded improvements totaling nearly \$19 million
16 that the Company proposed as post test year plant. Also, some of the
17 improvements built with the IDA funds are currently in service. These include a
18 Zenon plant installed at Del Oro with a total cost of \$1,715,216, Somat dewatering
19 units at Marwood, Section and Del Oro for a total cost of \$348,752, Trojan
20 Ultraviolet at Palm Shadows with a cost of \$71,924, Lift Station 16 with a cost of
21 \$56,703, a Nitrogen removal system with a cost of \$42,116 and the installation of
22 the odor control project with a cost of \$16,123. The Del Oro temporary plant is in
23 service, which is bought and paid for, and will be ultimately used at Seasons.
24 Finally, as Mr. Rigsby recognizes, we are not seeking to recover a return on rate
25 base on an emergency basis. Rigsby Dt. at 13.

26 In fact, as I testified above, granting the full interim rate increase we seek

1 won't cover the full debt service requirement and generate positive operational
2 income for the sewer division. Water customers will still have to subsidize sewer
3 customers. Bourassa Rb. at 11-12.

4 **Q. THEN WHY SHOULD THE COMMISSION BOTHER GRANTING**
5 **INTERIM RATE RELIEF?**

6 A. If we can increase our cash flows, we can pay our creditors faster, and we can try
7 to borrow the money that we need to finish the sewer improvements ADEQ
8 requires. Then we can finish our permanent rate case and hopefully have rates set
9 that allows a fair return to be earned on our investment in plant. Then, hopefully,
10 we can raise funds to upgrade and expand the water system. I understand that the
11 Commission needs to go through certain processes before making ratepayers pay
12 for utility service. But we need more revenue now on an interim basis or the issue
13 of permanent rates will be moot.

14 **Q. WHAT ABOUT MR. RIGSBY'S TESTIMONY (Dt. at 24) THAT YOU ARE**
15 **SOMEHOW TRYING TO "REDEFINE THE REGULATORY PARADIGM**
16 **IN ARIZONA"?**

17 A. I had to go to Webster's on that one. Far West does not know what the "paradigm"
18 or "outstandingly clear or typical example or archetype" regulated utility is in
19 Arizona. We don't have the luxury of considering the circumstances of other
20 utility providers right now. The only thing the Company is trying to do is complete
21 the improvements to its sewer utility system, as ADEQ ordered. Emergency rate
22 relief is appropriate to address "severe cash flow shortfalls associated with the
23 financing of a substantial construction project." *See Far West Water and Sewer*
24 *Company*, Decision No. 61833 (July 20, 1999) at 7, copy of which is attached to
25 Bourassa Rb.

26

1 **Q. ARE THE CIRCUMSTANCES THE COMPANY FACES TODAY SIMILAR**
2 **TO THE CIRCUMSTANCES PRESENTED IN DECISION NO. 61833?**

3 A. Yes, they are remarkably similar. The sewer plant improvements ordered by
4 ADEQ constitute a "substantial construction project" and "represent a significant
5 operating change" just like the Company's shift to Colorado River water supplies
6 in the late 1990s. *Id.* Like that transition, it has been determined (in this case by
7 ADEQ) that the improvements are necessary to address problems that have
8 "plagued" the Company. In that case, the cost of the water system improvements
9 more than doubled gross plant in service. *Id.* In this case, the costs will increase
10 the Company's existing plant in service more than 15 times from the rate base
11 approved in our rate case decided just two years ago. That is, when/if the
12 improvements are finally completed. As in that case, without interim rate relief the
13 Company will not be able to complete the necessary improvements because it
14 cannot obtain the necessary financing. *Id.*

15 **Q. ISN'T IT FAIR TO SAY THEN, MR. CAPESTRO, THAT FAR WEST HAS**
16 **FAILED TO LEARN FROM ITS MISTAKES?**

17 A. I do not believe so. The reasons for the improvements to our water system a
18 decade ago were different. At that time, numerous customers complained about
19 our poor quality groundwater, and we promised the Commission that we would
20 investigate how to address that problem. The most cost-effective solution was to
21 convert to surface water and use groundwater as a back-up supply. Here, we have
22 already admitted that we failed to keep up with growth. In contrast, in the 1990s,
23 our customers had grown tired of poor quality groundwater and demanded that the
24 Commission make the Company do something about water quality. Then, as now,
25 we accepted responsibility to fix a problem. We also expected to recover the costs,
26 and then, like now, we needed help with cash flow along the way due to the size of

1 the project. The Commission saw that need and awarded interim rate relief, subject
2 to refund, to provide that help.

