Subject: APS rate increase

43

Hello,

I would like to express my disappointment in APS for continuing these rate increases. I noticed another increase of almost 8% is being considered by your commission.

These are extremely hard economic times with almost 10% unemployment. Many working families have experienced a lay-off of at least one of the working family members and are now down to a one person household income.

With electric charges already outages how can APS ask for this? Little alone this be approved by the commission?

Do these companies and the commission know how hard it is for a family to pay their electric bill at today's rate? and where do they think people will get more money in these times to pay for an increase?

I would like to ask the commission to NOT approve this increase. In my opinion the commission should be considering a rate CUT to these outages electric bills.

Thank you for your consideration of NOT approving this increase.
