**Regarding: Hillcrest Bay Underground Conversion**

The existing overhead utilities originally should have been underground. Instead however Mr. Dunlap with help from the Good Old Boys received permission to go with overhead utility lines, saving him X amount of dollars. When the utility company installed the power poles they didn't take into consideration Hillcrest Bays C.C&R's in particular the elevation of properties and property lines. Over time this has created low overhead lines and poles out of their easement.

We have one chance to fix this Good Old Boys travesty, at our (Hillcrest Bay) expense. We voted for the underground conversion and the banter between the Gophers vs. the Polehuggers started . Most of the banter back and forth is meaningless. 99% is about money out of pocket. Now I don't condone fiscal irresponsibility, the fact is that not one penny has to come out of anyones pocket if they choose not to pay, their properties will simply be liened. The 10 to 15% property value increase with the conversion will more than compensate for the lien.

Telephone and Power Poles are a part of history. Respectfully it is yours and our responsibility to make our little spot in better condition than when we received it. Please turn a deaf ear to the "What do we need cars for when we have horses" mentality, don't decide to harm our community any further.

One chance -----One chance-----one chance to be a part of progress and to do the right thing.