3 Ironically, in that case, RUCO never suggested that the Company should use
4 sewer revenues to keep the water division afloat. Actually, in that case, RUCO
5 supported interim rate relief to keep the Company going as long as there was no
6 profit being earned. *Id.* at 5-6. We are asking for the same relief. It appears to me
7 that the only thing that has changed is RUCO's view of what constitutes an
8 emergency and its concern for the welfare of our customers.

9 **IV. RESPONSE TO STAFF**

10 **Q. HAVE YOU REVIEWED COMMISSION STAFF'S FILING IN RESPONSE**
11 **TO FAR WEST'S REQUEST FOR EMERGENCY RATE RELIEF?**

12 A. Yes, I have reviewed the Staff Report dated March 24, 2009. Staff's
13 recommendation is flawed for many of the same reasons as RUCO's. Namely,
14 Staff misses the point. Our interim rate application is about increasing cash flow
15 pending the establishment of permanent rates so that we can pay our bills and
16 complete the new treatment plants. Like RUCO, Staff ignores the serious threats
17 faced by the Company and its customers due to our current cash flow problem.

18 **Q. BUT MR. CAPESTRO, ISN'T IT JUST THAT STAFF DISAGREES THAT**
19 **THE COMPANY LACKS SUFFICIENT CASH FLOW?**

20 A. Yes, and for the reasons I have stated, this is erroneous. Again, how can we have
21 sufficient cash flow when we can't pay our bills? Moreover, Staff still recognizes
22 that the Company's sewer division suffered a net loss (including interest payments)
23 of more than \$2.7 million in 2008. No one that understands business would
24 suggest that this cash is "sufficient to cover [Far West's] operating expenses and
25 interest expenses while providing a reasonable amount of funds for unexpected
26 events/contingencies." Staff Report at 5. This is particularly the case when,

1 according to the Staff Report, interim rates will be in effect for 12 months, i.e., Far
2 West won't receive permanent rate increases until mid-2010, at the earliest.

3 **Q. WHAT ABOUT STAFF'S ALTERNATIVE RECOMMENDATION FOR AN**
4 **INTERIM INCREASE OF NEARLY \$1 MILLION?**

5 A. It tells me that Staff knows we need interim rate relief but doesn't want to say so.
6 But, the amount recommended by Staff, \$972,000, is insufficient. But, the amount
7 recommended by Staff, \$972,000, is insufficient. Bourassa Rb. at 22-23. It is
8 premised on the water division continuing to heavily subsidize the sewer division,
9 as the Staff Report shows. Staff Report at Schedule GWB-1.

10 **Q. DO YOU DISAGREE WITH STAFF THAT REVENUES FROM WATER**
11 **SALES SHOULD BE CONSIDERED?**

12 A. As I testified above, the water division should be considered because it is already
13 being harmed by our financial difficulties. But Staff is using a Company-wide
14 approach to mask the magnitude of our current cash flow problem. That won't
15 help the water division or the Company as a whole.

16 **Q. WHY NOT, MR. CAPESTRO?**

17 A. The most important thing is to get this Company financially healthy as soon as
18 possible. That requires improving our cash flow, which can only occur by
19 increasing our revenue. Bourassa Rb. at 19-20. Staff believes that the sewer
20 division is losing \$2.7 million annually. Even with the \$972,000 revenue proposed
21 by Staff, the water division is providing a subsidy of \$1.7 million. Who is going to
22 provide financing under this scenario? And if we can't obtain additional financing,
23 we cannot finish the sewer projects we have been ordered to construct. If we can't
24 finish the new plant, we can never get permanent rates. Finally, we won't be able
25 to construct the improvements to the water system, which have already been
26

1 delayed because water revenues are needed to subsidize the sewer division. The
2 bottom line is Staff put its head in the sand.

