Docket NO. T-01846B-07-0663

Dear Commissioners:

We are very much opposed to underground conversion service area (UCSA). We did not sign the petition to vote yes or no for this project because we did not know how much it was going to cost. We want to be included with those who voted NO on this UCSA project. We CANNOT possibly pay for this project. We are living on Social Security and a very small retirement which makes it impossible to pay the expenses required for this project.

We put our utilities underground at our house when we built it in 1974 and tried to not interfere with anyone's view in any way.

These properties have lost at least 45% of their value since this project has been proposed and a enormous amount of home owners dues have been used in paying for this even though many of us are OPPOSED to it.

Also we need the street lights for the fire department and police department.

Wayne Dunham would like to speak at the commission hearing in July,2009 to these issues stated.

Thank you for your time and consideration in this matter.
