My name is Veronica Pedregon. I have owned property here since 1983. We had a good life here until my retirement was threatened a few years ago. My husband has since passed away, leaving me alone at the age of 62. Most of the people here are that age and older and are retired. We are too old to get jobs to pay off a utility co. at this time in our lives.

I have been against this underground utility since day one. I feel that we should have had a notarized count of people instead of the lame yes or no papers that went out. This has been a sham from day one. The people on our homeowners board are in collusion. I do feel that people who are against this was not represented at all. They have since used our asso. dues to hire a lawyer against us. Insult to injury.

APS should have taken care of these power lines years ago. They belong to them. I don't understand why I am buying my own power lines. If I move from my home I can't take them with me. It is not feasible for APS to install all of this since there is only 49 people who live here permanently. It is not cost effective. I can't even claim this on my taxes. I feel that this underground is already obsolete. The future is wireless and satellite.

I hope the Commission can see clearly to end this proposal before it ends us. Thank you for hearing me.

Sincerely,
Veronica Pedregon