3 **Q. ACCORDING TO STAFF, FAR WEST HAS 7,237 SEWER CUSTOMERS**
4 **AND 8,286 WATER CUSTOMERS. ARE THOSE FIGURES ACCURATE?**

5 A. No. The number of sewer customers is about right, but we have over 15,000 water
6 customers at present. It appears that Staff relied on an error in our application. In
7 any event, about half of our water customers do not receive sewer service. This is
8 because they live in older subdivisions that were constructed before sewer service
9 was mandated by Yuma County. Those customers have individual septic systems,
10 and do not pay for sewer service. But they are being asked to continue to subsidize
11 our sewer customers, while facing the risk of deteriorating water service due to the
12 postponement of water system improvements.

13 **Q. HOW DO YOU RESPOND TO STAFF'S ASSERTION THAT THE**
14 **CONDITIONS FOR EMERGENCY RATE RELIEF ARE NOT PRESENT?**

15 A. Staff is wrong. I believe that all three conditions cited on page 2 of the Staff
16 Report are present: a sudden change has caused hardship, Far West's sewer
17 division is obviously insolvent, and the Company's ability to maintain service
18 pending a full rate case is in serious doubt.

19 **Q. WHAT SUDDEN CHANGE HAS CAUSED HARDSHIP?**

20 A. It should be obvious. As a result of having to upgrade our treatment plants to meet
21 ADEQ requirements under the Consent Orders, the sewer division's rate base has
22 increased by more than \$20 million since our current rates were set in Decision No.
23 69335, issued in February 2007. By comparison Far West's sewer division rate
24 base was set at \$1.5 million in that case, which used a 2004 test year. What if APS
25 or Southwest Gas had to increase its plant by 1500 percent over a period of several
26

1 years? Would that be a sudden change causing financial hardship? I certainly
2 believe it would be.

3 **Q. DOES STAFF BELIEVE FAR WEST IS CURRENTLY SOLVENT?**

4 A. That is what they say. The sewer division cannot pay its debts when they fall due
5 in the usual course while also having insufficient funds to complete the new plant.
6 Instead, the sewer division is being subsidized by the water division. That would
7 seem to meet the test.

8 **Q. HOW DO YOU RESPOND TO STAFF'S ARGUMENT THAT FAR WEST'S**
9 **ABILITY TO MAINTAIN SERVICE IS NOT SERIOUSLY IN DOUBT?**

10 A. The fact that we cannot finish the ADEQ-mandated plant improvements for our
11 sewer division indicates that our ability to maintain service is in jeopardy. The
12 delay in making needed water system improvements is further evidence that there
13 is a serious problem that must be addressed now. If we have to wait another year
14 (or longer) to obtain rate relief, the Company and its customers will be exposed to
15 serious service-related issues. Consequently, I believe this qualifies as an
16 emergency.

17 **Q. WHY DO YOU THINK THAT STAFF AND RUCO ARE OPPOSING**
18 **INTERIM RATE INCREASES, GIVEN THE CIRCUMSTANCES YOU**
19 **HAVE DESCRIBED?**

20 A. I am frankly very confused by their positions. Perhaps they are simply opposed to
21 interim rates under any circumstances. But I can speak to the result their
22 recommendations are likely to produce. First, as I discussed, service is going to
23 erode. As the memo attached to the conclusion of the Staff Report shows, in 2007
24 we had three complaints filed, while in 2008 we had only one complaint filed. We
25 have been able to maintain high quality service while completing the bulk of the
26 wastewater treatment plant improvements. But if we are forced to operate with

1 negative operating income for another year, and use a substantial portion of our
2 water revenues to subsidize our sewer system, our service will erode.

