ANNUAL REPORT 2008

Pursuant to A.R.S. § 45-632 and the Assured & Adequate Water Supply Rules, designated water providers are required to supply the following information. Instructions are listed under each section of this form.

Note: If any information pre-printed on this form is incorrect, please make the needed corrections. For any information not already pre-printed on this form, please follow the directions below. All parts must be completed.

PART 1 - COMMITTED DEMAND

Please provide the estimated future demand in acre-feet for undeveloped, recorded plats that are located in the area as of December 31, 2008. Report demand for residential versus non-residential lots separately.

Number of Residential Lots	Demand per Lot (af/yr) *	Total Demand (af/yr)
11,502	.23	2,645
Number of Non-Residential Parcels	Total Demand (af/yr)	
0	0	

Explain how the non-residential demand was calculated. Use a separate sheet if necessary.

PART 2 - PROJECTED ANNUAL DEMAND

Project the annual water demand in acre-feet for each year indicated. Calculate the increase in demand each year from the previous year. The projected demand in most cases will be greater than the total water use for the current calendar year. Current year demand should equal the total water deliveries in the service area for 2008 as reported on the Schedule F forms, plus system losses and unaccounted for water. Include all water sources used.

Year	Projected Population	GPCD **	Total Production (af/yr)	Increase from Previous Year (af/yr)

2017	105,568	76.8	9,080	807

PART 3 - WATER QUALITY

- A. Is the provider currently in compliance with the Arizona Department of Environmental Quality's state water quality standards and reporting requirements? Yes No
- B. Have any new Superfund or WQARF sites been identified within the provider's service area or have existing contaminant plumes migrated to be within one mile of any service area wells? Yes No

Please contact the Office of Assured and Adequate Water Supply if you need assistance completing this form.

Explanation and Calculation for Production Volume at Vance Well (55-617336)

1 The Vance Well Meter was used to calculate production volume from January 1, 2008 to April 30, 2008.

Meter Read (1/1/08)	Meter Read (4/30/08)	Difference
99,343,000	139,691,000	40,348,000

2 The Vance Well meter failed at the beginning of May, 2008. This failure was not realized until the middle of the month. In order to account for the volume of water sent from the Vance Well to the Water Distribution Center, the total volume of inflow to the WDC was compared to the total production volume of all wells contributing flow to the WDC, excluding the Vance Well. The difference between these two volumes was assumed to equal the production from the Vance Well that made it to the WDC. This calculation is shown below:

Total Inflow to WDC	Total Non-Vance Well Production	Difference (Vance Production)
162,573,000	146,338,000	16,235,000

3 In addition to the WDC, the Vance Well feeds an irrigation impoundment known as Villages Lake. From May 1, 2008 to October 31, 2008, the Vance Well was the only well that contributed raw water to this facility. As such, the meter on the raw water line feeding this facility was used to calculate additional production from the Vance Well. This meter rolled over at the 10,000,000 gallon mark on June 5, 2008 and August 30, 2008.

Meter Read (5/1/08)	Meter Read (10/31/08)	Difference	Meter Rollover Volume	Total
3,577,390	9,298,218	5,720,828	20,000,000	25,720,828

4 The total volume of production from Vance Well was calculated as the metered volume at the well, the calculated volume sent to the WDC in May, and the volume sent to the irrigation impoundment from May - October. The well was inactive from November 1, 2008 to December 31, 2008.

Vance Well Meter	WDC Volume	Irrigation Volume	Total Volume
40,348,000	16,235,000	26,720,828.00	83,303,828

Total Production Volume	255.65 AF
