DOCKETED BY [Signature]

In a market where people are losing their jobs and barely making ends meet, I think it's an unreasonable request to ask people to pay almost double what they are paying now for a base rate in a two year time period.

I know \$6.50 doesn't sound like a lot, but for people who are living on a fixed income, people who have lost their jobs or people who have had to take a lesser paying job, they don't have \$6.50 in discretionary money to offset that. These people are going to have to find that money from somewhere and most often it comes from the basic necessities, like food.

There are a lot of people who are just barely scraping by and can't afford this because they are not getting cost-of-living raises to offset increases such as this.

I know this for a fact. Our family is one of countless families in the same boat. We are now trying to make ends meet on just one income. I worked in the construction field and now I'm lucky to get 15 hours a week, which fairly soon will be totally gone.

Yes, I'll be eligible for unemployment, but it will be just a drop in the bucket by time taxes are taken out. Please don't add another burden to the people of Arizona who use this company. We need to put food on our tables for our children and clothes on their backs (just because the economy has stalled doesn't mean their growth has). We need to pay our bills without wondering where the money is going to come from because the bill just got larger for no other reason than we're a customer, not because of actual usage. Please vote no on this.