3 Moreover, denying interim rate relief will simply delay substantial increases
4 in our rates. If the price of that delay is compromised service, or worse, I do not
5 think the public interest would be well served. And if anyone thinks our customers
6 are upset now, wait until service is actually compromised. I see no good reason to
7 take the risk simply to delay rate relief.

8 **Q. YOU DO REALIZE THAT THIS IS NOT AN EASY TIME TO RAISE**
9 **RATES GIVEN THE PREVAILING ECONOMIC CONDITIONS?**

10 A. Of course, we feel it too. And this is a large part of the reason we have volunteered
11 to phase in new rates for the sewer division without carrying costs in our
12 permanent rate case. And now, we have risked that case, which has been stayed for
13 an unknown time, to obtain emergency rate relief. That is how important interim
14 rate relief is to the Company. The bottom line is that the interim rate increase is
15 just the first of what can be viewed as a four-phase rate increase. Unfortunately,
16 without the interim phase, we may not get to the permanent rate case. As I stated,
17 we will be stuck in regulatory limbo, or worse.

18 **Q. CAN THE COMPANY POST STAFF'S RECOMMENDED \$300,000 BOND**
19 **IF THE COMMISSION APPROVES INTERIM RATES?**

20 A. I honestly don't know. Even if we can get some party to post a bond in the amount
21 of \$300,000, we will have to put up some amount in cash, and there is very little of
22 that to go around. Given the probability of permanent increases, we hope the ALJ
23 and Commission will not require a bond in an amount that would unreasonable
24 given our current financial condition.

25 **Q. DO YOU HAVE ANY OTHER CONCERNS WITH STAFF'S**
26 **RECOMMENDATIONS IN THIS CASE?**

1 A. Yes, Staff's recommended rate design is problematic because Staff recommends an
2 increase in the rate for effluent. Staff Report at Schedule GWB-2. We specifically
3 recommended that the price for effluent not be increased on an interim basis
4 because we cannot sell all of our effluent now due to its high cost. *See Bourassa*
5 *Dt. at 7-8.* Golf courses are already choosing to pump more water and not buy our
6 effluent because it is too costly to buy our effluent. Thus, while this will likely be
7 an issue in the permanent rate case, the last thing we need now is a rate design that
8 not only will result in phantom revenues because we won't sell as much effluent,
9 but also increased operating expenses as the cost to dispose of effluent will
10 increase.

11 **V. CUSTOMER CONCERNS AND PUBLIC COMMENT.**

12 **Q. MR. CAPESTRO, DID YOU ATTEND THE COMMISSION'S PUBLIC**
13 **COMMENT SESSION ON MARCH 5, 2009?**

14 A. Yes. Additionally, we have also received approximately twenty-one informal
15 complaints from the Commission's Consumer Services Division. These
16 complaints were all filed sometime after the notice of the filing of the permanent
17 rate case went to the Company's sewer customers. Where those complaints raise
18 specific customer service concerns, such as odors, we have provided a written
19 response.

20 **Q. WHAT HAS THE COMPANY DONE SINCE THE PUBLIC COMMENT**
21 **SESSION?**

22 A. The day after the public comment session I met with both the customer relations
23 staff and the field personnel. As mentioned, everyone was quite shook-up, and
24 some of our staff were reduced to tears. Everyone, both inside personnel and
25 outside field staff, felt that they had been responding to customer complaints as
26 quickly as was possible, and that no one was ever ignored.

1 **Q. BUT SOME OF YOUR STAFF IS RATHER NEW TO FAR WEST,**
2 **CORRECT?**

3 A. Yes. Roxanne Fiddes became office and customer service manager less than two
4 years ago, along with Jeff Bigsby and Isaac Yocupicio, the field supervisors for all
5 the wastewater treatment plants and collections systems. However, all of Far
6 West's lead personnel are highly qualified.

