Birds, Birds, Bird droppings...

I have supported the conversion to the underground utilities from the beginning for over four years now. I am eighty one years old and while I have other places to spend my money I see this as a very important improvement for Hillcrest. I would like to see it accomplished in my life time.

I have also been bothered by the bird droppings for years, especially in the late summer. I did not realize until now that this nuisance was also a potential health hazard not only to me but to my family and visitors.

To have some sort of piecemeal correction leaving the lines and telephone poles in place with more to come is not what anyone deserves. Nor should this old piecemeal utility system continue to be a negative influence on the life of this community with it's ugly image, of transformers haphazard lines, their attraction for birds, the possible health implications and unsightliness of the bird droppings, not to mention the required messy cleanup in my yard and on my things.

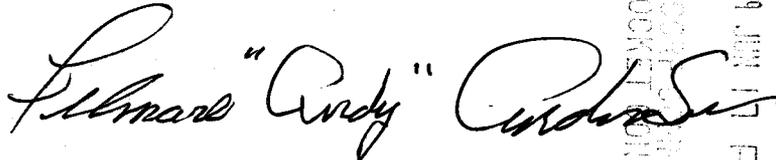

I am therefore encouraging you to advance the progress on this project. Approve it.

It is time to get this project going before this one time chance for Hillcrest Bay is gone for good.

Thank You,

Andy Anderson
