Re: Docket No. E-01345A-07-0663 and T-01846B-07-0663

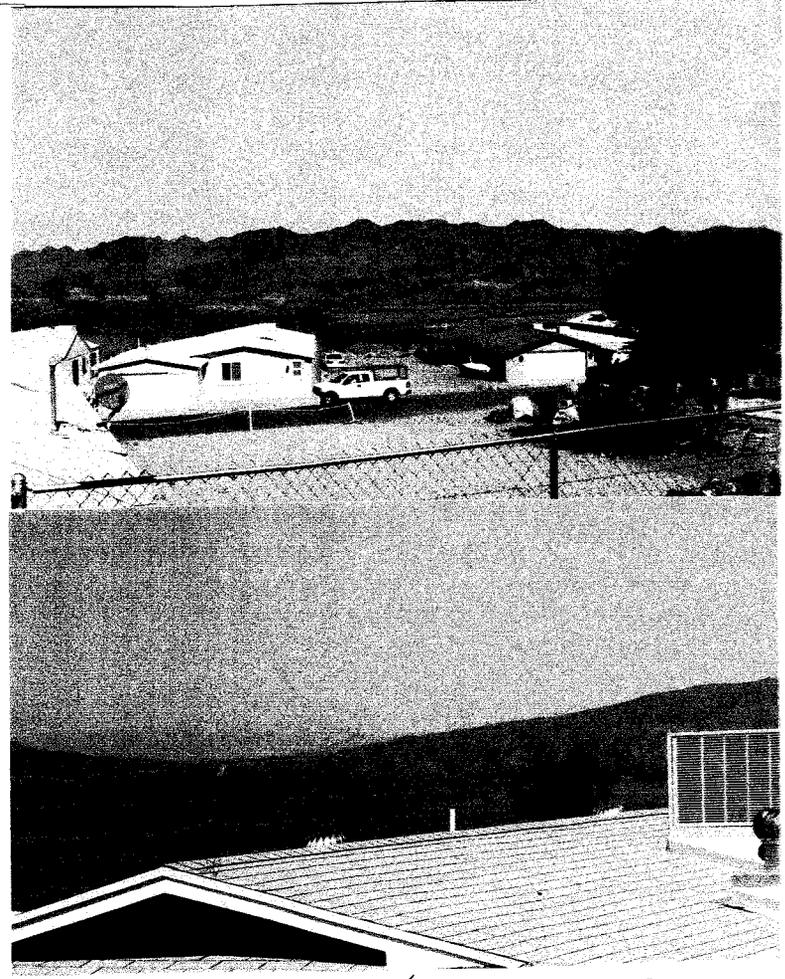

Dear Commissioners and Judge Harpring:

I am writing to reaffirm my support for the Underground Conversion Service Area for Hillcrest Bay.

Among the many reasons for my continued support for this project is that I believe by removing the unsightly poles and wires, the property values in our community will most certainly increase as a result.

The current economic situation has affected us all but, if this project is approved, no expense should be incurred by our residents for at least two years due to time needed for planning, contracting, scheduling, and then the actual work itself. That is why I feel this project should be looked at as a longer-term investment opportunity that will greatly benefit our community in the many ways previously expressed by myself and others.

My house is typical of most properties here. The two pictures below were taken from my living room window showing views of Lake Havasu. The pictures on the right have had the poles and wires digitally removed. Don't you agree the aesthetic improvement in the view alone would make my home more appealing and add to its value?

I respectfully urge you to approve this project.