7 Isaac Yocupicio has a grade four, the highest grade awarded in the State of
8 Arizona, across the board, in wastewater collection, wastewater treatment, water
9 treatment and water distribution, as do Sean Duvall and Maria Arreaga. Jeff
10 Bigsby has grade threes in wastewater treatment and wastewater collections, and
11 grade twos in water treatment and water distribution. Vern Garrison has grade
12 fours in water treatment and water distribution, and grade threes in wastewater
13 treatment and wastewater collections. The rest of the crew are all certified, grade
14 one or higher. Even Roxanne Fiddes, the office manager, has a grade one in water
15 distribution.

16 My point is that to be told that we were "simply" incompetent came as quite
17 a shock to each of them that have tried so hard to please customers. But perhaps
18 our customers simply don't want to be pleased. I cannot help but note that the
19 onslaught of customer complaints came after the notice of our rate filings.

20 **Q. WAS THE COMPANY RECEIVING A LARGE NUMBER OF**
21 **COMPLAINTS BEFORE THE RATE FILINGS WERE MADE?**

22 A. No. The Company had a large number of complaints in early 2006 before the odor
23 control program became effective in May 2006 and the Zenon temporary plant was
24 installed at Del Oro in June 2006. After that, few complaints were received, and
25 most of those concerned billing questions. This is consistent with the Consumer
26 Service Section's Memorandum at the end of the Staff Report.

1 **Q. WHAT OTHER STEPS DID THE COMPANY AND ITS STAFF TAKE**
2 **FOLLOWING THE PUBLIC COMMENT SESSION?**

3 A. We reviewed the action taken when a customer complaint is received. I confirmed
4 that the procedures that were put in place nearly two years ago had been followed.
5 Those procedures included resolution of a problem upon first contact if possible.

6 More specifically, if the complaint concerns billing, office staff try to
7 arrange a face-to-face meeting with the customer to determine how to resolve the
8 customers concerns. If the complaint concerns sewer management, including odor
9 complaints, or water management, including meter problems, a supervisor is to be
10 dispatched to the customer's residence to make personal contact. If there is an
11 odor complaint, the supervisor is instructed to try to determine the cause of the
12 odor and to take corrective action. Far West will flush all sewer lines near the
13 customer's residence with water and chlorine whether or not this has been
14 determined to be the cause. If the cause is from a lift station or plant, once again
15 corrective action will be taken, including addition of chemicals, and US Filter will
16 be contacted. Staff and service crew have been instructed to respond the same day
17 the complaint is received if possible. If not possible, response must be made within
18 24 hours. Personal contact with the customer is preferred. If the customer is not
19 home, staff must follow up with a phone call. In some instances, written
20 communication is warranted. All complaints must be logged in to the customer's
21 file, a work order issued and resolution noted to the customers file. After
22 reviewing these issues with staff, and reviewing customer files, I believe that these
23 procedures have been followed.

24 **Q. HAS THE COMPANY INVESTIGATED THE SPECIFIC CUSTOMER**
25 **COMPLAINTS THAT WERE RAISED AT THE PUBLIC COMMENT**
26 **SESSION EARLIER THIS MONTH?**

1 A. Yes, and we have either responded and addressed the concern to the customer, or
2 determined that the complaint was baseless.

3 **Q. HAVE THERE BEEN A LARGE NUMBER OF ODOR COMPLAINTS**
4 **SINCE THE RATE CASES WERE FILED?**

5 A. The Company has received six written complaints about odor since the rate cases
6 were filed, plus as I mentioned above, we have gone through the transcript of the
7 public comment session to investigate whether or not appropriate action was taken.
8 We received one odor complaint since the public comment session.

9 **Q. HAS THE COMPANY ADDRESSED ODORS AS PART OF ITS PLANT**
10 **IMPROVEMENTS?**

11 A. Yes, in fact, the Company implemented a formal odor control program in May
12 2006. This program is used throughout the areas serviced by the Company.
13 Pursuant to this program, Midas Carbon Scrubbers were installed at strategic
14 locations for wet well odor control. In addition, Bioxide is injected to eliminate
15 odors at set locations. The program is managed by US Filter (Siemens), which
16 inspects the equipment every two weeks to make sure that the scrubbers are
17 working properly. Also, pursuant to the contract, US Filter is obligated to
18 investigate any odor problem that may arise. Since instituting this program, the
19 Company has spent \$502,418 for the equipment and chemicals.

