Subject: Vail to Valencia Transmission Line Upgrade

cll

Chairwoman Mayes:

I would like to thank you and the other Commissioners for holding hearings on the proposed Unisource transmission line upgrades (Vail to Valencia - Docket No. L0000f-09-0190-00144, Case 144) in Santa Cruz County earlier this month. The Board of Supervisors received many positive comments from those that attended the hearings. The citizens who attended really appreciated the Commission for holding the hearings here in the County as opposed to having them in Phoenix. Many were disappointed to learn that an actual decision would not be made at the conclusion of the hearings and were even more upset when they were told that Commission action on this item would take place at a subsequent meeting that would be held in Phoenix. Several citizens have approached the Board of Supervisors seeking their support in requesting that the Commission hold such a meeting in Santa Cruz County or at the very least hold it in Tucson to allow residents from the County to attend. Before the Board weighs in on this issue I would appreciate your comments on the possibility of holding such a meeting in Santa Cruz County or Tucson.

Sincerely,

Greg Lucero
