Dear Commissioners,

I am contacting you to voice my support for NewPath Networks in my community. I am a resident of Scottsdale Mountain Community and just last week I attended an open house on behalf of the company, NewPath. They have several proposed cell towers for our area and came to the residents to educate us, ask for our cooperation and opinions regarding their efforts.

After attending the open house, it is my understanding that the company is pursuing a project which will greatly benefit us as residents. Their work will fill in a lot of service gaps which exist currently, making our cell phone woes nonexistent. In addition, we were told by the representatives from NewPath that these cell phone towers will not be the traditional and unsightly fixtures most are used to seeing. Rather, the NewPath structures can be anything from faux cacti, to decorative monuments, to stop sign and street light extensions. And we, as community members, have been called upon to lend our input regarding what type of fixtures we would most like to see them use, and where. The representatives even brought in an example of the faux saguaro material so we could see what it looks like. Overall, I found that the company is very eager to work with us to gain our support and perspectives regarding their project.

It was at this same open house that I heard there were some critics voicing their opinions at the Chamber of Commerce; so I decided to voice mine as well and contact you directly. NewPath's plan sounds great and their willingness to work in concert with our community speaks volumes. Please take into close consideration those who support this company's efforts in addition to any criticism and I'm sure you will see that such criticism is unfounded.

Sincerely,

Diana Kaiser