20 **Q. MR. CAPESTRO, DO YOU BELIEVE THAT THE COMPANY**
21 **CURRENTLY HAS AN ODOR PROBLEM?**

22 A. No. There are always going to be some fugitive odors from a wastewater
23 collection, treatment and disposal system. The goal is to eliminate those you can,
24 and minimize those odors you cannot eliminate. The odor control program
25 instituted in May of 2006 has greatly reduced or eliminated any odor coming from
26 the Del Oro, Marwood, Section 14, Seasons, Del Rey and Royale plants. It has

1 reduced the odors coming from the Palm Shadows plant, but has not eliminated
2 them. The Palm Shadows plant is set to be closed when the Section 14 plant
3 becomes operational. The Company, in addition to extra chemicals injected into
4 the system to control odors, has drained the primary pond thought to cause those
5 odors, used its equipment to remove any sludge that might be emitting odors and
6 constantly monitors air flow in the underground tanks to reduce smell. The action
7 seems to be working as the odor has diminished greatly, but has not been totally
8 eliminated.

9 Also, a large portion of the collection system is gravity flow. Sewage can
10 collect and stagnate when the flows are insufficient. This is especially true when
11 the winter visitors leave. The Company has implemented a year round program of
12 flushing the gravity collection lines, jetting them with water and chlorine from the
13 Company's vac truck. This should eliminate the odors coming from manholes
14 along the gravity collection. This program is increased during the summer months.
15 It is also used when a complaint is received about odors emanating for a location
16 close to a manhole.

17 Finally, sometimes the problem arises from one or more of the
18 approximately 8,000 septic tanks in the area we serve. These septic tanks also emit
19 sewer odor on occasion, but the Company cannot take any action to address those
20 odor sources because they are privately owned.

21 **Q. SOME CUSTOMERS HAVE ALSO COMPLAINED THAT THE**
22 **COMPANY IS BUILDING PLANT THAT SHOULD BE PAID FOR BY**
23 **DEVELOPERS. HOW DO YOU RESPOND TO SUCH CLAIMS?**

24 **A.** Actually, it was largely the other way around as much of the old plant was paid for
25 by developers. That is why the Company's rate base was so low in the last rate
26 case decided two years ago. The Del Oro, Del Rey and Villa Royale plants that are

1 being replaced were originally built by the Mesa del Sol Company which paid for
2 the original plant. Far West did not acquire those plants until 2001 at which time
3 they had already been in service for a number of years. The original Seasons plant
4 was paid for by the Development Group. The original Marwood plant was paid for
5 by H&S Developers, Inc. All of the plant improvements we are building today are
6 what the State of Arizona has told we are required to have to serve our sewer CCN.

7 **Q. DOES THE COMPANY HAVE A HOOK-UP FEE FOR THE SEWER**
8 **DIVISION?**

9 A. No, and none was proposed or approved in the last rate case decided in February
10 2007, despite the fact that it was known that all of these improvements were being
11 mandated by ADEQ. Moreover, many of the unfinished or not yet connected lots
12 in our CCN are in existing developments with no current developer involvement.

13 **Q. WHAT ABOUT NEW DEVELOPMENTS? DOES THE COMPANY**
14 **REQUIRE THAT DEVELOPERS PROVIDE FUNDING FOR BACKBONE**
15 **INFRASTRUCTURE?**

16 A. Yes, to the extent that treatment capacity is not available, and it has not been for
17 some time, as our issues with ADEQ and the County's moratorium on new
18 connections illustrates. Currently, we are including a pro rata share of the costs of
19 off-site treatment capacity in all of our line extension agreements. This funding for
20 off-site facilities is in addition to the usual requirements for on-site facilities.

