Dear Commissioners,

AZ CORP COMMISSION  
DOCKET CONTROL

I am writing in support of increasing energy efficiency programs in Arizona as part of the Commission workshops and the APS rate case. As you know, energy efficiency is the quickest, cheapest and cleanest way for our state to meet its growing energy needs and to jump-start our economy. I support increasing energy efficiency to at least 20% by 2020.

I recognize that energy efficiency programs are an investment that requires some up front funding that can result in slightly higher electricity rates, which I am prepared to pay. I also know that investing in energy efficiency measures such as lighting and weatherization will help to lower overall electric bills. As you discuss Arizona's energy future, please consider programs that will help lower my energy use and electric bills.

Sincerely,