21 **Q. YOU MENTIONED A MORATORIUM ON NEW HOUSING IN YOUR**
22 **SERVICE TERRITORY. WOULD YOU PLEASE WHO IMPOSED A**
23 **MORATORIUM AND WHY?**

24 A. The moratorium was imposed by ADEQ in one of the two Consent Orders, the one
25 dated October 31, 2006, but it was not system wide. For Palm Shadows, the order
26 stated that unless approved by ADEQ, Far West shall not construct any new

1 connections to the existing Palm Shadows collections system. For Seasons, the
2 order restricted the maximum flow to 70,000 gpd. Seasons has reached that
3 capacity, however there are few new homes ready for hookup which would be
4 served by that plant. For Del Oro, the restriction read "prior to adding new
5 connections to the Del Oro System, Far West shall submit a written request to
6 ADEQ for connection approval." Since the temporary plant was installed in June
7 2006, ADEQ has granted all written requests we have made for connections to the
8 Del Oro collections system. No restrictions were placed upon the Section 14 or
9 Marwood plants for additional hookups.

10 **Q. SO FAR WEST REALLY IS BUILDING MORE THAN \$20 MILLION**
11 **WORTH OF SEWER IMPROVEMENTS SO THE MORATORIUM WILL**
12 **BE LIFTED AND YOU CAN SERVE NEW DEVELOPMENTS?**

13 A. No. The plants are being built so that the Company can comply with the
14 environmental requirements of the State of Arizona and the EPA. The Company
15 signed Consent Orders almost three years ago, vowing to meet those standards and
16 it was given strict guidelines to follow by the wording of those orders. To say that
17 Far West signed a Consent Order, obligating itself to become indebted for more
18 than \$20,000,000, and agreeing to severe sanctions if it did not comply, just so that
19 the Company can serve new developments is ridiculous. Really, there are few new
20 developments of substance being built right now in our CCN, and this all has very
21 little to do with any moratorium. There is no moratorium for Marwood or the
22 Section 14 plants, and the restriction for Del Oro has been alleviated by the
23 temporary plant installed almost three years ago which can handle 300,000 gpd.
24 However, the temporary Del Oro plant cannot consistently meet ADEQ standards
25 and the permanent plant is necessary to achieve the goal set by ADEQ.

26

1 Q. SOME CUSTOMERS HAVE ALSO RAISED CONCERNS OVER
2 TRANSACTIONS WITH AFFILIATES. WOULD YOU LIKE TO
3 ADDRESS THIS ISSUE MR. CAPESTRO?

4 A. Yes. H&S Developers, Inc. is an affiliate of Far West. Because of the nature of
5 the new plants, the involvement of H&S Developers has been minimal. Outside
6 contractors have been hired directly by Far West, after competitive bid, to do the
7 electrical, mechanical and plumbing. All equipment was purchased directly by Far
8 West. H&S Developers expertise is in underground wet utilities, and was awarded
9 the contract to put in the force main from Palm Shadows to the Section 14 plant.
10 The contract was awarded after competitive bids were taken. H&S Developers
11 also built one building at Del Oro and two at Section 14.

12 Q. ARE AFFILIATED ENTITIES BEING REQUIRED TO ENTER INTO
13 LINE EXTENSION AGREEMENTS AND PAY A PRO RATA SHARE OF
14 THE COST OF OFF-SITE TREATMENT CAPACITY?

15 A. Yes.

16 Q. THANK YOU MR. CAPESTRO, DO YOU HAVE ANYTHING ELSE TO
17 ADD AT THIS TIME?

18 A. I would just reiterate that we understand customers are upset, and that the interim
19 and permanent rate increases we are seeking are large. But our sewer plant has
20 increased more than 1500% in just two years. This is causing serious financial
21 hardship, our ability to serve is being impacted because we cannot finish the
22 improvements we need. Far West needs rate relief now, not a year from this
23 summer. I fear we simply won't be able to keep it up much longer unless the
24 Commission acts favorably on our emergency request. It does not seem to be in
25 the public interest to wait until it is too late given the facts we have presented.

26

1 **Q. DOES THAT CONCLUDE YOUR TESTIMONY?**

2 A. Yes, except I do wish to note that the Company's silence on any position taken by
3 Staff or RUCO, or with respect to any public comment, does not signal agreement.
